Dr Space Junk vs The Universe Alice Gorman, 2020-11-10 A pioneering space archaeologist explores artifacts left behind in space and on Earth from moon dust to Elon Musk's red sports car Alice Gorman is a space archaeologist she examines the artifacts of human encounters with space These objects left behind on Earth and in space can be massive dead satellites in eternal orbit or tiny discarded zip ties around a defunct space antenna They can be bold an American flag on the moon or hopeful messages from Earth sent into deep space They raise interesting questions Why did Elon Musk feel compelled to send a red Tesla into space What accounts for the multiple rocket themed playgrounds constructed after the Russians launched Sputnik Gorman affectionately known as Dr Space Junk takes readers on a journey through the solar system and beyond deploying space artifacts historical explorations and even the occasional cocktail recipe in search of the ways that we make space meaningful Engaging and erudite Gorman recounts her background as a non-space archaeologist and how she became interested in space artifacts She shows us her own piece of space junk a fragment of the fuel tank insulation from Skylab the NASA spacecraft that crash landed in Western Australia in 1979 She explains that the conventional view of the space race as the triumph of the white male American astronaut seems inadequate what really interests her she says is how everyday people engage with space To an archaeologist objects from the past are significant because they remind us of what we might want to hold on to in the future
