Spell of the Urubamba Daniel W. Gade, 2015-10-05. This work examines the valley of the Urubamba River in terms of vertical zonation, Incan impact on the environment, plant use, the history of exploration, and the notion of discovery. The idea of land reform and cultural contact with the European world. Winding its path northward from the Andean Highlands to the Amazon, the valley has served as the stage of pre-Columbian civilizations and focal point of Spanish conquest in Peru. Gade left behind not only a superb body of scholarly work but a network of colleagues and students who remain indebted to his example. This book should serve as an inspiration for all scholars who wish to pursue the Sauerian counter-enlightenment or post-development agendas of understanding and respecting particular places in all their historical and cultural complexity, including ambiguities and contradictions. *The Geographical Review*, American Geographical Society.

Tropic Aldo Brando, Arturo Guerrero, 1997. Everything in this book invites us to marvel at the Colombian tropics. As the point of convergence of the tectonic plates, flora and fauna of three American continents, the world's two largest oceans, and its most variegated mountains, it is a territory of excess. The restless lens of Aldo Brando focuses on this natural setting, furnishing us with a panoply of images that excite both the eye and the imagination. As the eminent Colombian writer German Arciniegas points out, this book is a vertical exploration of a country which is the synthesis of the Americas. Novel and unique, it is a summary of fifteen years' work by a photojournalist whose documentation of wild life goes beyond capturing the

physical contours of the seas islands jungles savannahs mountains and inhabitants of Colombia It penetrates into the beauty and soul of natural wonders as one of the world s leading professionals in the field the American wildlife photographer Art Wolfe recognizes in his prologue The book s five chapters are accompanied by an essay written by the Colombian journalist Arturo Guerrero who invites us to share in the astonishment and poetry found in nature and science The dazzling photographs of this book evoke the magic of the tropical ecosystems of the new world and draw near to the intimacy of nature It also allows us to reflect upon mankind s contradictory relationship with the natural world Professor Sir Ghilleen Prance director of the Royal Botanical Gardens Kew writes in his introduction It is my hope that this book helps to encourage the conservation of Colombian ecosystems which are a valuable resource not only for inhabitants of that nation but also for the world The book concludes with a heartfelt message by the Colombian poet William Ospina Aldo Brando As a student of marine biology in the early 1980 s Brando became interested in wildlife photography and film making specializing in Colombia s tropical ecosystems His work has appeared in such books as Coral Reefs of the Caribbean Mangroves Paramos Colombia from the air For a Country Within the Reach of the Children all published by Villegas Editores Malpelo Oceanic Island of Colombia published by Imprenta Mariscal National Geographic His photographs have also appeared in Americas BBC Wildlife Earth Climbing Natural History Terre Sauvage the San Francisco Examiner Sinra and Wildlife Conservation among other magazines His collective exhibitions include the Smithsonian s international display on tropical rainforests and Forests Revisited Expeditions at the End of the Millennium held at the United Nations in New York

Vision, Race, and Modernity Deborah Poole, 2021-08-10 Through an intensive examination of photographs and engravings from European Peruvian and U S archives Deborah Poole explores the role visual images and technologies have played in shaping modern understandings of race Vision Race and Modernity traces the subtle shifts that occurred in European and South American depictions of Andean Indians from the late eighteenth to the early twentieth centuries and explains how these shifts led to the modern concept of racial difference While Andean peoples were always thought of as different by their European describers it was not until the early nineteenth century that European artists and scientists became interested in developing a unique visual and typological language for describing their physical features Poole suggests that this scientific or biological discourse of race cannot be understood outside a modern visual economy Although the book specifically documents the depictions of Andean peoples Poole s findings apply to the entire colonized world of the nineteenth century Poole presents a wide range of images from operas scientific expeditions nationalist projects and picturesque artists that both effectively elucidate her argument and contribute to an impressive history of photography Vision Race and Modernity is a fascinating attempt to study the changing terrain of racial theory as part of a broader reorganization of vision in European society and culture
