specifically the anthology's main contribution is its explicit focus on feminist parenting from the margins to the global periphery from Africa and its diaspora from the Global South to Europe and America. The 27 parents from diverse backgrounds, walks of life and countries gathered in this anthology share powerful responses to the above questions by narrating their experiences of some of the challenges, dilemmas, promises and compromises of parenting with a feminist perspective. The volume is one of the first collections published with first person essays describing very touching, beautiful and sometimes painful stories of what it means and more importantly what it costs to become a feminist parent with an intersectional approach. In doing so, the authors of this book aim at re-claiming parenting as a necessarily political terrain for subversion, radical transformation and resistance to patriarchal oppression and sexism.

Travels with Tocqueville: Beyond America Jeremy Jennings, 2023-03-21. A revelatory intellectual biography of Tocqueville told through his wide-ranging travels, most of them aside from his journey to America barely known. It might be the most famous journey in the history of political thought. In 1831, Alexis de Tocqueville sailed from France to the United States, spent nine months touring and observing the political culture of the fledgling republic and produced the classic *Democracy in America*. But the United States was just one of the many places documented by the inveterate traveler. Jeremy Jennings follows Tocqueville's voyages by sailing ship, stagecoach, horseback, train and foot across Europe, North Africa and of course North America. Along the way, Jennings reveals underappreciated aspects of Tocqueville's character and sheds new light on the depth and range of his political and cultural commentary. Despite recurrent ill health and ever-growing political responsibilities, Tocqueville never stopped moving or learning. He wanted to understand what made political communities tick, what elite and popular mores they rested on and how they were adjusting to rapid social and economic change, the rise of democracy and the Industrial Revolution, to be sure, but also the expansion of empire and the emergence of socialism. He lauded the orderly Catholic-dominated society of Quebec, presciently diagnosed the boisterous but dangerously chauvinistic politics of Germany, considered England the freest and most unequal place on Earth, deplored the poverty he saw in Ireland and championed French colonial settlement in Algeria. Drawing on correspondence, published writings, speeches and the recollections of contemporaries, *Travels with Tocqueville: Beyond America* is a panoramic combination of biography, history and political theory that fully reflects the complex, restless mind at its center.

From pre-Columbian times to the environmental justice movements of the present, women and men frequently responded to the environment and environmental issues in profoundly different ways. Offering more than biographies of great women in environmental history, *Beyond Nature's Housekeepers* examines the intersections that shaped women's unique environmental concerns and activism and that framed the way the larger culture responded. Women featured include Native Americans, colonists, enslaved field workers, pioneers, homemakers,

municipal housekeepers immigrants hunters nature writers soil conservationists scientists migrant laborers nuclear protestors and environmental justice activists As women they fared thought and acted in ways complicated by social political and economic norms as well as issues of sexuality and childbearing Nancy C Unger reveals how women have played a unique role for better and sometimes for worse in the shaping of the American environment **Oxford Textbook of Palliative**
