

# When policies are designed for economic growth rather than child welfare:

That creates more demand, putting more animals in factory farms and other horrible places than we are ever pulling out.

1

2

That puts more children in conditions that violate the Children's Rights Convention than groups like UNICEF or the UNFPA were ever pulling out.

That means systems that tried to maximize welfare failed because growth-based climate change will be the greatest source of suffering in the history of the world.

3

4

That means black children are being born with a tenth of the wealth of white children as a cycle deriving from colonization and slavery.

That growth also means no citizen is empowered enough in functional democracies to actually change all of this.

5

We can reverse the damage of exploitative policies. Equitable family planning investments give every child an ecosocial Fair Start in life.
