The Journey's End Michael D Connelly, 2023-04-04 In the tradition of Atul Gawande's *Being Mortal* this compassionate work helps individuals develop a more accepting view of dying while teaching them what to expect and how to navigate the healthcare system at the end of life In elderhood the health care system has a narrow view of how to provide care It focuses on extending a patient's life at all costs with an over reliance on

machines and procedures instead of caring holistically for the person Accordingly many of us will likely spend our final weeks in long term care facilities or an ICU Dying at home peacefully and surrounded by family is almost impossible in our world and our fear of death is a major contributor to this impossibility Fittingly the central idea of this book is that in old age or when facing a terminal diagnosis it is more important to understand your life rather than to extend it While this may seem simple its implications are profound A natural death means accepting that at some point we are old enough or sick enough to die In our cynical and overly clinical age it is difficult to reflect on the meaning of one s life but that kind of honest introspection is exactly what we need Accordingly The Journey s End seeks to help people manage their healthcare their expectations and their decisions in the final phase of life

Hutchinson,1992 Hutchinson focuses initially on movement as concept and metaphor affirming its centrality in the conceptualization of all discursive activities He draws on an array of authors including Heraclitus Plato Longinus Rabelais Nietzsche Saussure Frances Yates Kristeva Meschonnic and Deleuze to demonstrate the motion of discourse and of those engaged in it He then turns to Cervantes novels to show how metaphors of movement and travel appearing on nearly every page dominate the conceptualization of the soul the self desire love and life processes Viewing travel as a composite of concurrent modes of experience with differing content and rhythms Hutchinson considers the concept of errancy the nature of place and the traveler s shifting relations with it and the values that travel may have as a motion displacement encounter and goal Of key importance are the means of improvisation developed en route His re examination of Bakhtin s chronotope in light of Cervante s novels reveals the dynamic character of time spaces in which travelers move He shows moreover that unlike typical Renaissance utopias the many worlds of Cervantes novels have the principles of becoming and dissolution inscribed in them Reflecting on the narrative of journeys both as memory and invention Hutchinson concludes with an examination of the relations between travel experience and travel narrative and a discussion of the whereabouts of writers and readers in Cervantes novels The narration of journeys he argues necessitates and encourages improvisatory writing
