Fact and Fantasy in Freudian Theory (RLE: Freud) Paul Kline, 2013-10-08 Originally published in 1972 this second edition in 1981 was fully revised and updated to cover recent developments in the field at the time Fact and Fantasy in Freudian Theory was written to answer many questions and criticisms surrounding psychoanalysis How much if any of Freudian theory is verifiable according to the usual criteria of scientific enquiry Much work had been carried out at the time to discover which parts of Freudian theory are verifiable and which insupportable by experiment In this book Dr Kline surveys this vast body of work He takes one by one the central postulates of Freudian psychology and discusses the experiments which have been performed to test them He scrutinizes each test examines its methodology and its findings and weighs up its value For some of the theories it will be seen there is no evidence whatsoever for others on the other hand there is impressive and sometimes incontrovertible experimental support for example for the theory of repression This work will continue to be an invaluable highly detailed reference work for those involved with Freud's work and a book of great interest to those concerned with the method of psychological enquiry in general **Fact and Fantasy in Freudian Theory** Paul Kline, 1981

as the relation between economy and the state or withering away of statal apparatuses but the whole of modernity as the epoch determined by if not overlapping with capitalism This book aims to think with the legal form rather than explain this concept In so doing it offers a panoply of theoretical perspectives that address legal subjectivity abstraction autonomy of the law and last but not least withering away of the law This contemporary interrogation of the relevance of the concept of legal form will be of considerable interest to scholars and students of legal and political theory

Freudian repression, the Unconscious, and the Dynamics of Inhibition Simon Boag, 2018-03-26 Possibly no other psychoanalytic concept has caused as much ongoing controversy and attracted so much criticism as that of repression Repression involves denying knowledge to oneself about the content of one's own mind and is most commonly implicated in disputes concerning the possibility of repressed memories of trauma and their subsequent recovery While fundamental in Freudian psychoanalysis recent developments in psychoanalytic thinking e.g. mentalization have downplayed the importance of repression in part due to less emphasis being placed on the importance of memory within therapy

The Castration of Oedipus Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual movements of psychoanalysis postmodernism and feminism have redefined the ways in which we think about human experience And yet an integration of these movements has been elusive if not impossible In this landmark book J C Smith and Carla J Ferstman combine these disparate traditions to create a provocative unified and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory The dialectics of domination and submission are central to Smith and Ferstman s argument Men and women they insist must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche or in Nietzsche s terms the Will to Power They argue that the unification of psychoanalysis postmodernism and feminism leads us to a shocking conclusion that women and men cannot move beyond the suffering which so haunts the human condition unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women And women conversely must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality A work of tremendous insight and extraordinary intellectual energy *The Castration of Oedipus* will provoke strong reactions in all readers regardless of ideology
