[The Unheralded Triumph](#) Jon C. Teaford, 2019-12-01 Originally published in 1984 In 1888 the British observer James Bryce declared the government of cities to be the one conspicuous failure of the United States During the following two decades urban reformers would repeat Bryce's words with ritualistic regularity nearly a century later his comment continues to set the tone

for most assessments of nineteenth century city government Yet by the end of the century as Jon Teaford argues in this important reappraisal American cities boasted the most abundant water supplies brightest street lights grandest parks largest public libraries and most efficient systems of transportation in the world Far from being a conspicuous failure municipal governments of the late nineteenth century had successfully met challenges of an unprecedented magnitude and complexity The Unheralded Triumph draws together the histories of the most important cities of the Gilded Age especially New York Chicago Boston Philadelphia St Louis and Baltimore to chart the expansion of services and the improvement of urban environments between 1870 and 1900 It examines the ways in which cities were transformed in a period of rapid population growth and increased social unrest into places suitable for living Teaford demonstrates how during the last decades of the nineteenth century municipal governments adapted to societal change with the aid of generally compliant state legislatures These were the years that saw the professionalization of city government and the political accommodation of the diverse ethnic economic and social elements that compose America s heterogeneous urban society Teaford acknowledges that the expansion of urban services dangerously strained city budgets and that graft embezzlement overcharging and payroll padding presented serious problems throughout the period The dissatisfaction with city governments arose however not so much from any failure to achieve concrete results as from the conflicts between those hostile groups accommodated within the newly created system For persons of principle and gentlemen who prized honor it seemed a failure yet American municipal government left as a legacy such achievements as Central Park the new Croton Aqueduct and the Brooklyn Bridge monuments of public enterprise that offered new pleasures and conveniences for millions of urban citizens

Old Growth Urban Forests Robert E. Loeb, 2011-08-26 Millions of urbanites never see primeval forests during their lives except for the old growth forests found in urban parks Unfortunately these forests are on the verge of disappearing because arboreal reproduction is lost to human trampling and park administrators and urban foresters do not maintain these natural forests To aid urban foresters and park managers in meeting the challenges research on old growth forests in urban parks is synthesized in terms of historical ecology to introduce the methods utilized to reveal long term forest composition changes The case study of three stands in Fairmount Park Philadelphia PA relates pre chestnut blight tree species densities and post chestnut blight arboreal changes to fire and visitor trampling The information gained on how urban old growth forests have developed and changed is used to develop restoration ecology based frameworks to restore species composition and address challenges to forest survival including invasive species
