Factory Question And Industrial England 1830 186:

The Factory Question and Industrial England, 1830-1860 Robert Gray, 2002-04-04 The Factory Question and Industrial England addresses the continuing controversy over industrialisation It investigates different perceptions of the factory system either as a threat or a promise and the contested meanings of waged work in industry Making use of a great variety of sources such as sermons medical treatises fictional and visual representations Robert Gray places the languages of debate in their cultural contexts paying particular attention to the shifting constructions of class and gender in the rhetoric of reform and the ambiguities and tensions inherent in protective legislation He then relates patterns of conflict over factory legislation to the features of specific industrial towns The combination of regional cultural and textual analysis makes this book a coherent and original contribution to the study of industrial Britain in the nineteenth century **Work and**

Unemployment 1834-1911 Marjorie Levine-Clark, 2022-06-16 This volume explores questions surrounding what types of assistance were available to people out of work and who should receive that assistance during the nineteenth century

Documents on the Poor Law voluntary organizations and work relief schemes all demonstrate how central the work imperative was in the ways officials decided which applicants for assistance were deserving and which were not Sources address many of the significant issues surrounding local relief to the unemployed the growing influence of methodical approaches to charitable giving and the use of measures of character embedded in the work imperative to choose worthy men to relieve Accompanied by extensive editorial commentary this volume will be of great interest to students of British History *An Age of Equipoise? Reassessing Mid-Victorian Britain* Martin Hewitt, 2017-07-05 The Age of Equipoise by W L

Burn was published in 1964 and became a central text in the canon of interpretations of the Victorian period The book subsequently fell out of favour but recent claims to establish a new interpretative standard have paradoxically prompted reviewers to cast back to Burn s work as the orthodox standard against which such claims should be judged The essays in this volume by British and American contributors all engage to varying degrees with the notion of equipoise and how it can help to illuminate the mid Victorian period in ways which alternative formulations cannot Some of the chapters develop arguments embedded in Burn s own book others take up issues largely absent in *The Age of Equipoise* such as the position of children Britain s interaction with the wider world and the threats the period experienced to its concept of masculine identity Together the essays demonstrate the intricacy and turbulence of the forces of cohesion in Victorian society along with the success of that culture in achieving a working if shifting *modus vivendi* Moreover they substantiate the argument that whatever the limitations of Burn s work *equipoise* deserves rehabilitation as a powerful conceptual framework for making sense of mid Victorian Britain About the Editor Martin Hewitt is Director of the Leeds Centre for Victorian Studies and editor of the *Journal of Victorian Culture* With Robert Poole he has recently produced an edition of *The Diaries of Samuel Bamford 1858-61* Sutton 2000 **British Empire and the Literature of Rebellion** Sheshalatha Reddy, 2017-10-14 This book

examines imperial and nationalist discourses surrounding three contemporaneous and unsuccessful mid nineteenth century colonial uprisings against the British Empire the Sepoy Rebellion 1857 in India the Morant Bay Rebellion 1865 in Jamaica and the Fenian Rebellion 1867 in Ireland In reading these three mid century rebellions as flashpoints for the varying yet parallel attempts by imperialist colonialists nationalists and socialists to transform the oppressed colonized worker the subjected laborer into one whose identity is created and limited by labor a laboring subject this book also tracks varying modes of resistance to those attempts in all three colonies In drawing from a range of historical literary and visual sources outside the borders of the Anglophone literary canon this book contends that these texts not only serve as points of engagements with the rebellions but also constitute an archive of oppression and resistance *Cumulative Bibliography of Victorian Studies* ,1970 **Round about Industrial Britain, 1830-1860** Charles Ryle Fay,1952 The Middlemost and the Milltowns Brian Lewis,2002-11-01 This book seeks to enrich our understanding of middle class life in England during the Industrial Revolution For many years questions about how the middle classes earned and failed to earn money conducted their public and private lives carried out what they took to be their civic and religious duties and viewed themselves in relation to the rest of society have been largely neglected questions These topics have been marginalized by the rise of social history with its predominant focus on the political formation of the working classes and by continuing interest in government and high politics with its focus on the upper classes and landed aristocracy This book forms part of the recent attempt influenced by contemporary ideas of political culture to reassess the role composition and outlook of the middle classes It compares and contrasts three Lancashire milltowns and surrounding parishes in the early phase of textile industrialization when the urbanizing process was at its most rapid and dysfunctional and class relations were most fraught The book s range extends from the French Revolution to 1851 the year of the Great Exhibition which symbolized mid century stability and prosperity The author argues that members of the middle class were pivotal in the creation of this stability He shows them creating themselves as a class while being created as a class putting themselves in order while being ordered from above The book shifts attention from the search for a single elusive class consciousness to demonstrate instead how the ideological leaders of the three milltowns negotiated their power within the powerful forces of capitalism and state building It argues that at a time of intense labor capital conflict it was precisely because of their diversity and their efforts to build bridges to the lower orders and upper class that the stability of the liberal capitalist system was maintained Victorian Glassworlds Isobel Armstrong,2008-04-24 Isobel Armstrong s startlingly original and beautifully illustrated book tells the stories that spring from the mass production of glass in nineteenth century England Moving across technology industry local history architecture literature print culture the visual arts optics and philosophy it will transform our understanding of the Victorian period The mass production of glass in the nineteenth century transformed an ancient material into a modern one at the same time transforming the environment and the nineteenth century imagination It created a new glass culture hitherto

inconceivable Glass culture constituted Victorian modernity It was made from infinite variations of the prefabricated glass panel and the lens The mirror and the window became its formative elements both the texts and constituents of glass culture The glassworlds of the century are heterogeneous They manifest themselves in the technologies of the factory furnace in the myths of Cinderella and her glass slipper circulated in print media in the ideologies of the conservatory as building type in the fantasia of the shopfront in the production of chandeliers in the Crystal Palace and the lens made images of the magic lantern and microscope But they were nevertheless governed by two inescapable conditions First to look through glass was to look through the residues of the breath of an unknown artisan because glass was mass produced by incorporating glassblowing into the division of labour Second literally a new medium glass brought the ambiguity of transparency and the problems of mediation into the everyday It intervened between seer and seen incorporating a modern philosophical problem into bodily experience Thus for poets and novelists glass took on material and ontological political and aesthetic meanings Reading glass forwards into Bauhaus modernism Walter Benjamin overlooked an early phase of glass culture where the languages of glass are different The book charts this phase in three parts Factory archives trade union records and periodicals document the individual manufacturers and artisans who founded glass culture the industrial tourists who described it and the systematic politics of window breaking Part Two culminating in glass under glass at the Crystal Palace reads the glassing of the environment including the mirror the window and controversy round the conservatory and their inscription in poems and novels Part Three explores the lens from optical toys to philosophical instruments as the telescope and microscope were known A meditation on its history and phenomenology Victorian Glassworlds is a poetics of glass for nineteenth century modernity
