Shared Agency Michael Bratman, 2014 Human beings act together in characteristic ways that matter to us a great deal This book explores the conceptual metaphysical and normative foundations of such sociality It argues that appeal to the planning structures involved in our individual temporally extended agency provides substantial resources for understanding these foundations of our sociality

Face Politics Jenny Edkins, 2015-04-10 The face is central to contemporary politics In Deleuze and Guattari s work on faciality we find an assertion that the face is a particular politics

and dismantling the face is also a politics This book explores the politics of such diverse issues as images and faces in photographs and portraits expressive faces psychology and neuroscience face recognition face blindness facial injury disfigurement and face transplants through questions such as What it might mean to dismantle the face and what politics this might entail in practical terms What sort of a politics is it Is it already taking place Is it a politics that is to be desired a better politics a progressive politics The book opens up a vast field of further research that needs to be taken forward to begin to address the politics of the face more fully and to elaborate the alternative forms of personhood and politics that dismantling the face opens to view The book will be agenda setting for scholars located in the field of international politics in particular but cognate areas as well who want to pursue the implications of face politics for the crucial questions of subjectivity sovereignty and personhood

Shared and Institutional Agency Michael Bratman, 2022 Our human lives involve remarkable forms of practical organization diachronic organization of individual activity small scale organization of shared action and the organization of institutions In this book Michael Bratman argues that the key to these multiple inter related forms of human practical organization is our capacity for planning agency Drawing on earlier work on the roles of planning agency in our human cross temporal and small scale social organization it focuses on the role of planning agency within our organized institutions whether a religious congregation a small business a professional association a city council a university a non profit organization a corporation a political party a legal system or a democratic state *Shared and Institutional Agency* draws on ideas inspired by H L A Hart that our organized institutions are rule guided and that to understand this we need a theory of social rules This book develops a planning theory of social rules and puts forth an organized institution as involving authority according social rules of procedure This supports a model of organized institutions that makes room for pluralistic divergence and leads to a model of institutional intention and institutional intentional agency The view that emerges sees our capacity for planning agency as a core capacity that underlies not only string quartets and informal social rules but also the rule guided structure of organized institutions and institutional agency

Structures of Agency Michael E. Bratman, 2007-01-04 This is a collection of published and unpublished essays by distinguished philosopher Michael E Bratman of Stanford University They revolve around his influential theory known as the planning theory of intention and agency Bratman's primary concern is with what he calls strong forms of human agency including forms of human agency that are the target of our talk about self determination self government and autonomy These essays are unified and cohesive in theme and will be of interest to philosophers in ethics and metaphysics

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy action theory which concerns the nature of motivation for human action and praxiology the study of human action By bringing different perspectives together the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action The volume consists of three main parts The first part *Reasons for Action* bridges the gap between reasons for action theories and

praxiology The second part of the volume titled Theories of Action explores philosophical approaches to action Finally in the third part Applications the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment solving action incompleteness and knowledge management The ultimate goal of this volume is to broaden the scientific view of action to establish a perspective on action that is permeated by moral theories on the one hand and accounts focused on efficiency and economy of action on the other hand This work is the newest volume in Transaction s Praxiology series

They Shimmer Within: Cognitive-Evolutionary Perspectives on Visionary Beings Bruce Rimell,2018-01-19 The use of psychedelic drugs plants is rising and with it the number of reports narrating encounters with otherworldly visionary beings Approaches to these experiences have often been literal archetypal or dismissive Evolutionary psychology and the cognitive science of religion suggest innate and non imagistic mental foundations for these phenomena arising from easily triggered evolutionary functions during emotive periods of high cognitive demand Such functions include agent detection social intelligence faculties and metacognition This wide ranging book explores how our deepest mental processes predispose us as humans to believe in supernatural agents and presents a new hypothesis of how these same cognitions facilitate the emergence of those agents to become present when psychedelic drugs and plants are ingested Bruce concludes

that visionary beings shimmer within as awe inspiring products of the mind an experience which rests at the heart of what it is to be human Reasons and Intentions Bruno Verbeek,2016-12-05 There are a number of problems in philosophy that seem to share a similar possible solution Why do promises and contracts bind Why ought citizens and judges obey the law and Can we realize the gains to be made from cooperation All three problems as well as some others share a possible solution in the form of rational internal commitment Reasons and Intentions is a state of the art overview of the relevant positions on the possibility of such commitment including critical ones The introduction provides a survey of the central problem of the volume how the will can bind itself and still be instrumental in nature and the various positions which are further examined in the contributions Addressing the question of the relation between intentions and action the considerations which make an intention rational and how this translates into our conception of moral agency this book brings together specially commissioned essays by the leading scholars in the field **Proceedings of the 3rd Annual Conference of Education and Social Sciences (ACCESS 2021)** Amrullah Amrullah,Lovy Herayanti,Tesha Sengupta-Irving,Yeo Sook Fern,Fathoroni

Planning, Time, and Self-Governance Michael E. Bratman, 2018-06-01 Our human capacity for planning agency plays central roles in the cross temporal organization of our agency in our acting and thinking together both at a time and over time and in our self governance both at a time and over time Intentions can be understood as states in such a planning system The practical thinking at the bottom of this planning capacity is guided by norms that enjoin synchronic plan consistency and means end coherence as well as forms of plan stability over time The essays in this book aim to deepen our understanding of these norms and to defend their status as norms of practical rationality for planning agents The general guidance by these planning norms has many pragmatic benefits especially given our cognitive and epistemic limits But appeal to these general pragmatic benefits does not fully explain the normative force of these norms in the particular case In response to this challenge some think these norms are at bottom norms of theoretical rationality on one s beliefs some think these norms are constitutive of intentional agency some think they are norms of interpretation and some think the idea of such norms of practical rationality is a myth These essays chart an alternative path This path sees these planning norms as tracking conditions of a planning agent s self governance both at a time and over time It seeks associated models of such self governance And it appeals to the idea that the end of one s self governance over time while not essential to intentional agency per se is within the planning framework rationally self sustaining and a keystone of a rationally stable reflective equilibrium that involves the norms of plan rationality This end is thereby in a position to play a role in our planning framework that parallels the role of a concern with quality of will within the framework of the reactive emotions as understood by Peter Strawson
