

15 INTERESTING FACTS ABOUT THE HUMAN BODY

YOUR BONES

You're born with 200 bones. But as you age and grow taller, your bones fuse, leaving you with 206 total.¹

YOUR STRONGEST MUSCLE

Your jaw muscle is the strongest muscle in your body. The jaw's hinge-like features create more power as you bite down and clench your teeth.²

YOUR BODY GLOWS

Your body produces a glimmer of light, caused by bioluminescence. It's, however, invisible to the naked eye.³

YOUR SPIT

In an average lifetime, you'll produce around 21,000 liters of spit. That's enough saliva to fill at least one small swimming pool.⁴

YOUR LIVER

Your liver is the only organ that can completely regenerate itself. It can grow back to its original size within a few weeks.⁵

YOUR SMALLEST BONES

The smallest bones in your body are in your ear. They're so small that they could all fit on a penny, and you wouldn't be able to hear anything without them.⁶

YOUR EAR

Your ear is self-cleaning because of one thing: ear wax. It keeps your ears tidy and protects you from bacteria.⁷

YOUR EYES

Your eyes are powerful. They can detect light from a candle flame over 1.7 miles away.⁸

YOUR NOSE

Your sense of smell is closely linked with your memories and can trigger strong emotions and memories almost instantaneously.⁹ Women tend to have a stronger sense of smell than men.¹⁰

YOUR TONGUE

Forget fingerprints: Your tongue print is unique to you, making it difficult to forge.¹¹

YOUR SNEEZING

Scientists have recently discovered sneezing might be your nose's way of rebooting itself to get rid of any bad particles that have been inhaled.¹²

YOUR BLOOD VESSELS

There are over 100,000 miles of blood vessels inside your body.¹³

YOUR STOMACH

The acid in your stomach is so strong that it could dissolve metal.¹⁴

YOUR PINKY FINGER

Without your pinky finger, you would lose about 50% of your hand strength.¹⁵

YOUR BODY

Your body sheds about eight pounds of dead skin a year. Most of those cells settle as the dust in your home.¹⁶
