

Value versus Facts:

- Values are things we feel “should”, “ought”, or “are supposed to” influence our lives.

VALUE: All people should be active in a specific religion.

VALUE: The best time to buy clothing is when the price is discounted.

- A value is a statement of one's personal beliefs.

- Facts simply state what actually are. It is easy to confuse values with facts.

FACT: Many people are active in a specific religion.

FACT: The most economical time to buy clothing is when the seasons change and the price is reduced.

- A fact is established by observation and measurement.

Fact Value:

Closing Methodological Divides K.R. Howe, 2006-04-18 The issues I treat in this book qualitative versus quantitative methods facts versus values science versus politics subjectivity versus objectivity postmodernism versus pragmatism to name a few are at the core of a lively sometimes divisive conversation that has been unfolding in the theory and practice of educational research for some time These issues fall squarely within the province of philosophy and thus philosophical investigation has an especially useful contribution to make But these issues are by no means the exclusive province of philosophy they are ones in which a diverse group of educational theorists have had a keen interest and about which they have had important things to say The conversation I hope to join and to move forward is this broad and inclusive one Philosophy of education is at its best when it dives headlong into the fray The book borrows liberally from my previously published work but is far from a simple compilation The ideas developed in Chapter 7 On the Threat of Epistemological Bias are new The ideas developed in Chapter 9 Toward Democratic Educational Research are a significant extension of the application of similar ideas to evaluation research The ideas developed in Chapter 4 The Persistence of the Fact Value Dogma are in a form and at a level of detail not published before Finally Chapter 1 Introduction and Overview weaves together my thinking on a large array of issues on educational research methodology that had only been loosely connected before [Data Warehousing for Biomedical Informatics](#)

Neves, 2012-03-22 Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions [How to Write Your Literature Review](#) Bryan Greetham, 2020-12-12 This engaging guide by bestselling author Bryan Greetham takes students step by step through the process of writing a literature review and equips them with practical strategies to help them navigate each stage Each bite sized chapter focuses on a specific aspect of the process from generating ideas and pinning

Thick Evaluation Simon Kirchin, 2017-11-09 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations We use evaluative terms and concepts every day We call actions right and wrong teachers wise and ignorant and pictures elegant and grotesque Philosophers place evaluative concepts into two camps Thin concepts such as goodness and badness and rightness and wrongness have evaluative content but they supposedly have no or hardly any nonevaluative descriptive content they supposedly give little or no specific idea about the character of the person or thing described In contrast thick concepts such as kindness elegance and wisdom supposedly give a more specific idea of people or things Yet given typical linguistic conventions thick concepts also convey evaluation Kind people are often viewed positively whilst ignorance has negative connotations The distinction between thin and thick concepts is frequently drawn in philosophy and is central to everyday life However very few articles or books discuss the distinction In this full length study Simon Kirchin discusses thin and thick concepts highlighting key assumptions questions and arguments many of which have gone unnoticed Kirchin focuses in on the debate between separationists those who think that thick concepts can be separated into component parts of evaluative often very thin content and nonevaluative content and nonseparationists who deny this Thick Evaluation argues for a version

of nonseparationism and in doing so argues both that many concepts are evaluative and also that evaluation is not exhausted by thin positive and negative stances *Empirical Bioethics* Jonathan Ives, Michael Dunn, Alan Cribb, 2016-12-22 Bioethics has long been accepted as an interdisciplinary field The recent empirical turn in bioethics is however creating challenges that move beyond those of simple interdisciplinary collaboration as researchers grapple with the methodological empirical and meta ethical challenges of combining the normative and the empirical as well as navigating the difficulties that can arise from attempts to transcend traditional disciplinary boundaries *Empirical Bioethics Theoretical and Practical Perspectives* brings together contributions from leading experts in the field which speak to these challenges providing insight into how they can be understood and suggestions for how they might be overcome Combining discussions of meta ethical challenges examples of different methodologies for integrating empirical and normative research and reflection on the challenges of conducting and publishing such work this book will both introduce the novice to the field and challenge the expert

Nassir Ghaemi, 2004-12-01 Because most psychiatric illnesses are complex phenomena no single method or approach is sufficient to explain them or the experiences of persons who suffer from them In *The Concepts of Psychiatry* S Nassir Ghaemi M D argues that the discipline of psychiatry can therefore be understood best from a pluralistic perspective Grounding his approach in the works of Paul McHugh Phillip Slavney Leston Havens and others Ghaemi incorporates a more explicitly philosophical discussion of the strengths of a pluralistic model and the weaknesses of other approaches such as biological or psychoanalytic theories the biopsychosocial model or eclecticism Ghaemi's methodology is twofold on the one hand he applies philosophical ideas such as utilitarian versus duty based ethical models to psychiatric practice On the other hand he subjects clinical psychiatric phenomena such as psychosis or the Kraepelin nosology to a conceptual analysis that is philosophically informed This book will be of interest to professionals and students in psychiatry as well as psychologists social workers philosophers and general readers who are interested in understanding the field of psychiatry and its practices at a conceptual level *Transforming International Criminal Justice* Mark Findlay, Ralph Henham, 2005-06-01 This book sets out an agenda to transform international criminal trials and the delivery of international criminal justice to victim communities through collaboration of currently competing paradigms It reflects a transformation of thinking about the comparative analysis of the trial process and seeks to advance the boundaries of international criminal justice through wider access and inclusivity in an environment of rights protection Collaborative justice is advanced as providing the future context of international criminal trials The book's radical dimension is its argument for the harmonization of restorative and retributive justice within the international criminal trial The focus is initially on the trial process a key symbol of developing international styles of justice It examines theoretical models and political applications of criminal justice through detailed empirical analysis in order to explore the underlying relationship of theory and empirical study applying the outcome in theory testing and policy evaluation in several different jurisdictions The book injects a significant comparative dimension into the study of international criminal justice This is achieved through searching the traditional foundations of internationalism in justice by employing an original methodology to enable a multi dimensional exploration of contexts local regional and global so recognising the importance of difference within an agenda suggesting synthesis The book argues for a concept of international trial within a rights paradigm understood against different procedural traditions and practices and provides a detailed description of trials and trial decision making in various jurisdictions *Transforming International Criminal Justice* also sets out to develop effective research strategies as part of its interrogation of specific trial narratives and meanings in contemporary legal cultures Key themes are those of internationalisation fair trial and the exercise of discretion in justice resolutions sentencing in particular and the lay professional relationship and its dynamics Finally the book provides

a searching critique of the relevance of existing criminology and legal sociology in relation to international criminal justice and speculates on trial transformation and the merger of retributive and restorative international criminal justice comparative analysis of the criminal trial process internationally argues for harmonization of retributive and restorative justice within the international criminal trial sets out an agenda to transform international criminal trials and the delivery of international criminal justice to victim communities *Relativism and Beyond* Yoav Ariel, Shlomo Biderman, Ornan Rotem, 1998 A collection of essays in which philosophers of widely different interests grapple with the problem of the relative and the absolute in philosophy and religion A concluding article tries to advance beyond the simple antithesis to a more sophisticated and adequate conception **Critical Legal Theory and the Challenge of Feminism** Matthew H. Kramer, 1995 **Economic Analysis, Moral Philosophy, and Public Policy** Daniel Hausman, Michael McPherson, Debra Satz, 2016-12-15 This book shows through argument and numerous policy related examples how understanding moral philosophy can improve economic analysis how moral philosophy can benefit from economists analytical tools and how economic analysis and moral philosophy together can inform public policy Part I explores the idea of rationality and its connections to ethics arguing that when they defend their formal model of rationality most economists implicitly espouse contestable moral principles Part II addresses the nature and measurement of welfare utilitarianism and cost benefit analysis Part III discusses freedom rights equality and justice moral notions that are relevant to evaluating policies but which have played little if any role in conventional welfare economics Finally Part IV explores work in social choice theory and game theory that is relevant to moral decision making Each chapter includes recommended reading and discussion questions *Bioethics and Social Reality*, 2005-01-01 This book explores the many connections that bioethical thinking has with social reality Bioethics if it is to be effective must engage with and address the actualities of modern life policies regulations markets opinions and technological advances In these original contributions fifteen notable scholars working in the North West of England take on this challenge The series Values in Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics **The Politics of Agency** Jeremy Wisniewski, 2008 Debates about individualism and holism reductionism and phenomenology and naturalism and humanism all turn on how we answer the basic questions about the nature of human agency This book argues that the traditional emphasis on the accuracy of a given theory of human agency has systematically obscured the normative dimension in these theories and that recognizing this normative dimension allows us to see that a pragmatic approach to theories of agency either in social science or moral philosophy is more appropriate As well as offering a vigorous presentation of the pragmatic therapeutic account of agency Wisniewski also engages critically with three rival accounts from Nietzsche Foucault and Rorty Programming Languages Andre Rauber Du Bois, Phil Trinder, 2013-09-24 This book constitutes the proceedings of the 17th Brazilian Symposium on Programming Languages SBLP 2013 held in Bras

lia Brazil in September October 2013 The 10 full and 2 keynote talks were carefully reviewed and selected from 31 submissions The papers are organized in topical sections on program generation and transformation including domain specific languages and model driven development in the context of programming languages programming paradigms and styles including functional object oriented aspect oriented scripting languages real time service oriented multithreaded parallel and distributed programming formal semantics and theoretical foundations including denotational operational algebraic and categorical program analysis and verification including type systems static analysis and abstract interpretation and programming language design and implementation including new programming models programming language environments compilation and interpretation techniques

The Radical Critique of Liberalism Toulas
Nicolacopoulos, 2008 There are many books about liberalism but no defence of radical critique that treats liberal theory with the depth breadth and intensity of this work Rigorously examining Rawls Waldron Larmore and Kymlicka the book demonstrates that an adequate appreciation of the deep structural flaws of liberal theory presupposes the application of a critical philosophical methodology that has the power to reveal the systemic interconnections within and between the varieties of liberal inquiring practices
