Literacy as a Moral Imperative Rebecca Powell, 1999-09-08 In this important new book on literacy and teaching practices education scholar and former schoolteacher Rebecca Powell argues that the decisions we make about literacy in a pluralistic society are fundamentally moral ones either supporting inequitable power relationships or seeking to transform them Powell explores the underlying ideological assumptions of schooled literacy and examines the ways teaching practices create tensions in the lives of students tensions that often result

in alienation and educational failure particularly among those whose cultural knowledge and language tends to be marginalized in our nation's schools. While primarily grounded in critical theory, this volume also draws from multicultural and holistic perspectives in the teaching of written and oral language and addresses the link between whole language and critical pedagogy. Thus, the text is both theoretical and practical. Powell effectively argues that literacy instruction should encourage social responsibility and civic action should enable students and teachers to understand the transformative potential of language and should nurture a culture of compassion and care.

Macmillan Directory of UK Business Information Sources
James Tudor, 1992-09-15. The objective of this publication is to provide a one-stop guide to business information insofar as that is possible within the confines of a useable book. It aims to give guidance on both the published and organisational sources relevant to the needs of the non-professional business researcher and provides a listing of worthwhile references and contacts. As previously, the Directory is organised so that both published sources and information centres are grouped together under their applicable Standard Industrial Classification (SIC) number and heading. This new edition also incorporates NACE classification and correlation tables. The second category again includes those UK and pan-national organisations which focus on specific discrete industry sectors which limits the number of organisational sources in the directory to those that are most worthwhile.

Elasticity and Toughness Feng Wei, 2021-12-30. This book examines minban teacher policies and their implementation in China between 1949 and 2000 when rural areas were in severe shortage of qualified teachers. During this period of time, minban teachers made great contributions to education, doing the same work as state-employed school teachers while receiving much lower salaries due to non-official status. With solid fieldwork on oral history of minban teachers and policy actors and deep examination of a wealth of policy documents in private and governmental archives, the author records the life history of minban teachers, the process of minban teacher policies and the interaction between policies and individual strategies in M county (pseudonym) located in northern Jiangsu province of China. The book reveals many interesting and sometimes surprising findings about the characteristics of educational policy implementation in China. While China's minban teacher policies have come to an end, rural education continues to be a major concern of policymakers and researchers alike. The book is an important piece of scholarship for the readers interested in rural education in China and in how state, society and culture interact to influence teacher policies and management in the Chinese context.

The United Nations Under U Thant, 1961-1971 Bernard J. Firestone, 2001-10-03. Thant's ten years as secretary general witnessed a series of new peacekeeping missions in Africa, Asia and the Middle East and the establishment of institutional structures for the discussions of North-South economic issues. But fiscal crisis brought near paralysis. The United States became increasingly alienated from the organization over the existing policies in Vietnam and the Arab-Israeli War demonstrated the UN's inability to prevent crisis from escalating into war. By the end of Thant's second term, the position of secretary general was more secure but far weaker than it was ten years before.
