legendary conductor Gennady Rodhestvensky the book looks at our basic musical faculties how we perceive sounds distinguish their pitch and structure and recognise rhythm It then examines the nature of musical empathy what it is that allows us to perceive and emotionally connect with music The second part of the book focuses on the creative processes behind writing music The third section deals with music education looking at the role of innate and inherited characteristics in the formation of talent and considering why many who excel at an early age burn out later on The book ends exploring how musical development can shape the human brain strengthening other cognitive faculties including those unrelated to music This is a book that will fascinate anyone with an interest in music and musicians from the fields of music psychology and education to musicians themselves whether amateur and professional
