A well written social history of the shortest lived major US transportation mode from the railway historian and author of A Mighty Fine Road Choice One of the most intriguing yet neglected pieces of American transportation history electric interurban railroads were designed to assist shoppers salesmen farmers commuters and pleasure seekers alike with short distance travel At a time when most roads were unpaved and horse and buggy travel were costly and difficult these streetcar like electric cars were essential to economic growth But why did interurban fever strike so suddenly and extensively in the Midwest and other areas Why did thousands of people withdraw their savings to get onto what they believed to be a gravy train How did officials of competing steam railroads respond to these challenges to their operations H Roger Grant explores the rise and fall of this fleeting form of transportation that started in the early 1900s and was defunct just 30 years later Perfect for railfans Electric Interurbans and the American People is a comprehensive contribution for those who love the flanged wheel With this book the subject no longer has footnote status In fact Grant s work deserves a place alongside some of the other landmark surveys of the subject Here Grant moves beyond the receiverships the rickety track and all that fascinating rolling stock He shows us why the whole darned thing mattered Railroad History H Roger Grant has produced a fine social history of America s electric interurbans exploring the relationship between people and those railway enterprises The book fills a void is eminently readable and richly illustrated Don L Hofsommer author of Off the Main Lines Electric Indiana Carlos Arnaldo Schwantes,2023-08-15 In the early twentieth century an epic battle was waged across America between the interurban railway and the automobile two technologies that arose at roughly the same time in the late 1890s Nowhere was this conflict more evident than in the Midwest and specifically Indiana where cities of industry such as Indianapolis Gary and Terre Haute were growing faster every day By 1904 Indianapolis had opened the Traction Terminal which was widely acclaimed to be the largest and most impressive interurban station in the world Yet today there is only 90 mile remnant of this one great system still operating within Indiana Featuring over 90 illustrations and featuring contemporary accounts and newspaper articles from the period Electric Indiana is a biographical study of the rise and fall of a onetime important transportation technology that achieved its most impressive development within the Hoosier state

Darbee,2012 From its early founding to becoming a university town from the interurban railroad era to the famous Little Brown Jug harness race Delaware and Delaware County Ohio have many stories to tell Pres Rutherford B Hayes was born here Vincente Minnelli set designer director and father of actress Liza

Minnelli spent his youth in Delaware Delaware and Delaware County were both established in 1808 Ohio Wesleyan University opened in the heart of Delaware in 1842 and is still a major presence in the community Starting in the 1850s railroads made Delaware an important regional center of commerce and industry with products ranging from grapes to chairs to city transit buses Today Delaware County is one of the fastest growing counties in the nation Even so it has retained much of its rural landscape The city of Delaware is home to some 34 000 residents but still has the character of a classic Midwestern courthouse town In these pages the reader will discover the story of Delaware and of Delaware County communities such as Ashley Galena Ostrander Powell Radnor Shawnee Hills and Sunbury *New Philadelphia in Vintage Postcards* Erin L. VanFossen,2004 In 1772 Native Americans granted land in the Tuscarawas Valley to Moravian missionary David Zeisberger and he established the Christian community of Schoenbrunn Village which remained until 1777 when members were forced to relocate Then in late 1804 John Knisely his family and other pioneers braved the western frontier and settled on the Tuscarawas River near the Schoenbrunn Village site On October 23 1804 John Knisely founded the town of New Philadelphia He was a great philanthropist donating land to the city for future public buildings guaranteeing its selection as the Tuscarawas County Seat In Schoenbrunn Village which has been partially excavated and rebuilt as a historic site in New Philadelphia missionaries lived in harmony with Native Americans and so it seems fitting that New Philadelphia through the influence of John Knisely s generosity has maintained its image as the new city of brotherly love Two hundred years later the city strives to keep Knisely s dream alive with its generous allocation of resources and commitment to those in need **The Electric Pullman** Lawrence A. Brough,2013-04-18 A history of the Ohio railroad car and equipment company and its 16 year run Entering an already crowded and established industry the Niles Car Manufacturing Company in Ohio began business with surprising success producing well over 1 000 electric and steam railway cars cars so durable they rarely needed to be replaced That durability essentially put the company out of business and it vanished from the scene as quickly as it had appeared leaving little behind except its sturdy railway cars The story of this highly regarded company spans just 16 years from Niles s incorporation in 1901 to the abandonment of railway car production and sale of the property to a firm that would briefly build engine parts during World War I Including unpublished photographs and rosters of railway cars produced by the company and still in existence in railroad museums The Electric Pullman will appeal to railroad enthusiasts everywhere Praise for The Electric Pullman Required reading for anyone interested in interurban history It holds additional appeal for those interested in Ohio history or the junction point between business society and technology Lexington Quarterly Although not one of the major manufacturers in its field the Niles company produced some notable and well remembered equipment during the height of the electric interurban railway era Indeed among some interurban railway historians Niles cars are sacred objects As such its story deserves to be told and theoretically would be a logical complement to IUP s books on the Brill and Jewett companies Brough himself is a serious historian who knows his subject and has clearly mined all the
