Health Care - Vital Theories and Research Gørill Haugan,Monica Eriksson,2021-03-11 This open access textbook represents a vital contribution to global health education offering insights into health promotion as part of patient care for bachelor s and master s students in health care nurses occupational therapists physiotherapists radiotherapists social care workers etc as well as health care professionals and providing an overview of the field of health science and health promotion for PhD students and researchers Written by leading experts from seven countries in Europe America Africa and Asia it first discusses the theory of health promotion and vital concepts It then presents updated evidence based health promotion approaches in different populations people with chronic diseases cancer heart failure dementia mental disorders long term ICU patients elderly individuals families with newborn babies palliative care patients and examines different health promotion approaches integrated into primary care services This edited scientific anthology provides much needed knowledge translating research into guidelines for practice Today s medical approaches are highly developed however patients are human beings with a wholeness of body mind spirit As such providing high quality and effective health care requires a holistic physical psychological social spiritual model of health care is required A great number of patients both in hospitals and in primary health care suffer from the lack of a holistic oriented health approach Their condition is treated but they feel scared helpless and lonely Health promotion focuses on improving people s health in spite of illnesses Accordingly

health care that supports promotes patients health by identifying their health resources will result in better patient outcomes shorter hospital stays less re hospitalization being better able to cope at home and improved well being which in turn lead to lower health care costs This scientific anthology is the first of its kind in that it connects health promotion with the salutogenic theory of health throughout the chapters the authors here expand the understanding of health promotion beyond health protection and disease prevention The book focuses on describing and explaining salutogenesis as an umbrella concept not only as the key concept of sense of coherence *United States Congressional Serial Set, Serial No. 15004, Senate Reports Nos. 26-35 , Barriers to Health Care for Older Americans United States. Congress. Senate. Special Committee on Aging. Subcommittee on Health of the Elderly,1973 Fragmented: A Doctor's Quest to Piece Together American Health Care Ilana Yurkiewicz MD,2023-07-11 An award winning physician writer exposes how pervasive cracks in the health care system cost us time energy and lives and how we can fix them There s an unspoken assumption when we go to see a doctor the doctor knows our medical story and is making decisions based on that story But reality frequently falls short Medical records vanish when we switch doctors Critical details of life saving treatment plans get lost in muddled electronic charts The doctors we see change according to specialty hospital shifts or an insurer s whims Physician Ilana Yurkiewicz calls this phenomenon fragmentation and she argues it s the central failure of health care today In this gripping narrative from medicine s front lines Yurkiewicz reveals how a system that doesn t talk to itself puts insupportable burdens on physicians patients and caregivers forcing them to heroic lengths to hold the pieces together barely The stories she tells are at once harrowing and commonplace A patient narrowly averts an unnecessary invasive heart procedure by producing a worn rhythm strip he has carried in his pocket for a decade A man diagnosed with leukemia while visiting from abroad has thirty one physicians but no one he can call his doctor with tragic consequences When Yurkiewicz s own father falls ill a culture that incentivizes health care providers to react with quick fixes to the problems immediately before them often to the neglect of a patient s overall narrative leads to weeks of additional suffering and a risky hospital transfer The system is hanging by a thread and we need better solutions Yurkiewicz issues a clear eyed call for change naming concrete reforms doctors and policymakers can make and empowering patients and their loved ones to advocate for themselves in the meantime Urgent radiantly humane and ultimately hopeful *Fragmented* a prescription for what really needs fixing in modern medicine Better Access to Affordable Health Care United States.
