**Faith in Science** Mark Richardson, Gordy Slack, 2005-07-05 Through intimate conversations with some of the world's most distinguished scientists including two Nobel Laureates *Faith in Science* invites us to explore the connections between scientific and religious approaches to truth. Subjects range from the existence and nature of God to the role of spirituality in modern science. The result is a clear account of how two major cultural forces can work together to offer unique insights into questions of existence.

*Faith in Science* Mark Richardson, Gordy Slack, 2005-07-05 **PUBLICITY TITLE** The high profile Science and the Spiritual Quest project has received strong media attention featuring in Time magazine and on the front cover of Newsweek. Popular science and the science religion debate are hot topics at the moment. The interviews in this volume include the most eminent scientists in their respective fields. **A Manual for Creating Atheists** Peter Boghossian, 2014-07-01 For thousands of years the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed the faithful often view converting others as an obligation of their faith and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried and true tradition of religious evangelism *A Manual for Creating Atheists* offers the first ever guide not for talking people into faith but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality and ultimately embrace reason.
