Maggi Savin-Baden, John Reader, 2022-09-01 This book is about the relationships between technologies and the content of religious belief and practice A number of models are now starting to emerge but each of these depends on the theological or philosophical framework within which the debate is set At the same time there are dilemmas operating at different ends of the spectrum For example at one end there is a tendency towards subsuming the digital within the divine and at the other an instrumental stance relating to how technology is deployed Either of these stances could be said to ignore rather than acknowledge that the human itself is being changed as a result of the interactions with the digital The book explores the following areas Where is God to be found or present in the postdigital condition What are the implications of the postdigital

condition for spirituality and indeed for the activity of God through the Holy Spirit How do concepts of transhumanism or posthumanism effect understandings of the incarnation Does the doctrine of the Trinity need revisiting in the light of the digital as medium of relationship Does Creation now include the postdigital What of the Kingdom of God now that the kingdom of the Tech giants is so powerful all consuming Assembling Futures Jennifer Quigley, Catherine Keller, 2024-08-20 Transdisciplinary insights at the intersection of religion democracy ecology and economy What is the relationship of religion to economy ecology and democracy In our fraught moment what critical questions of religion may help to assemble democratic processes ecosystems and economic structures differently What possible futures might emerge from transdisciplinary work across these traditionally siloed scholarly areas of interest The essays in Assembling Futures reflect scholarly conversations among historians political scientists theologians biblical studies scholars and scholars of religion that transgress disciplinary boundaries to consider urgent matters expressive of the values practices and questions that shape human existence Each essay recognizes urgent imbrications of the global economy multinational politics and the materiality of ecological entanglements in assembling still possible futures for the earth Precisely in their diversity of disciplinary starting points and ethical styles the essays that follow enact their intersectional forcefield even more vibrantly

No Matter What Catherine Keller, 2024-12-03 A collection of essays that outline the recent work on ecology political theology religion and philosophy by one of the leading theologians of our age As we face relentless ecological destruction spiraling around a planet of unconstrained capitalism and democratic failure what matters most How do we get our bearings and direct our priorities in such a terrestrial scenario Species race sex politics and economics will increasingly come tangled in the catastrophic trajectory of climate change With a sense of urgency and of possibility Catherine Keller's **No Matter What** reflects multiple trajectories of planetary crisis They converge from a point of view formed of the political ecologies of a transdisciplinary theological pluralism In its work an ancient symbolism of apocalypse deconstructs end of the world narratives Christian and secular even as any notion of an all controlling and good God collapses under the force of internal contradiction In the place of a once for all incarnation the materiality of unbounded interincarnation of fragile yet animating relations of mattering earth bodies comes into focus The essays of **No Matter What** share the preoccupation with matter characteristic of the so called new materialism They also root in an older ecotheological tradition one that has long struggled against the undead legacy of an earth betraying theology that with the aid of its white Christian right wing invests the denigration of matter its spirit of no matter in limitless commodification The fragile alternative Keller outlines here embraces no matter what the mattering of the life of the Earth and of all its spirited bodies These essays struggling against Christian and secular betrayals of the spirited matter of Earth work to materialize the still possible planetary healing **Trading Futures** Filipe Maia, 2022-09-06 The discourse of financialized capitalism tries to create a future predictable enough to manage risk for the wealthy to shape the future into a profit making site that constrains and privatizes the sense of what s

possible Here people's hopes and meaning making energies are policed through the burden of debt In *Trading Futures* Filipe Maia offers a theological reflection on hope and the future calling for escape routes from the debt economy Drawing on Marxism continental philosophy and Latin American liberation theology Maia provides a critical portrayal of financialization as a death dealing mechanism that colonizes the future in its own image Maia elaborates a Christian eschatology of liberation that offers a subversive mode of imagining future possibilities He shows how the Christian vocabulary of hope can offer a way to critique the hegemony of financialized capitalism propelling us in the direction of a just future that financial discourse cannot manage or control

Psychological Undercurrents of History Henry Lawton, Jerry S. Piven, 2001 *Psychological Undercurrents of History* gathers together salient works of scholarship which endeavor to interpret the madness and imagination of our past from ancient religion to the Holocaust to Millennialism and Apocalyptic violence

Creation - Transformation - Theology LIT Verlag, 2022-01-02 The social and cultural challenges posed by the increasing threat to creation climate change destruction of biodiversity etc are the starting point for new philosophical ethical and theological reflections on the relationship between God human beings and the world as presented in this volume God's creative impulse which transforms anew is at work in the actions of human beings and challenges us in view of the threat to the house of life earth to go new ways that make a common and good life possible Creation and transformation are interrelated an ecological theology of creation and practice of sustainability to be developed in the European context is to be embedded in the horizon of a global liberating theology Prof Dr h c Margit Eckholt professor of dogmatics and fundamental theology at the Institute of Catholic Theology University of Osnabrück president of the European Society for Catholic Theology

Worlds Ending. Ending Worlds Jenny Stümer, Michael Dunn, 2023-12-04 The notion of apocalypse is an age old concept which has gained renewed interest in popular and scholarly discourse The book highlights the versatile explications of apocalypse today demonstrating that apocalyptic transformations the various encounters with anthropogenic climate change nuclear violence polarized politics colonial assault and capitalist extractivism navigate a range of interdisciplinary views on the present moment Moving from old worlds to new worlds from world ending experiences to apocalyptic imaginaries and finally from authoritarianism to activism and advocacy the contributions begin to map the emerging field of Apocalyptic and Post Apocalyptic Studies Foregrounding the myriad ways in which collective imaginations of apocalypse underpin ethical political and sometimes individual experience the authors provide key points of reference for understanding old and new predicaments that are transforming our many worlds

From Eden to Interstellar Space Sarah Anne Beattie, 2025-01-23 This book is a response to two questions The first concerns how we can do better as human beings in addressing the broken relationships between humankind the environment in which we live and the other species with which we coexist in an increasingly fragile world The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective

transformational action The book explores the possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary rather than competing supplement to developing scientific perspectives of reality These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live **The English**

Modernist Novel as Political Theology Charles Andrews, 2024-01-11 A 2024 CHOICE OUTSTANDING ACADEMIC TITLE novels by Virginia Woolf D H Lawrence Evelyn Waugh and Sylvia Townsend Warner as political theology works that imagine a resistance to the fusion of Christianity and patriotism which fuelled and supported the First World War this book shows how we can gain valuable insights from their works for anti militarist anti statist and anti nationalist efforts today While none of the four novelists in this study were committed Christians during the 1920s Andrews explores how their fiction written in the wake of the First World War operates theologically when it challenges English civil religion the rituals of the nation that elevate the state to a form of divinity Bringing these novels into a dialogue with recent political theologies by theorists and theologians including Giorgio Agamben William Cavanaugh Simon Critchley Michel Foucault Stanley Hauerwas and Jürgen Moltmann this book shows the myriad ways that we can learn from the authors theopolitical imaginations Andrews demonstrates the many ways that these novelists issue a challenge to the problems with civil religion and the sacralized nation state and in so doing offer alternative visions to coordinate our inner lives with our public and collective actions

The Challenge of Islam Norman O. Brown, 2009-08-04 The Prophetic Tradition The Challenge of Islam is an enlightening set of lectures given by Norman O Brown during the 1980s exploring a wide ranging array of topics concerning Islam Brown reveals the overlooked relationship between Islam and early Christianity exploring Islam's relation to and revision of the Christian tradition the literary innovation of the Qur'an the nature of revolutionary and political Islam and the vision of a world civilization Throughout these lectures which are remarkably pertinent today Brown seeks to educate the reader on misunderstood areas of Islam including the split between the Sunni and Shi'ite sects and Islam's exemplification of the broad themes of art and imagination in human life The author's world historical perspective of religion and tradition gives readers a crucial alternative to the divisive clash of civilizations view that paints Islam as at odds with the West He exposes the unifying strands between Islam and early Judeo Christian doctrine showing that Islam is in fact a genuine part of Western tradition and more importantly part of a global tradition that embraces us all **Extinction and Religion** Jeremy

H. Kidwell, Stefan Skrimshire, 2024-01-02 Human caused extinctions have never been so prominent in our political and cultural landscape Extinction and Religion is a collection of wide ranging chapters that explore the implications for religious faith and experience as it relates to a sixth mass extinction in Earth's history Further it seeks to answer the question as to how religious and spiritual practices are shaping responses to the crisis Edited by Jeremy H Kidwell and Stefan Skrimshire

this collection aims to set a new postsecular agenda articulating the questions challenges and ways forward for thinking about religion in an age of mass extinction rather than provide responses from world religions in isolation It covers subjects such as the multitude of challenges posed by mass extinction to beliefs about the future of humanity death and the afterlife the integrity of creation and the relationship between human and nonhuman life Wide ranging and incisive Extinction and Religion amply demonstrates the many ways in which the threat of extinction profoundly affects our faith and religious life worlds

American Sublime Rob Wilson, 1991 Tracing ideas of the sublime in American literature from Puritan writings to the postmodern epoch Rob Wilson demonstrates that the North American landscape has been the ground for political as well as aesthetic transport He takes a distinctly historical approach and explores the ways in which experiences of the American landscape instill desire for other kinds of vastness self expansion national expansion and American political power As Wallace Stevens put it the American will takes dominion everywhere Wilson sets the stage for his genealogy with a discussion of the classical notion of the sublime taken primarily from Longinus and the ways that notion was pragmatically transformed by its American setting and appropriated by American poets He follows this transformation in successive chapters on the Puritans Bradstreet through the Naturalists Livingston and Bryant from the epitome of the American sublime Whitman to the greatest of the modernists Stevens and its present day incarnations Ashbery and others Writing today under the sign of Hiroshima contemporary writers must struggle with the concept of the sublime within a context of spiralling technologies and nuclear force that calls into question the long standing American sacralization of power Throughout American Sublime Wilson engages in an original theoretical inquiry into the sublime as term topic complex and controversial idea in literary and critical history Furthermore he undertakes his historical study from an avowedly postmodern perspective one that draws on and extends the work of Jameson Lyotard Foucault Lentricchia Harold Bloom and others

The Queer Bible Commentary, Second Edition Mona West, Robert Shore-Goss, 2022-09-30 First published over ten years ago The Queer Bible Commentary brings together the work of several scholars and pastors known for their interest in the areas of gender sexuality and Biblical studies Contributors draw on feminist queer deconstructionist utopian theories the social sciences and historical critical discourses The focus is both how reading from lesbian gay bisexual and or transgender perspectives affect the reading and interpretation of biblical texts and how biblical texts have and do affect LGBTQ communities This revised 2nd edition includes updated bibliographies and chapters taking into account the latest literature relating to queer interpretation of scripture

Nuclear Madness Ira Chernus, 1991-02-12 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of

four major theorists in the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton's own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation **The Actual**

Jesus Tina Pippin, 2025-07-29 This book moves away from the traditional historical and theological studies of Jesus to incorporate a variety of theoretical and material approaches across centuries and diverse global cultures Through fiction and film the connections are made with contemporary issues such as borders asylum seekers farmworker activism colonialism violence misogyny civil war and nuclear proliferation with a focus on the appearances of the actual Jesus in these worlds The Jesus in this study is explored in particular connections with the stories of baptism wilderness experience ascension and apocalypse What is found is often confusing challenging surprising and disturbing like the Jesus of the gospels **The System of Antichrist** Charles Upton, 2005 The System of Antichrist examines the present religious and cultural scene from the standpoint of traditional metaphysics and critiques the New Age spiritualities within their postmodern context Its many references to Rene Guenon and Frithjof Schuon also help introduce these important but little known traditionalist thinkers The book presents lore relating to the latter days of the present cycle from the vantage point of comparative religion drawing upon relevant doctrines from Buddhism Hinduism Judaism Christianity Islam Zoroastrianism and the Native American traditions It also speculates upon the social psychic and spiritual nature of that being known to Christianity Judaism and Islam as the Antichrist presenting him as both an individual and a system and warning those willing to be warned against the spiritual seduction and terror he represents and against the regime which will be and is the social expression of that seduction and that terror Finally in tracing the roots of Antichrist in the fallen nature of man the author sketches the particular quality of spirituality proper to apocalyptic times the dangers it faces the unique opportunities open to it And along the way he describes his own course from the spiritual revolution of the 1960s through the world of New Age spiritualities to the threshold of traditional esoterism and metaphysics As he says speaking of the angst that characterizes the modern world The specific medicine for the shock of despair is the deeper shock of meaning Nothing but the weight of eternity breaking through the thin brittle shell of the postmodern sky can set us on our feet
