English Language Learners' Socially Constructed Motives and Interactional Moves Thomas A. Williams,2019-01-22 This book explores the potential for task based language learning and teaching TBLT within a particular

context specifically Hungary by investigating beliefs among Hungarian university students about English and other foreign language teaching. It also examines the nature of these learners' task-based spoken interaction and explores their socioculturally determined choices in that regard. It finds that despite much exposure to traditional classroom practices the learners are generally open to TBLT, make various sometimes surprising contributions in performing speaking tasks and display a tendency toward collaboration in spoken interaction over communication breakdowns. The book offers both universal and culture-specific explanations for this tendency. The findings detailed here have implications for English and other foreign second language teaching which may be of interest to researchers, practitioners and teacher educators not only in Hungary, Central Europe and similar educational contexts but anywhere that teachers and learners are struggling to improve foreign and second language development. *RELC Journal*, 2000

Ta(l)king English: Phonetics Across Frontiers
 Biljana Čubrović, Tatjana Paunović, 2009-10-02

Highlighting some interesting and intriguing aspects of English phonetics and phonology from a variety of perspectives, this book brings up a number of empirical questions in order to emphasize the necessity of taking a very broad view of what spoken English means in today's socio-cultural context. English has become a truly global means of communication used as a first, second or additional language by millions and millions of diverse speakers in a multitude of different communicative contexts so that the very notions of native and non-native seem to have changed profoundly as have the notions of central, peripheral and standard, non-standard with regard to English varieties spoken around the globe. Therefore, today more than ever before, in studying English phonetics many small research steps need to be taken to provide diverse and broad empirical data from as many different standpoints as possible. This collection indeed looks at English phonetics from a wide spectrum of perspectives including those of native or EFL speakers, language varieties, L2 language teaching and learning as well as language contact, development and change. *Cultural Mediation in Language Learning and Teaching*, Geneviève Zarate, Council of Europe, European Centre for Modern Languages, 2004-01-01

This project attempts to tackle several challenges to experience the variety of different teaching cultures as a source of innovation rather than as an obstacle to adopt a pluridisciplinary approach by introducing references taken from the social sciences in order to develop reflection on the role of languages in social cohesion, to try and provide answers to a question hitherto rarely raised in the didactics of languages and cultures, namely the place of cultural mediation itself.
