Fading Forest August Greeley,2002-11 Examines the ecology importance and systematic destruction of the world s rain forests      *Fading Forests* August Greeley,2003 Examines the ecology importance and systematic destruction of the world s rain forests      **Vanishing Forests** Cheng Puay Lim,2004 Describes how the world s forests are being destroyed some of the causes and consequences of this destruction and some ways of preventing it      *Vanishing Forests* Terra Greenway,AI,2025-02-19 Vanishing Forests explores the critical issue of deforestation and its devastating impact on our planet s endangered forests This book investigates the reasons behind the alarming decline of these vital ecosystems which serve as biodiversity hotspots and play a crucial role in climate regulation through carbon sequestration Highlighting the ecological significance of these forests the book also examines the various drivers of deforestation including agricultural expansion and unsustainable logging practices while emphasizing the urgent need for comprehensive conservation strategies The book systematically progresses from introducing endangered forest types and their ecological roles to analyzing the causes of deforestation and evaluating different conservation approaches By drawing on scientific research data from organizations and case studies from around the world Vanishing Forests presents a fact based analysis of the complex interplay between ecology economics and policy It underscores the importance of sustainable forestry and environmental protection for ecological stability and human well being offering a balanced perspective on the trade offs between economic development and conservation      *Fallout* August Greeley,2002-12-15 Introduces the principles of nuclear energy and the types of accidents which can occur in nuclear power plants focusing on the Chernobyl explosion and the difficulties experienced in containing the radiation that resulted from the disaster      **Toxic Waste** August Greeley,2002-12-15 Explores how dangerous chemicals can be released into the environment the harm they can do and what can be done in the future to prevent such disasters as the release of cyanide into Europe s Tisza River in 2000      Forthcoming Books Rose Arny,2003-04

**Our vanishing relative** Rijksen,2013-12-01 The orang utan is a superb representative of a major sector of the structure of biological diversity in Sumatra and Borneo Conservation of the living conditions of the orang utan implies maintaining the integrity of the entire natural ecosystem of indigenous plant and animal species known as the West Malesian rainforest i e the natural tropical evergreen forests of distinctive floral composition which stretch from the isthmus of Kra in Thailand across peninsular West Malaysia south and eastwards including Sumatra Borneo and Java The main question behind this study is What is the current status of the orang utan Or in other words what is the current geographical distribution range what have been the trends in the size of its range and numbers to what extent is this range covered by a conservation areas b timber concessions i e modified habitat and c plans for conversion i e obliteration of the habitat what is the current quality of habitat in this range and what is the prospect for conservation or restoration of such habitat what is a plausible average density of the ape in such habitat what are the prospects for protection of the ape what should and can be done to give the

ape a chance of survival Several actions were undertaken to find answers to these questions and the major results are In Sumatra the orang utan has a much more extensive range than was hitherto *Vanishing Paradise* Stephen Dalton, George Bernard, Andrew W. Mitchell, 1990 Humid densely verdant and mysterious tropical rainforests are the richest source of life on this planet and home to more than half the wild animals and plant species in the world This is a lavish and colorful celebration of a fragile paradise whose survival is crucial to the future of planet Earth 200 full color photographs

**Bulletin of the Atomic Scientists** ,1980-03 **The Vanishing Face of Gaia** James Lovelock, 2009-02-26 James Lovelock described his previous book *The Revenge of Gaia* as a wake up call for humanity Stark though it was in many respects in *The Vanishing Face of Gaia* Lovelock says that even though the weather seems cooler and pollution lessens as the recession bites the environmental problems we will face in the twenty first century are even more terrifying than he previously realised The Arctic and Antarctic ice caps are melting very quickly and water shortages and natural disasters are more common occurrences than at any time in recent history The civilisations of many countries will be jeopardised and life as we know it severely disrupted Almost all predictions of the likely rate of climate change have been based on estimates which professional observers in the real world now show are consistently underestimating the true rate of change As a global community we continue to be fixated by conventional green ideas which we believe will help save our world Lovelock argues that only Gaia theory which he originated over forty years ago can really help us understand the crisis fully The root problem is that there are too many people and animals for the Earth to carry And there is in fact only one possible procedure which might bring a permanent cure for climate change but we are unlikely to adopt it Our wish to continue business as usual will probably prevent us from saving ourselves says Lovelock so we must adapt as best we can and try to ensure that enough of us survive to allow a more capable species to evolve from us There could hardly be a more important message for humankind James Lovelock has been an active and accurate observer of the Earth environment since the 1960s and was the first to find CFCs and other gases accumulating in the air His Gaia theory provides insight into climate change in the coming century

This is his final warning *Oregon Caves National Monument* ,1998 **Beneath the Vanishing Canopy: The Bonds of Deforestation, Carbon Sequestration, and Climate** Marilyn Duncan, In this captivating book readers will delve into the intricate connections between deforestation carbon sequestration and climate change Unveiling a thought provoking analysis the book uncovers the complex relationship between these three pivotal environmental elements Through meticulous research and expert insights it reveals the consequential impact of deforestation on carbon sequestration and how it fuels the unrelenting phenomenon of climate change Amidst a backdrop of ecological turmoil and pressing global concerns this book acts as a guiding light shedding new understanding on the intrinsically linked processes that shape our world *Vanishing Voices* Daniel Nettle, Suzanne Romaine, 2000 Nettle and Romaine paint a breathtaking landscape that shows why so many of the world's languages are disappearing and more importantly why it matters BOOK JACKET *A Core Bibliography on*

**The Conscious Planet** Neil M. Pine, 2024-06-13 The Conscious Planet represents the prerequisite for the future of humanity. It is a powerful polemic against all things wrong with our modern western culture. This salient and cutting edge vision of reality projects way out beyond the horizon. All this critically important information while formally being highly controversial and provocative subjects are now all coming to fruition with more public concern and awareness than ever. The truth about Pandemics, Vaccine horror, The cruel and destructive nature of the livestock industry, Meat recalls and Dangerous zoonotic diseases, Extreme weather and Climate change, Nuclear power dangers, GMOs and the nefarious Bee killing and cancer causing herbicides from Monsanto, Rainforest destruction, Drought, Famine and Endangered species including bees. It is everything the government and the multinational corporations that control it don't want you to know. Furthermore, The Conscious Planet exposes a legacy of demagoguery and Corporate plutocracy used by our politicians and big industry to cover up the truth about environmental negligence by mitigating or eschewing the facts. Refer to chapter 4 Peace and Prosperity. Over the years the truth has become obscured by a maelstrom of this mass government and corporate subreption. I also published an article in the Spring of 2010 in Vision Magazine warning people about the dangers of nuclear power. Contingent upon this article just one month later I gave a 20 min speech about non sustainable practices at the University of California in Riverside and received an Eco Hero Award. And only 1 year later we experienced the worst nuclear disaster in history at Fukushima Japan. Refer to chapter The Insidious Nature of Nuclear Power. This goes way beyond any self help book. Not only does this information improve your health and psychology but it will also dramatically reduce your carbon footprint thus ameliorating all external environment factors surrounding you making the      Children's Books in Print, 2007, 2006

*Tropical Rain Forest: A Wider Perspective* F.B. Goldsmith, 2012-12-06 The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests (IPF) under the auspices of the UN Commission on Sustainable Development. The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources. Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities. However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest.

and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance The Living and the Dead Conor W. O'Brien, 2025-08-21 Ireland is a land replete with natural wonders but we live in an age when our native wildlife is under threat like never before Centuries of hunting and habitat loss have already wiped out some of our most iconic species from the once feared grey wolf to the flightless great auk Ireland's very own penguin In The Living and the Dead acclaimed writer Conor W O'Brien travels the country to tell the stories of our amazing lost wildlife from the mighty sturgeon to the minuscule mountain ringlet butterfly He reveals the tragedies behind their demise and the lessons they impart for today's conservationists For across the country passionate people are fighting to protect endangered species and reintroduce those once lost The return of creatures long gone like the common crane and great spotted woodpecker are celebrated in these pages Such comebacks offer a vision of a return to a wilder Ireland one in which humans and nature thrive in a land where eagles fly again
