Lets Get Lost Adventures In The Great Wide Open:

Pearl Harbor Craig Nelson, 2017-08 A valuable reexamination Booklist starred review of the event that changed twentieth century America Pearl Harbor based on years of research and new information uncovered by a New York Times bestselling author The America we live in today was born not on July 4 1776 but on December 7 1941 when an armada of 354 Japanese warplanes supported by aircraft carriers destroyers and midget submarines suddenly and savagely attacked the United States killing 2 403 men and forced America's entry into World War II Pearl Harbor From Infamy to Greatness follows the sailors soldiers pilots diplomats admirals generals emperor and president as they engineer fight and react to this stunningly dramatic moment in world history Beginning in 1914 bestselling author Craig Nelson maps the road to war when Franklin D Roosevelt then the Assistant Secretary of the Navy attended the laying of the keel of the USS Arizona at the Brooklyn Navy Yard Writing with vivid intimacy Nelson traces Japan's leaders as they lurch into ultranationalist fascism which culminates in their scheme to terrify America with one of the boldest attacks ever waged Within seconds the country would never be the same Backed by a research team's five years of work as well as Nelson's thorough re-examination of the original evidence assembled by federal investigators this page turning and definitive work weaves archival research interviews and personal experiences from both sides into a blow by blow narrative of destruction liberally sprinkled with individual heroism bizarre escapes and equally bizarre tragedies Kirkus Reviews Nelson delivers all the terror chaos violence tragedy and heroism of the attack in stunning detail and offers surprising conclusions about the tragedy's unforeseen and resonant consequences that linger even today

The Age of Radiance Craig Nelson, 2014-03-25 Radiation is a complex and paradoxical concept staggering amounts of energy flow from seemingly inert rock and that energy is both useful and dangerous While nuclear energy affects our everyday lives from nuclear medicine and food irradiation to microwave technology its invisible rays trigger biological damage birth defects and cellular mayhem From the end of the nineteenth century through the use of the atomic bomb in World War II to the twenty first century's confrontation with the dangers of nuclear power Craig Nelson illuminates a pageant of fascinating historical figures Enrico Fermi Marie and Pierre Curie Albert Einstein FDR Robert Oppenheimer and Ronald Reagan among others He reveals many little known details including how Jewish refugees fleeing Hitler transformed America from a country that created light bulbs and telephones into one that split atoms how the most grotesque weapon ever invented could realize Alfred Nobel's lifelong dream of global peace how emergency workers and low level utility employees fought to contain a run amok nuclear reactor while wondering if they would live or die Brilliantly fascinating and remarkably accessible *The Age of Radiance* traces mankind's complicated and difficult relationship with the dangerous power it discovered and made part of civilization

V Is For Victory Craig Nelson, 2023-05-23 Historian Craig Nelson reveals how FDR confronted an American public disinterested in going to war in Europe skillfully won their support and pushed government and American industry to build the greatest war machine in history the arsenal of democracy that

won World War II As Nazi Germany began to conquer Europe America's military was unprepared too small and poorly supplied The Nazis were supported by robust German factories that created a seemingly endless flow of arms trucks tanks airplanes and submarines The United States emerging from the Great Depression was skeptical of American involvement in Europe and not ready to wage war Hardened isolationists predicted disaster if the country went to war In this fascinating and deeply researched account Craig Nelson traces how Franklin D Roosevelt steadily and sometimes secretly put America on a war footing by convincing America's top industrialists such as Henry Ford Jr to retool their factories by diverting the country's supplies of raw materials to the war effort and above all by convincing the American people to endure shortages to work in wartime factories and to send their sons into harm's way Within a few years the nation's workers were producing thousands of airplanes and tanks hundreds of warships and submarines Under FDR's resolute leadership victory at land and sea and air across the globe began at home in America a powerful and essential narrative largely overlooked in conventional histories of the war but which in Nelson's skilled authoritative hands becomes an illuminating and important work destined to become an American history classic

Let's Get Lost Craig Nelson,2000-06-01 Craig Nelson has experienced places most people only dream about He has walked the Great Wall of China taught New Guinea cannibals how to dance communed with a sign language speaking orangutan in Borneo gotten into an altercation with the People's Liberation Army in Tiananmen Square and taken psychoactive pharmaceuticals with a male witch in the depths of the Amazon jungle In this vastly entertaining often hilarious and sometimes poignant book he shares his global jaunts and haunts with armchair travelers everywhere
