Close Relationships offers an account of the nature of intimate relationships and their effects on people's self-concepts. The development and maintenance of intimate relationships are examined along with people's motives and goals in pursuing intimacy, the nature of social exchanges in intimate relationships and the consequences for individuals who find themselves socially isolated. The critical role of communication in intimate relationships is given emphasis. Comprised of seven chapters, this book begins with a discussion on the role of self-disclosure in intimate relationships as well as the risks that individuals incur when they self-disclose. The next chapter presents a cognitive interaction model of the nature of intimacy and intimate relationships within the context of cognitive social learning theory and a systems theory approach to communication. The effect of people's motives on relationships is then considered together with the role of two fundamental human motives: power and intimacy on love and friendship. The remaining chapters focus on the importance of the identification process that is how people fix their own and others' identities in social interaction in developing relationships, patterns of nonverbal exchange in close relationships, how and why loneliness occurs and the nature of social exchange processes in intimate relationships. The book concludes with an epilogue that provides a perspective on why people may find it difficult or easy to form intimate relationships.
