A Journey to the Centre of the Earth Jules Verne,1905 *Journey to the Center of the Earth* Jules Verne,1991-10-01 Written almost a century before the daring flights of the astronauts Jules Verne s prophetic novel of man s race to the stars is a classic adventure tale enlivened by broad satire and scientific acumen When the members of the elite Baltimore Gun Club find themselves lacking any urgent assignments at the close of the Civil War their president Impey Barbicane proposes that they build a gun big enough to launch a rocket to the moon But when Barbicane s adversary places a huge wager that the project will fail and a daring volunteer elevates the mission to a manned flight one man s dream turns into an international space race A story of rip roaring action humor and wild imagination From the Earth to the Moon is as uncanny in its accuracy and as filled with authentic detail and startling immediacy as Verne s timeless masterpieces 20 000 Leagues Under the Sea and Around the World in Eighty Days

The Purposeful Graduate Tim Clydesdale, 2015-05-06 We all know

that higher education has changed dramatically over the past two decades Historically a time of exploration and self discovery the college years have been narrowed toward an increasingly singular goal career training and college students these days forgo the big questions about who they are and how they can change the world and instead focus single mindedly on their economic survival In *The Purposeful Graduate* Tim Clydesdale elucidates just what a tremendous loss this is for our youth our universities and our future as a society At the same time he shows that it doesn't have to be this way higher education can retain its higher cultural role and students with a true sense of purpose of personal cultural and intellectual value that cannot be measured by a wage can be streaming out of every one of its institutions The key he argues is simple direct systematic and creative programs that engage undergraduates on the question of purpose Backing up his argument with rich data from a Lilly Endowment grant that funded such programs on eighty eight different campuses he shows that thoughtful engagement of the notion of vocational calling by students faculty and staff can bring rich rewards for all those involved greater intellectual development more robust community involvement and a more proactive approach to lifelong goals Nearly every institution he examines from internationally acclaimed research universities to small liberal arts colleges is a success story each designing and implementing its own program that provides students with deep resources that help them to launch flourishing lives Flying in the face of the pessimistic forecast of higher education's emaciated future Clydesdale offers a profoundly rich alternative one that can be achieved if we simply muster the courage to talk with students about who they are and what they are meant to do
