remediation have been seen in the past by scientists as two independent green technologies employing separately either
microorganisms bacteria and or fungi or plants to reclaim polluted soil water and air However in the last decade the idea has
emerged that microorganisms and plants can and have to work synergistically to obtain better results in terms of reclamation
performances hence these two technologies have to be considered the different sides of the same coin Therefore a single
term can be used to refer to both of these technologies bio remediation The Research Topic articles collected in this eBook
report the isolation and characterization of bacteria fungi and endophytes with Plant Growth Promoting features Moreover
some of these microorganisms have been added to plants to ameliorate their health status when grown in polluted soils and
waters or to realize and improve the water reclamation performance of Constructed Wetlands a very interesting application
of the bio remediation process *Fiscal Monitor, October 2013* International Monetary Fund. Fiscal Affairs
Dept.,2013-10-09 Persistently high debt ratios in advanced economies and emerging fragilities in the developing world cast
clouds on the global fiscal landscape In advanced economies with narrowing budget deficits the average public debt ratio is
expected to stabilize in 2013 14 but it will be at a historic peak At the same time fiscal vulnerabilities are on the rise in
emerging market economies and low income countries on the back in emerging market economies of heightened financial
volatility and downward revisions to potential growth and in low income countries of possible shortfalls in commodity prices
and aid Strengthening fiscal balances and buttressing confidence thus remain at the top of the policy agenda Against that
backdrop this issue explores whether and how tax reform can help strengthen public finances Taxation is always a sensitive
topic and is now more than ever at the center of policy debates around the world Can countries tax more better more fairly
Results reported in this issue show that the scope to raise more revenue is limited in many advanced economies and where
tax ratios are already high the bulk of the necessary adjustment will have to fall on spending In emerging market economies
and low income countries where the potential for raising revenue is often substantial improving compliance remains a central

Bills of Health Richard Lawson,2018-04-19 Why is it that NHS workers are continually complaining that the service is
 underfunded while the Government claims that it is increasing NHS funding year on year in real terms Is someone being
 economical with the truth or is there a deeper explanation Richard Lawson shows that at least one fifth of the NHS clinical
 budget is spent on trying to cure illness caused by unemployment poverty bad housing and environmental pollution The NHS
 has been falling behind in the race to keep up with deteriorating health caused by worsening social and environmental
 conditions Bills of Health offers treatment as well as diagnosis It identifies what needs to be done to rectify the causes of our
 ill health and how this could be achieved through the creation of between one and two million jobs in the UK Jobs that
 include worthwhile work in housing public transport and environmental protection as well as caring for people Bills of Health
 draws up balance sheets that show not only can we afford to finance this work but that we cannot afford not to
