Mr. Shanaka J. Peiris, Mr. Jean A. P. Clément, 2008-05-01 Mozambique is an economic success story in sub-Saharan Africa. Its remarkable achievements offer valuable lessons to other low-income countries in a post-stabilization economic phase, including how they can efficiently manage a scaling up of foreign aid aimed at poverty reduction. Of special interest to other sub-Saharan countries are the book's discussions of Mozambique's progress toward consolidating macroeconomic and financial stability and the challenges it faces in ensuring long-term sustainability, creating a virtuous cycle of natural resource use, and implementing second-generation structural reforms to sustain its growth. This book also provides a summary of the most recent research on issues related to post-stabilization economics in SSA. **Conference Proceedings of 2022 2nd**

International Joint Conference on Energy, Electrical and Power Engineering Cungang Hu, Wenping Cao, 2023-08-02 This book will be a collection of the conference manuscripts presented at the 2022 2nd International Joint Conference on Energy, Electrical and Power Engineering, covering new and renewable energy, electrical and power engineering. It is expected to report the latest technological developments in the fields developed by academic researchers and industrial practitioners. The application and dissemination of these technologies will benefit the research community as new research directions are becoming increasingly interdisciplinary, requiring researchers from different research areas to come together and share ideas. It will also benefit the electrical engineering and energy industry as we are now experiencing a new wave of industrial revolution, i.e., the electrification, intelligentization, and digitalization of our transport, manufacturing processes, and way of thinking. **Malaysia, International Trade and Industry Report**, 2001 **Catalogue for the Academic Year**

Ayeh, 2021-09-20 *Spaces of Responsibility* explores the role of ethics in re-ordering extractive relations under the global condition. Through an empirical investigation of actors, places, and ideas in and around Burkina Faso's industrial gold mining sector, this volume carries out an anti-essentialist yet critical examination, offering new insights into global mining capitalism. Corporate concession-making practices, the implementation of national mining legislation, and civil society interventions in mining areas all contribute in different ways to the dialectics of the global. Accordingly, the ongoing territorialization of mining investment often has considerable impacts on the well-being of populations in the Global South. At the same time, multinational corporations today cannot completely distance or isolate themselves from the political, economic, and social contexts they are interacting in and with. Drawing on theoretical debates about the links between resource extraction and socio-economic development, multi-scalar negotiations of ethics in mining governance are ethnographically retraced. In terms of gains and benefits, these negotiations manifest themselves spatially, providing access for some actors while excluding others. **TURKISH ECONOMIC ASSOCIATION INTERNATIONAL CONFERENCE ON ECONOMICS ICE-TEA 2018**

and weaknesses of APEC's soft institutionalism and its capstone policy report identifies reforms that would close the credibility gap between APEC's promises and accomplishments. Leading scholars at APEC Study Centres investigate APEC's core agenda and delve into the inner workings of bureaucracy. Handbook of Input-Output Economics in Industrial Ecology Sangwon Suh, 2009-05-13. Industrial Ecology (IE) is an emerging multidisciplinary field. University departments and higher education programs are being formed on the subject following the lead of Yale University, The Norwegian University of Science and Technology (NTNU), Leiden University, University of Michigan at Ann Arbor, Carnegie Mellon University, University of California at Berkeley, Institute for Superior Technology in Lisbon, Eidgenössische Technische Hochschule (ETH) Zürich, and The University of Tokyo. IE deals with stocks and flows in interconnected networks of industry and the environment which relies on a basic framework for analysis. Among others, Input-Output Analysis (IOA) is recognized as a key conceptual and analytical framework for IE. A major challenge is that the field of IOA manifests a long history since the 1930s with two Nobel Prize Laureates in the field and requires considerable analytical rigor. This led many instructors and researchers to call for a high quality publication on the subject which embraces both state-of-the-art theory and principles as well as practical applications.
