Judicial Process 4 E:

Language in the Judicial Process Judith N. Levi, Anne Graffam Walker, 2013-11-11 Legal realism is a powerful jurisprudential tradition which urges attention to social conditions and predicts their influence in the legal process. The relatively recent social science in the law phenomenon in which social research is increasingly relied on to decide court cases is a direct result of realistic jurisprudence which accords much significance in law to empirical reports about social behavior. The empirical research used by courts has not however commonly dealt with language as an influential variable. This volume of essays coedited by Judith N. Levi and Anne Graffam Walker will likely change that situation. *Language in the Judicial Process* is a superb collection of original work which fits well into the realist tradition and by focusing on language as a key variable it establishes a new and provocative perspective on the legal process. The perspective it offers and the data it presents make this volume a valuable source of information both for judges and lawyers who may be chiefly concerned with practice and for legal scholars and social scientists who do basic research about law.

American Government 4e Glen Krutz, Sylvie Waskiewicz, 2025-07-24 *American Government 4e* aligns with the topics and objectives of many government courses. The authors have worked to develop meaningful and memorable explanations, narratives, and examples regarding the workings and outputs of government. The offering focuses on the real world impact of government and presents the importance and benefits of civic engagement by students.

Ubiquitous Computing and the Internet of Things: Prerequisites for the Development of ICT Elena G. Popkova, 2019-05-15 This book gathers the outcomes of several scientific events that were organized and conducted by the Institute of Scientific Communications Volgograd, Russia, and the leading universities of the Volgograd region. The contributing authors include more than 700 scholars from various cities and regions of Russia. 124 works were selected out of 3 000 papers on the preconditions of formation, transformation, and legal provision of social institutes, topics that are in high demand in connection with a core aspect of digital modernization: the Internet of Things. The book is intended for a broad target audience including scholars of various generations and various disciplines. These include young researchers, undergraduates, and postgraduates, and recognized scholars, professors, and lecturers who study the socio-economic and legal consequences of the emergence and dissemination of digital technologies including the Internet of Things. In addition, the book will benefit all those who are interested in the development of the information society, information and telecommunication, and digital technologies. The content is divided into three logical parts, the first of which is devoted to the essence of the process of institutionalization and legal regulation of the information society. In the second part, the digital economy is analyzed in view of the spheres of the national economy. In the third, the authors study the peculiarities of state and corporate regulation, infrastructural provision, and support for the security of entrepreneurship, which are currently developing on the basis of the Internet of Things.
