Interviewing In Health And Human Services:

Interviewing in Health and Human Services Krishna Samantrai, 1996 This text presents an innovative approach to learning and teaching the art of interviewing in the increasingly diverse and complex field of human services Using a clear straightforward language Samantrai explains abstract concepts principles and techniques of professional practice Then by presenting complete recordings of actual case interviews she illustrates how these theories translate into everyday application Line by line analysis alongside the interviews allows the student to examine the client s exact words nonverbal behaviors and psychological processes and assess the worker s skills and techniques Samantrai has carefully addressed multiculturalism Not only does she discuss interviewing ethnic minorities but she covers the necessary skills for interviewing people of all cultures as well as women and children Included at the end of this text are quick reference guides covering how to organize interviewing principles and techniques assess client needs and develop service plans Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2003: Related agencies United States. M.A.,Ladson Hinton M.D.,Devon E. Hinton M.D. Ph.D.,Laurence J. Kirmayer M.D. F.R.C.P.C.,2015-05-06 The Cultural Formulation Interview CFI is a product of the arduous process that resulted in publication of the DSM 5 and only one book DSM 5 Handbook of the Cultural Formulation Interview provides clinicians with the background and guidance they need to implement the CFI The Handbook teaches the reader how to conduct a cultural assessment using the CFI which consists of three types of semistructured interviews Although the CFI was not designed to be the sole basis for making a clinical diagnosis it can be used in research and clinical settings to enhance clinical understanding and decision making The volume presents techniques to help providers situate their work within the context of a patient s culture to enhance communication not only with those of different cultures but across all clinical encounters Especially instructive are the supplemental videos that demonstrate application of the CFI components through the use of clinical vignettes Clinicians will of course find the DSM 5 Handbook of the Cultural Formulation Interview indispensable but administrators policy makers advocates and other practitioners who work collaboratively to engage patients in the mental health care process will also value its clarity and comprehensiveness
