and chloroform rag and bottle days onwards through cyclopropane trichloroethylene relaxants and lytic cocktails to halothane The only operation mentioned of which I have no practical experience is thymectomy and removal of an argentaffinoma I have never knowingly encountered malignant hyperpyrexia but had one experience of what we called ether convulsions with hyperpyrexia which could have been and probably was the same thing An attempt has been made to arrange the book in four logical sections It begins with the hazards of preparation assessment of risks to patients particularly but Part I also includes chapters on medicolegal and occupational hazards to anaesthetists
