Due to the increasing linkage of global production sites the concept of commodity chains has become indispensable for the investigation of production at a global scale. Although work is the basis of production in every involved location it is often being neglected as a research subject without taking interest in the workers, the work processes and the working conditions. This edited volume provides a collection of historical and contemporary commodity chain studies by placing labor at the centre of analysis. A global historical perspective demonstrates that splitting production processes to different hierarchically connected locations are by no means new phenomena. The book is thus an important and valuable contribution to commodity chain research but also to the fields of social economic and global labour history. German Communism, Workers' Protest, and Labor Unions Larry Peterson, 2013-03-07. This book analyzes how a sizable group of German workers came to support Communism and how they in turn influenced the emergence and development of the German Communist Party (KPD) in its formative period as a mass party. It reconstructs the interaction between a party and the constituency to which it appealed within the constraints and opportunities set by social structures, economic conditions and political competitors. This interaction revolved around the elaboration and implementation of a specific concept of revolutionary politics and this study investigates both the rise of the KPD as a mass party and its failure to set off a socialist revolution in the early 1920s in light of the contradictory ways German workers responded to its revolutionary strategy. When I began to study the KPD in the mid 1970s, scholarly works in the West portrayed a party so out of touch with the realities of German life from 1918 to 1933 that its history was a litany of political mistakes that led from crisis to catastrophe. The KPD was dominated by the foreign policy interests of the Soviet Union, by factional disputes and personal rivalries among the leadership, by an authoritarian centralized party structure that stifled rank and file initiative and imposed a party line determined in Moscow and Berlin, and by a rigid ideology largely irrelevant to trends in German economy, society and politics with at best compensatory value for a minority of the most impoverished workers.

Endless Holocausts David Michael Smith, 2023-01-01. An argument against the myth of American exceptionalism. *Endless Holocausts* Mass Death in the History of the United States Empire helps us to come to terms with what we have long suspected: the rise of the U.S. Empire has relied upon an almost unimaginable loss of life from its inception during the European colonial period to the present. And yet in the face of a series of endless holocausts at home and abroad, the doctrine of American exceptionalism has plagued the globe for over a century. However much the ruling class insists on U.S. superiority, we find ourselves in the midst of a sea change. Perpetual wars, deteriorating economic conditions, the resurgence of white supremacy and the rise of the Far Right have led millions of people to abandon their illusions about this country. Never before have so many people rejected or questioned traditional platitudes about the United States. In *Endless Holocausts*, author David

Michael Smith demolishes the myth of exceptionalism by demonstrating that manifold forms of mass death far from being unfortunate exceptions to an otherwise benign historical record have been indispensable in the rise of the wealthiest and most powerful imperium in the history of the world. At the same time Smith points to an extraordinary history of resistance by Indigenous peoples, people of African descent, people in other nations brutalized by U.S. imperialism, workers and democratic minded people around the world determined to fight for common dignity and the sake of the greater good. "Labor is Not a Commodity!" Philipp Reick, 2016. The past decades witnessed a powerful return of struggles against what economic historian Karl Polanyi termed the commodification of social life. This book explores how organized workers in two metropolises of the late nineteenth century responded to the commodification of labor. In doing so it reveals a striking continuity in collective opposition against the unfettered power of free markets. Drawing on contemporary feminist revisions of Polanyian thought, this book illustrates the ambiguous potential of movements for social protection. Back cover. COVID-19 and Women's Health, 2nd edition Stephen Kennedy, Laura A. Magee, Stacey A. Missmer, Jayashri Kulkarni, Vassiliki Benetou, Marianne Vidler, Chelsea Morroni, 2023-02-07. As a result of the Coronavirus disease COVID-19 pandemic the world is facing one of the greatest challenges we have experienced in over a century. The economic consequences for society at large are potentially catastrophic. The health and social care sectors have reacted by providing emergency care on an unprecedented scale while the scientific community has focused on developing new treatments and a vaccine to prevent future waves of the pandemic. Evidence is emerging to suggest that certain conditions such as obesity and hypertension predispose some individuals to a worse outcome if they become infected and that women may be less likely to die from COVID-19 than men. It is also currently believed that pregnant women are at no greater risk than the general population. There is an urgent need to determine whether these early observations are correct. Furthermore we need to be sure that pregnancy outcomes are not affected by COVID-19 and that SARS-CoV-2 is not transmitted to the fetus during pregnancy or labour nor to the infant through breast milk. There are so many questions that need to be answered to optimise care, avoid harm, reduce anxiety amongst women and their families and inform health professionals and policymakers. We also need to understand the unintended consequences of the global lockdown on women's health in general. For example, have rates of domestic violence risen to what extent has women's mental health been affected and have women successfully adapted or devised new coping mechanisms? Have women been denied access to gynaecological treatments during the lockdown including safe abortion and if so with what impact on their health and wellbeing? Has the female work force suffered disproportionately in economic terms? Have national and international recommendations and policies been sufficiently gender neutral? Have breastfeeding rates been adversely affected? Will COVID-19 make attainment of the UN SDGs more difficult etc. In keeping with the Scope Mission of Frontiers in Global Women's Health, this Research Topic aims to provide a multi-disciplinary platform to answer important COVID-19 related questions that specifically impact upon women's health and wellbeing, particular in resource poor settings.
