The Embodied Performance of Gender Jack Migdalek, 2014-10-24 Norms of embodied behaviour for males and females as promoted in mainstream Western public arenas of popular culture and the everyday continue to work overtly and covertly as definitive and restrictive barriers to the realm of possibilities of embodied gender expression and appreciation They serve to disempower and marginalize those not inclined to embody according to such dichotomous models This book explores the ramifications of the way our gendered sexed and culturally constructed bodies are situated toward notions of difference and highlights the need to safeguard the social and emotional well being of those who do not fit comfortably with dominant norms of masculine feminine behaviour as deemed appropriate to biological sex The book interrogates gender inequitable machinations of education and performance arts disciplines by which educators and arts practitioners train teach choreograph and direct those with whom they work and theorizes ways of broadening personal and social notions of possible aesthetic and acceptable embodiment for all persons regardless of biological sex or sexual

orientation The author's own struggles as a performance artist educator and person in the everyday as well as the findings of empirical fieldwork with educators performance arts practitioners and high school students are employed to illustrate and advocate the need for self reflexive scrutiny of existing and hidden inequities regarding the embodiment of gender within one's own habitual perspectives taste and practices

Classify

and Label Matt L. Drabek, 2014-10-15 *Classify and Label: The Unintended Marginalization of Social Groups* is a philosophical treatment of classification in the social sciences and everyday life focusing on moral social and political implications. The use of labels is essential to how people navigate and understand the world. Classifications and labels also have a dark side as they may unintentionally misrepresent groups and individuals. These misrepresentations disrupt how people think about themselves and how they treat others, sometimes leading to marginalization. Matt L. Drabek analyzes classification by considering rich case studies across a variety of domains including the classification of gender and sexual orientation, the psychiatric classification of sadomasochism and gender disorders, and the classification of people in everyday life through the production of pornography and use of gender identities. This broad sample reveals deep connections between the classifications proposed by social scientists and the classifications used by society at large. Drabek explores how classifications evolve from and eventually affect such seemingly disconnected issues as the situation of underrepresented groups in academia, new models of parenting and the family, the nature of sexual orientation, and the nature of scientific bias.

Women and Dance Christy Adair, 1992-10-27 A broad-ranging account of women's roles and experience in dance which demolishes the myth that dance is a female art form by demonstrating the way in which it is dominated by male managers, choreographers, and directors. While most dancers are women, for the most part they interpret male-constructed images rather than create their own. This is not inevitable, however; the author argues dance is a possible arena for feminist practice and women's liberation.

Women without Men Willy Jansen, 2023-11-27 **A Body of Writing, 1990-1999** Bronwyn Davies, 2000-02-09 Weaving together her most influential writings of the 1990s, Bronwyn Davies offers a unique engagement with poststructuralism that defies the boundaries between theory and embodied practice. Whereas poststructuralists are often accused of excessive abstraction, Davies' sophisticated and nuanced discussions of subjectivity, agency, epistemology, feminism, and power are embedded in vital depictions of lived experience and empirical research. A renowned scholar of education and gender formation, Davies shows the importance of poststructural perspectives for her own research in classrooms, on playgrounds, with literary texts, and her own life history. Lucid prose, accessible for students and refreshing for researchers and theorists alike, makes poststructural concepts usable as conceptual frameworks for interpreting and analyzing the social world.
