Qasrawi,Haleama Al Sabbah,2023-07-31 All aspects of feeding and nourishing people growing harvesting packaging processing transporting marketing and consuming food are part of the food system Even before the COVID 19 pandemic food systems faced many challenges such as hunger increases which affected up to 811 million people as of 2020 while healthy diets were unaffordable for at least 3 billion people More than 80% of the population affected by hunger and 95% of people unable to afford a healthy diet were found in Asia and Africa Transformation of the global food system is clearly needed if we wish to embed equity sustainability and health as priorities in food provision and consumption Some of these transformations

will be facilitated through new technologies while others will require public policy shifts changes in the private agro food industry actions by civil society and behavioral changes by individuals In this dynamic context technology actors and the consumers they serve sit at an important nexus within the food system and have the potential to make decisions that cut across the challenges and opportunities to improve sustainable food system outcomes Although food security has improved in developed countries many countries particularly low to middle income countries LMIC suffer from significant food insecurity challenges In addition food production accessibility and availability have been further impacted due to the COVID 19 outbreak causing growing global concerns regarding food security especially within the most vulnerable communities Moreover the transformation of food systems for addressing healthy nutrition food insecurity and public health issues is a global concern Food security and nutrition systems are directly related to human well being and global stability particularly in a time when diets transition toward increased reliance upon processed foods increased fast food intake high consumption of edible oils and sugar sweetened beverages lack of physical activities and increased lifestyles worldwide These changes in lifestyle continue to contribute to the growing pandemic of non communicable diseases such as obesity diabetes hypertension and cardiovascular diseases are clearly noticed across the globe The study of nutrition systems food security and the roles of technological advances especially in LMIC is considered the major factor in understanding food transition and population health Physical inactivity threatens LMIC public health as it is a prime behavioral risk factor associated with major non communicable diseases such as coronary heart disease type 2 diabetes and breast and colon cancer Its long term impacts increasingly burden national economies Decreasing its prevalence is paramount toward decreasing premature mortality and restoring healthy populations In its most recent iteration of a global action plan for the prevention of non communicable diseases the World Health Organization established voluntary global targets to reduce physical inactivity by 10% Currently limited published systematic analysis of physical inactivity prevalence among Muslim majority countries exists Existing literature is concentrated on Arab countries which represent less than half of all Muslim nations To date however pan Islamic physical inactivity data have not been reported Doing so can potentially galvanize religion specific agencies e g Islamic Relief Worldwide Organization of Islamic Cooperation to support efforts aimed at decreasing physical inactivity **New Horizons**

Barlow, 2020-09-18 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office [frontiersin.org](mailto:frontiersin.org) about contact *Data Mining for the Social Sciences* Paul Attewell, David Monaghan, 2015-05-01 We live today in world of big data The amount of information collected on human behavior every day is staggering and exponentially greater than at any time in the past At the same time we are inundated by stories of powerful algorithms capable of churning through this sea of data and uncovering patterns These techniques go by many names data mining predictive analytics machine learning and they are being used by governments as they spy on citizens and by huge corporations as they fine tune their advertising strategies

And yet social scientists continue mainly to employ a set of analytical tools developed in an earlier era when data was sparse and difficult to come by In this timely book Paul Attewell and David Monaghan provide a simple and accessible introduction to Data Mining geared towards social scientists They discuss how the data mining approach differs substantially and in some ways radically from that of conventional statistical modeling familiar to most social scientists They demystify data mining describing the diverse set of techniques that the term covers and discussing the strengths and weaknesses of the various approaches Finally they give practical demonstrations of how to carry out analyses using data mining tools in a number of statistical software packages It is the hope of the authors that this book will empower social scientists to consider incorporating data mining methodologies in their analytical toolkits Provided by publisher Machine and Deep Learning in Oncology, Medical Physics and Radiology Issam El Naqa, Martin J. Murphy, 2022-02-02 This book now in an extensively revised and updated second edition provides a comprehensive overview of both machine learning and deep learning and their role in oncology medical physics and radiology Readers will find thorough coverage of basic theory methods and demonstrative applications in these fields An introductory section explains machine and deep learning reviews learning methods discusses performance evaluation and examines software tools and data protection Detailed individual sections are then devoted to the use of machine and deep learning for medical image analysis treatment planning and delivery and outcomes modeling and decision support Resources for varying applications are provided in each chapter and software code is embedded as appropriate for illustrative purposes The book will be invaluable for students and residents in medical physics radiology and oncology and will also appeal to more experienced practitioners and researchers and members of applied machine learning communities *German Medical Data Sciences: Visions and Bridges* R. Röhrig, A. Timmer, H. Binder, 2017-09-26 We live in an age characterized by computerized information but ubiquitous information technology has profoundly changed our healthcare systems and if not adequately trained to deal with it healthcare professionals can all too easily be overwhelmed by the complexity and magnitude of the data This demands new skills from physicians as well as novel ways to provide medical knowledge Selecting and assessing relevant information presents a challenge which can only be met by bridging the various disciplines in healthcare and the data sciences This book presents the proceedings of the 62nd annual meeting of the German Association of Medical Informatics Biometry and Epidemiology German Medical Data Sciences GMDS 2017 Visions and Bridges held in Oldenburg Germany in September 2017 The 242 submissions to the conference included 77 full papers of which 42 were accepted for publication here after rigorous review These are divided into 7 sections teaching and training epidemiological surveillance screening and registration research methods IT infrastructure for biomedical research data integration centers healthcare information systems interoperability standards terminologies classification and biomedical informatics innovative algorithms and signal processing The book provides a vision for healthcare in the information age and will be of interest to all those concerned with improving clinical decision making and

the effectiveness and efficiency of health systems using data methods and technology
