With companies actively marketing products and services beyond their borders marketers must understand culturally ingrained consumer behavior throughout the world Focusing on psychological and social dimensions of these behaviors this textbook brings together academic research and contemporary case studies from marketing practice Built on a strong cross disciplinary theoretical foundation and extensive practice experience this concisely written text is a practical guide to understanding the intricacies of cultural influence on consumption and for the design and implementation of effective intercultural marketing strategies focused on branding and promotion The book uses representative well known corporate cases while also including dynamic examples from the sharing economy blockchain and emerging economy companies

Incorporating strategy sociology linguistics cross cultural communications psychology philosophy religious studies and economics the book is particularly distinguished from the mainstream by introducing non Western frameworks Upper level undergraduate and postgraduate students of marketing and international business will benefit from the book s new concepts and novel methods as well as clear objectives examples and discussion topics in each chapter Instructors will appreciate the inclusion of a semester long project for students allowing them to wear the practitioner s hat and including practice in a netnographic research method *The Achehnese* C Snouck Hurgronje,2024-09-16 **Stranger's Knowledge** Xavier Marquez,2012-06-07 The Statesman is a difficult and puzzling Platonic dialogue In A Stranger s Knowledge Marquez argues that Plato abandons here the classic idea prominent in the Republic that the philosopher qua philosopher is qualified to rule Instead the dialogue presents the statesman as different from the philosopher the possessor of a specialist expertise that cannot be reduced to philosophy The expertise is of how to make a city resilient against internal and external conflict in light of the imperfect sociality of human beings and the poverty of their reason This expertise however cannot be produced on demand one cannot train statesmen like one might train carpenters Worse it cannot be made acceptable to the citizens or operate in ways that are not deeply destructive to the city s stability Even as the political community requires his knowledge for its preservation the genuine statesman must remain a stranger to the city Marquez shows how this impasse is the key to understanding the ambiguous reevaluation of the rule of law that is the most striking feature of the political philosophy of the Statesman The law appears here as a mere approximation of the expertise of the inevitably absent statesman dim images and static snapshots of the clear and dynamic expertise required to steer the ship of state across the storms of the political world Yet such laws even when they are not created by genuine statesmen can often provide the city with a limited form of cognitive capital that enables it to preserve itself in the long run so long as citizens and especially leaders retain a philosophical attitude towards them It is only when rulers know that they do not know better than the laws what is just or good and yet want to know what is just and good that the city can be preserved The dialogue is thus in a sense the vindication of the philosopher king in the absence of genuine political knowledge **The Australian Journal** ,1867
