

Book Reviews

Richard Grassby, *The business community of seventeenth-century England*. (Cambridge: Cambridge University Press, 1995.) Pages xxx + 615. £50.00.

This is a remarkable book, distinguished by an extraordinary range of referencing to both primary and secondary materials, whose extent is signified by the allocation of around 40 per cent of its pages to the bibliography. It brings the perspectives of the academic historian subsequently turned businessman to the study of a group often ignored by some historians. Its approach is almost ethnographic, and the book's objectives are to define the role of business in seventeenth-century England through the study of the contributions of specific individuals and a reconstruction of the environment within which they operated. Conceived in the mid-1950s, it is ideologically closer to the work of Sylvia Thrupp and European medievalists than to the Tawney or *Annales* schools of the period, and is the panoramic companion piece to the same author's outstanding biographical study of Sir Dudley North (Oxford, 1994). A third volume of the period, putting theoretical dragons to test by lance, is to follow.

The first of its three parts explores seventeenth-century business as a career, through an assessment of the revealed attitudes of church and laity, suggesting that business was respected rather than esteemed as a career path. It goes on to explore the dimensions of the business community, capital requirements for entry and the risks of trade, setting this into the broader career options for the young man of middle rank, notably the younger son of gentry, in the period. Neither at the beginning nor at the end of the century did sufficient niches exist to cater for the full supply of such young men, who were thus forced to look to business, defined as providing in excess of 10,000 posts worth £50 or more per annum (roughly equal to the total available in all offices, professions and the Church), or were constrained to lifetime dependence upon their families.

More political arithmetic follows in the second section, a detailed assessment of the social and spatial origins of business recruits, combining the analysis of

Failed Legislation 1600-1800 Extracted From The Commons And Lords Journals

Julian Hoppit

Failed Legislation 1600-1800 Extracted From The Commons And Lords Journals:

Parliaments, nations and identities in Britain and Ireland, 1660-1850 Julian Hoppit, 2013-07-19 The abolition of the Scottish and Irish Parliaments in 1707 and 1800 created a United Kingdom centred upon the Westminster legislature This text discusses what this meant for the four nations involved and how conceptions of English Irish Scottish and Welsh identities were affected

On the Origin of the Right to Copy Ronan Deazley, 2004-07-31 Taking as its point of departure the lapse of the Licensing Act 1662 in 1695 this book examines the lead up to the passage of the Statute of Anne 1709 and charts the movement of copyright law throughout the eighteenth century culminating in the House of Lords decision in *Donaldson v Becket* 1774 The established reading of copyright's development throughout this period from the 1709 Act to the pronouncement in *Donaldson* is that it was transformed from a publisher's right to an author's right that is legislation initially designed to regulate the marketplace of the bookseller and publisher evolved into an instrument that functioned to recognise the proprietary inevitability of an author's intellectual labours The historical narrative which unfolds within this book presents a challenge to that accepted orthodoxy The traditional analysis of the development of copyright in eighteenth century Britain is revealed as exhibiting the character of long standing myth and the centrality of the modern proprietary author as the *raison d'être* of the copyright regime is displaced

Gambling in Britain in the Long Eighteenth Century Bob Harris, 2022-03-17 This new account of gambling in Britain in the long eighteenth century investigates who gambled on what and why

Britain's Political Economies Julian Hoppit, 2017-05-18 An innovative account of how thousands of acts of parliament sought to improve economic activity during the early industrial revolution

Failed Legislation, 1660-1800 Julian Hoppit, 1997 To become law a Bill had to pass many different stages at any of which up to and including royal assent it might fail Bills unpassed at the dissolution of a Parliament were also automatically abandoned Between 1660 and 1800 Parliament passed 14 216 Acts In this period 7025 attempts to pass an act at Westminster failed Failed Legislation 1660-1800 provides a full list of these for the first time It provides an essential perspective on the legislative history of the period and will be an essential tool for social economic and political historians Arranged chronologically by parliamentary session it presents the key information as to how legislative initiatives were handled By showing patterns of demand for legislation and categorising types of legislation and their success rate it also reflects on many aspects of British history in this period and not just political history Subject coding allows the list to be analysed at a number of levels from the general to the particular including the examination of specific issues Taken as a whole it shows how extensively statute was used to address a very wide range of issues both local and national in the early modern period

Litigation Wilfrid R. Prest, Sharyn L. Roach Anleu, 2004 Litigation does not have a good press in fact it is usually viewed very negatively Rates of litigation in Western countries are claimed to be spiralling beyond control and this is said to indicate a fundamental crisis in contemporary Western societies Litigation Past and Present sheds some much needed light on these views by examining actual patterns of

litigation both historical and contemporary and considering the many ways in which courts provide strategies for social change and social justice Topics surveyed include the long range recording of litigation rates the social uses of legal action the effectiveness of procedural reforms in reducing litigation and the impact of legal proceedings and activism on Indigenous rights and on marriage and family issues Litigation and its impact are too often discussed in excessively rhetorical and pragmatic terms This volume with contributions from internationally recognised scholars adds much needed empirical research and theoretical perspectives to the discussion

Poynings' Law and the Making of Law in Ireland, 1660-1800

James Kelly, 2007 Poynings Law 1494 was one of the most crucial statutes ever enacted by the Irish parliament yet the law's crucial impact on parliament's operations from 1660 has never been examined systematically James Kelly examines how Poynings Law impacted on the legislative operations of the Irish parliament between the Restoration and the Act of Union and he establishes how the Irish parliament contrived first by evolving a sophisticated heads of bills process in the late 17th century second by curtailing the power of the Irish privy council in the early 18th century and finally by securing the amendment of Poynings Law in 1782 to achieve a degree of legislative independence that endured until the Act of Union Based on a close and detailed scrutiny of the records of the Irish parliament and the systematic exploration for the first time of the voluminous records of the British privy council this book provides a new revealing perspective on the working of the Irish parliament its relationship with the Irish executive and on the nature of the Anglo Irish connection Series Irish Legal History Society

La société civile Christophe Charle, Julien Vincent, 2011 *Bowker's Law Books and Serials in Print*, 1993 *Subject Guide to Books in Print*, 2001 *The Colonial Agents of New York and New Jersey* Edward P. Lilly, 1936
