**Journey to the Center of the Earth** Jules Verne, 2019-06-15 Journey to the Interior of the Earth is a classic science fiction novel by Jules Verne. The story involves German professor Otto Lidenbrock who believes there are volcanic tubes going toward the centre of the Earth. He and his nephew Axel and their guide Hans descend into the Icelandic volcano Snæfellsjökull encountering many adventures including prehistoric animals and natural hazards before eventually coming to the surface again in southern Italy at the Stromboli volcano. The story begins in the Lidenbrock house in Hamburg, Germany, with Professor Lidenbrock rushing home to peruse his latest purchase, an original runic manuscript of an Icelandic saga written by Snorri Sturluson, *Heimskringla*, the chronicle of the Norwegian kings who ruled over Iceland. While looking through the book, Lidenbrock and his nephew Axel find a coded note written in runic script. This is a first indication of Verne's love for cryptology. Coded, cryptic, or incomplete messages as a plot device will continue to appear in many of his works, and in each case Verne goes a long way to explain not only the code used but also the mechanisms used to retrieve the original text. Lidenbrock and Axel transliterate the runic characters into Latin letters, revealing a message written in a seemingly bizarre code. Lidenbrock attempts a decipherment, deducing the message to be a kind of transposition cipher, but his results are as meaningless as the original. Professor Lidenbrock decides to lock everyone in the house and force himself and the others, Axel and the maid Martha, to go without food until he cracks the code. Axel discovers the answer when fanning himself with the deciphered text. Lidenbrock's decipherment was correct and only needs to be read backwards to reveal sentences written in rough Latin. Axel decides to keep the secret hidden from Professor Lidenbrock, afraid of what the Professor might do with the knowledge, but after two days without food, he cannot stand the hunger and reveals the secret to his uncle. Lidenbrock translates the note, which is revealed to be a medieval note written by the fictional Icelandic alchemist Arne Saknussemm, who claims to have discovered a passage to the center of the Earth via Snæfell in Iceland.

Northern exploration was in the news and Verne was inspired to write a novel based on the premise that the center of the Earth is hollow. This annotated edition includes a biography and critical essay. *English Classics: Journey To The Center Of The Earth* Jules Verne, 2017-09-25.
