King,Linda F. Selzer,2016-04-30 This collection contributes to scholarly discussions about the African American novel as a literary form Essays respond to the general question what has been the impact of the African American vernacular tradition from the spirituals blues gospel and jazz to hip hop on the structure and style of the modern African American novel In the Mirror of the Past Tomasz Ratajczak,Bogdan Trocha,2014-09-26 These days we are ever more often confronted by overwhelming events Searching for a way to understand them we turn to mythic archetypes still present in our culture The authors of these essays pose questions about the reliability of the archetypes found in tradition history and scattered mythologemes The essays in this collection deal with the presence of mythic time in modern speculative fiction such as fantasy and alternate histories and discuss major mythologemes and their functions in popular literature and extra literary reality The authors show how mythopoeic fiction becomes a genetically modified mythic mirror in which we hope to see answers to vexing questions or just a reality superior to the ordinary one In the Mirror of the Past Of Fantasy and History is a collection of seven essays by American and Polish authors including Brian Attebery Terri Doughty and Marek Oziewicz with Mircea Eliade s concept of return from history to History as their underlying theme *Inlets of the Soul* Pierre François,2021-11-01 The relationship of myth to literature has largely been overshadowed in contemporary theory by perspectives of a linguistic or sociological orientation and by relativist sometimes negatory stances on all searches for meaning This book attempts to show that myth criticism and critical theories of more recent provenance are not irreconcilable While taking into consideration some of the more influential tenets of structuralist post structuralist Marxist and feminist theory it applies a post Jungian archetypal approach to illustrating the perennial nature of a particular myth the Fall of Man in two main traditions Mesopotamian and Christian and in the contemporary novel in English The discussions of five major novels by William Golding Patrick White Martin Amis Salman Rushdie and Wilson Harris not only serve to expand the mythological insights achieved in the first part of the book they also suggest the incommensurability of imaginal novelistic life with mythology s age old intuitions about the human condition Myth criticism emerges from this book as an irreplaceable vantage point from which man s lapsarian predicament can be scrutinized synchronically as archaic wisdom contemporary anxiety and post colonial commitment to the building of a new human city The Monomyth Reboot Nadia Salem,2023-12-12 In this book Nadia Salem examines and questions the

enduring relevance of the monomyth or the hero's journey for storytellers and their audiences Created by Joseph Campbell and largely popularized by George Lucas the hero's journey has come to define mythic quests for all However in recent years this genderless paradigm has lost its appeal as a repetitive Bildungsroman and as a result Salem argues for the inclusion of the heroine's journey as a Kinstlerroman and a voice of alterity Where the hero's journey reflects a coming of age the heroine's journey reflects a coming of middle age which are arguably equally necessary for the complete fulfillment of character Taking a fresh look at the monomyth Salem analyzes the narratives of Eros and Psyche Jane Eyre and Titanic to argue for an emphasis on the integration of both the hero's and the heroine's journeys Ultimately this book demonstrates how the monomyth as rebooted turns monomythic mythopoeisis into fertile ground for the kinds of epiphanies demanded by transmodernism Scholars of film studies communication composition and mythology will find this book of particular interest

Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics the multidimensionality immateriality and non locality of the unified field of energy and information as a virtual reality As a result a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails Exploring the Collective Unconscious in a Digital Age investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape This book presents the idea that if the digital media sphere proves to be structurally and functionally analogous to a dreamscape the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science This pivotal research based publication is ideally designed for use by psychologists theorists researchers and graduate level students studying human cognition and the influence of the digital media revolution Repair the World Alexandre Gefen, 2024-08-19 Talk of repair has become ubiquitous in recent years In the age of trauma culture art and literature have a new purpose to do justice to console comfort and heal Drawing on works of twenty first century French language literature this monograph shows how literature can not only serve as a means of personal development but expand our capacity for empathy help repair the brokenness implied in victimhood and redress individual and collective traumas Centered on a critical reflection on discourses of repair and reparations it questions the canonical theories on the functions of literature and proposes a new way of writing and reading literary history Praise Repair the World is an invigorating and essential call to arms The modern category of the literary it declares is being outpaced by the contemporary uses of literature as a medium of exorcism empathy reparation testimony commemoration existential renewal and ethical or political connectivity Neither celebrating nor condemning such uses Gefen models a much needed style of criticism interdisciplinary pragmatic relational that comes to grips with their importance Rita Felski the John Stewart Bryan Professor and Professor of English at the University of Virginia USA In an era where self help memoir and autobiography command more than their fair

Mary Harrell unflinchingly greets a cast of imaginal figures who inhabit her life and encourages all of us to welcome their wisdom into our own inner landscapes. These very real beings dwell in a realm between matter, nature and mind, reason appearing in dreams, intuitive callings, visions, feelings and sometimes frightening events. Mary offers her own intimate experiences through which she explores and engages these figures, showing her readers how to host these beings as one would host invited guests. From the work of philosopher Henry Corbin, psychiatrist C. G. Jung and psychologist James Hillman, we know that the name of the realm in which these figures dwell is the *mundus imaginalis* or the imaginal world. As this is a work in which archetypes are grounded in experience, *Imaginal Figures In Everyday Life: Stories from the World between Matter and Mind* is both a path to individual transformation and, in the words of psychologist Robert Romanyshyn, a therapy of culture. Mary Harrell, Ph.D., a Jungian-oriented psychotherapist and New York licensed psychologist, received her Ph.D. in Clinical Psychology with Emphasis in Depth Psychology from Pacifica Graduate Institute in Carpinteria, California. She is Curriculum and Instruction Associate Professor Emerita at State University of New York SUNY at Oswego. While at the university, she taught education and psychology courses and served as Professional Development Schools (PDS) specialist supporting the National PDS initiative, which builds bridges between elementary and secondary schools and the university's School of Education. Her writings in the areas of educational reform and imaginal psychology appear in four invited chapters in edited books. In 2014, Mary's poetry was anthologized in Syracuse University's *The Stone Canoe: A Journal of Arts, Literature and Social Commentary*, No. 8. She lives with her husband, Stephen, in South Carolina.

Pierre Teilhard de Chardin and Carl Gustav Jung: Side by Side, Fred Gustafson, 2015-03-21. *Pierre Teilhard de Chardin and C. G. Jung: Side by Side* is an anthology written by authors from different backgrounds sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and/or how they understand the relevance of these two men for our present times. Contributors to this fourth volume of the Fisher King Review include John Dourley, Peter Dunlap, Barbara Faris, Fred R. Gustafson, John Giannini, Richard W. Hanhardt, Robert Henderson, Steven B. Herrmann, Jane A. Kelley, Jon Magnuson, Francisco Paco Martorell, Stan V. McDaniel, Dennis L. Merritt, and Laura A. Weber. Though C. G. Jung and Pierre Teilhard de Chardin never met, their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the foreground of needing to understand and integrate on a planetary level the core values of their expansive work. Both Jung and de Chardin were concerned with science and religion and operated within these paradigms. Both of them shook the world by offering up views on one hand of the profound depths of the human psyche and on the other, presenting a profound re-consideration of evolution as a process leading toward a social unification of the planet. One used the concept of individuation; the other spoke of evolution. Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them. Both had conflicts in their chosen fields. Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology, world religions, folk

tales dreams and human behavior Chardin used the ground of religion to work in the field of science via paleontology geology and physics as he explored a deeper and relevant understanding of evolution Though each began from different intellectual platforms they each crisscrossed into the other s territory of inquiry and related their ideas to include the full scope of humanity One went deeply into soul and found matter whereas the other went deeply into matter and found soul In their own ways both spent their careers trying to heal the split between spirit and matter in the weltanschauung of their times reflected in the human psyche and in the general religious views permeating most of Western culture
