Faces Of London :

Faces of London Karen Hay-Lacey, Andy Price Lacey, 1989 *Seven Faces of London* Krishan Chandar, 1968 **Faces Inside and Outside the Clinic** Tony McHugh, 2016-04-15 Drawing on studies of surface topography image editing and diagnostic and surgical experience *Faces Inside and Outside the Clinic* addresses the notion of truth in what are considered to be right and wrong faces whether in clinical cosmetic procedures or in specific sociocultural contexts outside the clinic With attention to the manner in which the human face and often the individual herself or himself as a consequence is physically defined conceptually judged numerically measured and clinically analysed this book reveals that on closer inspection supposedly objective and evidential truths are in fact subjective and prescriptive Adopting a Foucauldian analysis of the ways in which normalising technologies and techniques ultimately preserve and expand upon an increasing array of abnormal facial configurations *Faces Inside and Outside the Clinic* shows that when determining right and wrong faces what happens inside the clinic is inextricably linked to what happens outside the clinic and vice versa As such it will be of interest to scholars and students of social cultural and political theory contemporary philosophy and the social scientific study of science health and technology **The Human Face** Mary Katsikitis, 2012-12-06 James W Pennebaker The University of Texas at Austin At first glance a scientific book on the face doesn't make a great deal of sense After all the face is not a biological unit that falls into a specific medical specialty By the same token it is not part of a specific clear functional system that falls within the purview subdiscipline of psychology philosophy sociology or any other traditional area It seems that the only organizing principle of the face is that all humans have one and that it is central to the experience of being human As a social stimulus the face can signal emotions personality sex physical and mental health social status age and aspects of our thoughts intentions and our inner selves At various points in our lives we spend a tremendous amount of time and money for cosmetics cleansers medicines and occasionally surgery to enhance our face In the same way that a normative symmetrical face can attract praise and even adoration damage to the face through birth defects disease or injury is almost always stigmatizing Our faces then are social advertisements for who we are **Recognising Faces** Vicki Bruce, 2017-03-31 Each of us is able to recognise the faces of many hundreds if not thousands of people known to us We recognise faces despite seeing them in different views and with changing expressions From these varying patterns we somehow extract the invariant characteristics of an individual's face and usually remember why a face seems familiar recalling where we know the person from and what they are called In this book originally published in 1988 the author describes the progress which has been made by psychologists towards understanding these perceptual and cognitive processes and points to theoretical directions which may prove important in the future Though emphasising theory the book also addresses practical problems of eyewitness testimony and discusses the relationship between recognising faces and other aspects of face processing such as perceiving expressions and lipreading The book was aimed primarily at a research audience but would also interest advanced

The Neuropsychology of Face Perception and Facial Expression

Raymond Bruyer, 2014-04-04 This book is the first to offer an overview of the increasingly studied field of face perception

Experimental and pathological dissociation methods are used to understand both the precise cognitive mechanisms and the cerebral functions involved in face perception Three main areas of investigation are discussed face processing after brain damage lateral differences for face processing in normals neuropsychological studies on facial expressions Perception of

Faces, Objects, and Scenes Mary A. Peterson, Gillian Rhodes, 2003 From a barrage of photons we readily and effortlessly recognize the faces of our friends and the familiar objects and scenes around us However these tasks cannot be simple for our visual systems faces are all extremely similar as visual patterns and objects look quite different when viewed from different viewpoints How do our visual systems solve these problems The contributors to this volume seek to answer this question by exploring how analytic and holistic processes contribute to our perception of faces objects and scenes The role of parts and wholes in perception has been studied for a century beginning with the debate between Structuralists who championed the role of elements and Gestalt psychologists who argued that the whole was different from the sum of its parts This is the first volume to focus on the current state of the debate on parts versus wholes as it exists in the field of visual perception by bringing together the views of the leading researchers Too frequently researchers work in only one domain so they are unaware of the ways in which holistic and analytic processing are defined in different areas The contributors to this volume ask what analytic and holistic processes are like whether they contribute differently to the perception of faces objects and scenes whether different cognitive and neural mechanisms code holistic and analytic information whether a single universal system can be sufficient for visual information processing and whether our subjective experience of holistic perception might be nothing more than a compelling illusion The result is a snapshot of the current thinking on how the processing of wholes and parts contributes to our remarkable ability to recognize faces objects and scenes and an illustration of the diverse conceptions of analytic and holistic processing that currently coexist and the variety of approaches that have been brought to bear on the issues Handbook of Research on Face Processing A.W. Young, H.D. Ellis, 2013-10-22 The high

degree of scientific interest in face processing is readily understandable since people's faces provide such a wealth of social information Moreover investigations have produced evidence of highly precocious face processing abilities in infants and of neural mechanisms in adults that seem to be differentially involved in face perception Such findings demonstrate that as one might expect the psychological importance of the face has clear biological underpinnings There are also urgent practical reasons for wanting to understand face processing The most extensively investigated of these involve forensic issues Other applications include the development of automated recognition systems for security and other purposes and understanding and rehabilitating disorders and impairments linked to brain injuries and psychiatric conditions Current studies of face processing are grouped in the volume into eleven topic areas For each area the editors approached an acknowledged

authority and commissioned a review chapter summarising the findings that have been made These chapters were then circulated to other experts who were asked to write brief commentaries that developed theoretical or empirical points of importance to each area In this way a balanced coverage of each topic is achieved The book begins with a section examining the evidence suggesting that there may be something special about face processing This is followed by consideration of the face as a visual pattern Then there are four sections dealing with major uses of facial information followed by sections discussing the development of face processing abilities and the neural mechanisms involved The last three sections of the book deal with topics for which there are important practical applications for the studies reported **1751 to C. 1760**

,1877 *Hubbub* Emily Cockayne,2008-04-01 A not for the squeamish journey back through the centuries to urban England where the streets are crowded noisy filthy and reeking of smoke and decay Modern city dwellers suffer their share of unpleasant experiences traffic jams noisy neighbors pollution food scares but urban nuisances of the past existed on a different scale entirely this book explains in vivid detail Focusing on offenses to the eyes ears noses taste buds and skin of inhabitants of England s pre Industrial Revolution cities Hubbub transports us to a world in which residents were scarred by smallpox refuse rotted in the streets pigs and dogs roamed free and food hygiene consisted of little more than spit and polish Through the stories of a large cast of characters from varied walks of life the book compares what daily life was like in different cities across England from 1600 to 1770 Using a vast array of sources from novels to records of urban administration to diaries Emily Cockayne populates her book with anecdotes from the quirky lives of the famous and the obscure all of whom confronted urban nuisances and physical ailments Each chapter addresses an unpleasant aspect of city life noise violence moldy food smelly streets poor air quality and the volume is enhanced with a rich array of illustrations Awakening both our senses and our imaginations Cockayne creates a nuanced portrait of early modern English city life unparalleled in breadth and unforgettable in detail **An Alphabetical Dictionary of Coats of Arms Belonging to Families in Great Britain and Ireland** John Woody Papworth,1874

Adrian Frutiger - Typefaces Heidrun Osterer,Philipp Stamm,2021-04-06 The Swiss type designer Adrian Frutiger decisively influenced the international creation of typefaces after 1950 His Univers typeface and the machine readable font OCR B are milestones as is his type for the Paris airports which evolved into the Frutiger typeface All set new standards for signage types In all he created some fifty types including Ondine M ridien Avenir and Vectora Based on conversations with Frutiger himself and on extensive research this publication provides a highly detailed and accurate account of the type designer s artistic development All of his types from the design phase to the marketing stage are illustrated and analyzed with reference to the technology and related types Hitherto unpublished types that were never realized and more than one hundred logos complete the picture **Jack Lindsay** Anne Cranny-Francis,2023-11-26 This book offers an in depth analysis of the work of prolific writer activist and publisher Jack Lindsay 1900 1990 It maps the development of his ideas across the twentieth century by reference to the five

British writers about whom he published major studies William Blake John Bunyan Charles Dickens George Meredith and William Morris At the same time it maps the formation through the twentieth century of Left cultural politics which Lindsay repeatedly anticipated in areas such as the fundamental interconnectedness of human beings and the natural world the formative role of culture in both social and individual being the crucial role of the senses in embodied being and the rejection of mind body dualism Through his analysis Lindsay foretold both the social alienation and the environmental degradation that characterise the beginning of the twenty first century while his interdisciplinary research and transdisciplinary analysis provide models for how we might address these critical concerns

Cognitive and Computational Aspects of Face

Recognition Tim Valentine, 2017-04-07 How can computers recognize faces Why are caricatures of famous faces so easily recognized Originally published in 1995 much of the previous research on face recognition had been phenomena driven Recent empirical work together with the application of computational mathematical and statistical techniques have provided new ways of conceptualizing the information available in faces These advances have led researchers to suggest that many phenomena can be explained by the structure of the information available in the population s of faces This broad approach has drawn together a number of apparently disparate phenomena with a common theoretical basis including cross race recognition the distinctiveness of faces the production and recognition of caricatures and the determinants of facial attractiveness This title provides a state of the art review of the field at the time in which the authors use a wide variety of approaches What is common to all is that the authors base the accounts of the phenomena they study or their model of face recognition on the statistics of the information available in the population of faces On publication this title was a comprehensive up to date review of an important area of research in face recognition written by active researchers It includes contributions from mathematics computer science and neural network theory as well as psychology It is aimed at research workers and postgraduate students and will be of interest to cognitive psychologists and computer scientists interested in face recognition It will also be of interest to those working on neural network models of visual recognition perceptual development expertise in visual cognition as well as facial attractiveness and caricature

Perspectives on

Cognitive Neuropsychology G. Denes, C. Semenza, P. Bisiacchi, 2018-10-03 Originally published in 1988 neuropsychology had evolved considerably in the decade prior to publication Methods of research had changed new topics of interests had emerged and there had also been an ongoing debate as to the objectives of the field This evolution had most radically affected the study of cognitive disorders an area that had developed particularly rapidly in the years before and that ultimately became a field of inquiry in its own right that of cognitive neuropsychology The contributors to this volume all share a fascination with the new perspectives for understanding how the mind works that have arisen from the study of impaired cognition Yet and this was very characteristic of the state of the art in cognitive neuropsychology at the time they disagreed on many important issues even those pertaining to the most basic assumptions of their discipline Therefore the

first part of this book is devoted to an attempt to define and clarify these basic issues and to the confrontation of alternative views The remaining parts present original studies on several topics of particular interest in cognitive neuropsychology

Guinea Pig Club Emily Mayhew, 2018-09-30 This book speaks to two of the most diametrically opposed yet mutually supportive aspects of war the ability to inflict horrific injury and the ability to heal Mayhew is to be commended on an outstanding addition to expanding our knowledge of an area rarely discussed by historians Her book should be mandatory reading for all defence members both civilian and military and on everyone's history shelf This book is highly recommended Airforce Magazine The history of the Guinea Pig Club the band of airmen who were seriously burned in aeroplane fires is a truly inspiring spine tingling tale Plastic surgery was in its infancy before the Second World War The most rudimentary techniques were only known to a few surgeons worldwide The Allies were tremendously fortunate in having the maverick surgeon Archibald McIndoe nicknamed the Boss or the Maestro operating at a small hospital in East Grinstead in the south of England McIndoe constructed a medical infrastructure from scratch After arguing with his superiors he set up a revolutionary new treatment regime Uniquely concerned with the social environment or holistic care McIndoe also enlisted the help of the local civilian population He rightly secured his group of patients dubbed the Guinea Pig Club an honoured place in society as heroes of Britain's war For the first time official records have been used to explain fully how and why this remarkable relationship developed between the Guinea Pig Club the RAF and the Home Front First person recollections bring to life the heroism of the airmen with incredible clarity This is a revised and expanded edition with new material including a foreword by HRH Prince Harry published to tie in with a major new film expected to be released in late 2018

Psychological Issues in Eyewitness Identification Siegfried L. Sporer, Roy S. Malpass, Guenter Koehnken, 2014-06-03 Why do police officers investigators prosecutors judges and others with an interest in eliciting accurate memory based testimony need to inform themselves of the research literature in experimental psychology that addresses the question of witness memory The answer is straightforward from the perspective of a simple cost benefit analysis As with so many matters in the administration of public funds effectiveness holds important rewards Those who investigate crimes and decide which line of investigation to pursue and which line to postpone or set aside necessarily make judgments about the likely guilt of suspects based on the information at hand If they can make these judgments with a high degree of accuracy everyone benefits For many cases eyewitness identification is an important component of evidence prosecution and plea negotiation If witness identification is correctly implemented investigators and prosecutors can make their judgments effectively and focus their resources more efficiently A major component of effectiveness requires avoiding expending scarce resources on erroneous prosecutions It is in everyone's interest to make the best use of the memory of witnesses to preserve it without changing it to render it maximally accessible to provide an environment in which witnesses feel free to report their recollections and to accurately assess the probable validity of the witness's report regardless of the witness's certainty or doubts about its

accuracy This volume gathers evidence from various research domains on eyewitness testimony Although many of the studies discussed deal with eyewitness identification it is noteworthy that many of them also touch upon other areas of concern to eyewitness researchers including chapters on voice recognition by humans and computers with particularly detailed instructions on conducting voice lineup differential aspects of recognition memory in children elderly eyewitness memory problems of cross racial identification psychological aspects of facial image reconstruction techniques person descriptions particular benefits of reinstating context as a means to improve eyewitness memory problems associated with various research paradigms in the eyewitness arena and recommendations on how to conduct lineups and photospreads and their proper evaluation Differentiated from other literature on this topic by its non technical language and accessibility to non professionals this volume covers a great deal of ground raises a host of questions settles some others and points the way to more effective use and evaluation of what eyewitnesses have to say

The Beautiful Burial in Roman Egypt Christina Riggs,2006-01-06 This important new study looks at the intersection of Greek and Egyptian art forms in the funerary sphere of Roman Egypt A discussion of artistic change cultural identity and religious belief foregrounds the detailed analysis of more than 150 objects and tombs many of which are presented here for the first time In addition to the information it provides about individual works of art supported by catalogue entries the study explores fundamental questions such as how artists combine the iconographies and representational forms of different visual traditions and why two distinct visual traditions were employed in Roman Egypt

Aspects of Face Processing H.D. Ellis,Malcolm A. Jeeves,Freda Newcombe,Andy Young,2012-12-06 Proceedings of the NATO Advanced Research Workshop Aberdeen Scotland U K June 29 July 4 1985

Visual Cognition Glyn W. Humphreys,Vicki Bruce,2021-12-24 Vision allows us to do many things It enables us to perceive a world composed of meaningful objects and events It enables us to track those events as they take place in front of our eyes It enables us to read It provides accurate spatial information for actions such as reaching for or avoiding objects It provides colour and texture that can help us to separate objects from their background and so forth This book is concerned with understanding the processes that allow us to carry out these various visually driven behaviours In the past ten years our understanding of visual processing has undergone a rapid change primarily fostered by the convergence of computational experimental and neuropsychological work on the topic Visual Cognition provides the first major attempt to cover all aspects of this work within a single text It provides a summary of research on visual information processing relevant to advanced undergraduates postgraduates and research workers It covers seeing static forms object recognition dynamic vision motion perception and visual masking visual attention visual memory visual aspects of reading For each topic the relevant computational experimental and neuropsychological work is integrated to provide a broader coverage than that of other texts
