Juggling Food And Feelings:

Juggling Food and Feelings Mary Elizabeth Gatta, 2002-01-01 In *Juggling Food and Feelings* Mary Gatta applies social and structuration theory to the workplace as she analyzes the emotional challenges faced by restaurant workers. Gatta utilizes extensive participatory observation of and interviews with restaurant managers and servers to explore how workers deal with emotional experience in the workplace. Positing that we ordinarily maintain an emotional balance, Gatta theorizes that our ability to cope with emotional disturbances in the workplace depends on situated rebalancing scripts used to control feelings. Contributing to the sociology of gender, social psychology, and labor theory, this study of occupations expertly reveals the complex typology of emotion management. [Handbook of the Sociology of Emotions](#) Jan Stets, Jonathan H. Turner, 2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions. Surprisingly, it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry. What makes this late date surprising is that it is now obvious that human behavior, interaction, and organization are driven by emotions. It was an immense oversight for emotions to be de-emphasized in sociological theorizing and research for most of its 175-year history. Since the 1970s, however, the study of emotions has accelerated and is now at the forefront of sociological analysis. This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions. Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions. The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs. The first section of the book addresses the range of emotions and how they can be classified: the neurological underpinnings of emotions and the effect of gender on emotions. The second section reviews the prominent sociological theories of emotions, including theories emphasizing power and status, rituals, identity, and self-psychoanalytic dynamics, exchange, expectation states, and evolution. While there is little integration among these theories, this state of affairs will not last forever. The third section addresses theory and research on specific emotions such as love, jealousy, and envy, empathy, sympathy, anger, grief, and the moral emotions. While this list does not exhaust the range of human feeling, they are central emotions that drive human behavior, interaction, and social organization. The last section explores how the study of emotions has added new insight into other subfields within sociology, such as the study of the workplace, health, and social movements. These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology. Although no book can completely cover a field, even a relatively new one like the sociology of emotions, this *Handbook of the Sociology of Emotions* comes close to being comprehensive. The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years.

Mary Gatta,2018-10-02 America is witnessing a retirement crisis As the labor market shifts to the gig economy and new strains restrict social security the American Dream of secure retirement becomes further out of reach for up to half of the population In *Waiting on Retirement* Mary Gatta takes the case of restaurant workers to examine the experiences of low wage workers who are middle aged aging and past retirement age She deftly explores the many factors shaping what it means to grow old in economic insecurity as her subjects face race and gender based inequities health hazards associated with their work and the bitter reality that the older they get the fewer professional opportunities are available to them More importantly Gatta demonstrates that these problems are pervasive as more industries adopt the worst workplace practices of service work In light of these trends we must consider the devastating effects on already vulnerable Americans because as Gatta contends this crisis does not need to be inevitable Taking as a model the small percentage of good restaurant jobs that exist she ultimately offers incisive commentary on what can be done to stave off this bleak future

The Restaurants
