**Herbert Spencer** John Offer,2000 This set traces Herbert Spencer s influence from his contemporaries to the present day Contributions come from across the social science disciplines and are often taken from sources which are difficult to access **The Victorian Church, Part Two** Owen Chadwick,2010-04-01 Professor Chadwick completes his study of the Victorian Church with detailed accounts of the problems which confronted the Church in the latter part of the nineteenth century the question of science and religion the acceptance of biblical criticism the Church in village and town changes in the attitude to the episcopacy relationship with the Roman Catholics and the growth of secularization The material is organized in masterly fashion the style of writing is characteristically engaging and the innumerable sidelights on people in high and low places are as illuminating and relevant as in Part I of this work The two volumes together provide an understanding of the background of many of the problems which the Church faces today For this second edition Professor Chadwick has made many minor revisions to the text and included a number of additional bibliographical references **The Borges Enigma**

Cynthia Lucy Stephens,2021 Borges once stated that he had never created a character It s always me subtly disguised This book focuses on the ways in which Borges uses events and experiences from his own life in order to demonstrate how they become the principal structuring motifs of his work It aims to show how these experiences despite being heavily disguised are crucial components of some of Borges s most canonical short stories particularly from the famous collections Ficciones and El Aleph Exploring the rich tapestry of symmetries doubles and allusions and the roles played by translation and the figure of the creator the book provides new readings of these stories revealing their hidden personal emotional and spiritual dimensions These insights shed fresh light on Borges s supreme literary craftsmanship and the intimate puzzles of his fictions

**Herbert Spencer and the Invention of Modern Life** Mark Francis,2014-12-23 The English philosopher Herbert Spencer 1820 1903 was a colossus of the Victorian age His works ranked alongside those of Darwin and Marx in the development of disciplines as wide ranging as sociology anthropology political theory philosophy and psychology In this acclaimed study of Spencer the first for over thirty years and now available in paperback Mark Francis provides an authoritative and meticulously researched intellectual biography of this remarkable man that dispels the plethora of misinformation surrounding Spencer and shines new light on the broader cultural history of the nineteenth century In this major study of Spencer the first for over thirty years Mark Francis provides an authoritative and meticulously researched intellectual biography of this remarkable man Using archival material and contemporary printed sources Francis creates a fascinating portrait of a human being whose philosophical and scientific system was a unique attempt to explain modern life in all its biological psychological and sociological forms Herbert Spencer and the Invention of Modern Life fills what is perhaps the last big biographical gap in Victorian history An exceptional work of scholarship it not only dispels the plethora of misinformation surrounding Spencer but shines new light on the broader cultural history of the nineteenth century

Elegantly written provocative and rich in insight it will be required reading for all students of the period

**The Myths We Live By** Mary Midgley, 2011-04 With a new Introduction by the author An elegant and sane little book The New Statesman Myths as Mary Midgley argues in this powerful book are everywhere In political thought they sit at the heart of theories of human nature and the social contract in economics in the pursuit of self interest and in science the idea of human beings as machines which originates in the seventeenth century is a today a potent force Far from being the opposite of science however Midgley argues that myth is a central part of it Myths are neither lies nor mere stories but a network of powerful symbols for interpreting the world Tackling a dazzling array of subjects such as philosophy evolutionary psychology animals consciousness and the environment in her customary razor sharp prose The Myths We Live By reminds us of the powerful role of symbolism and the need to take our imaginative life seriously Mary Midgley is a moral philosopher and the author of many books including Wickedness Evolution as a Religion Beast and Man and Science and Poetry All are published in Routledge Classics

The Coming Church John Hunter, 1905

**Bodies/Machines** Iwan Rhys Morus, 2002-12-01 It is hard to believe that the pursuit of artificial intelligence is not a phenomenon of the twentieth century For over three hundred years the boundaries between bodies and machines the natural and the artificial the animate and the inanimate have been passionately explored These explorations beginning in the seventeenth and eighteenth and increasing during the nineteenth century have been all but forgotten lost beneath the commotion of the modern day world This book retrieves these lost histories giving voice to the hopes dreams and fears of philosophers medical practitioners engineers craftsmen and artisans who have all been fascinated by the interface between bodies and machines The journey back in time unfolds with the mysterious advent of mechanical philosophies which conceptualized the body and the surrounding world largely in terms of mechanistic interactions These theories develop in intriguing directions and fuel experiments in such areas as material production and social punishment spiritualism and mental health From reanimating dead bodies with electricity which led to the introduction of the electric chair through to the use of machines to render hysterics and the insane fit for reintroduction into society this book conveys the dark truths behind our relationship with machines This book is not only an exceptional contribution to the history of technology but also to contemporary debates about humans and machines

*Auguste Comte: Volume 3* Mary Pickering, 1993 This volume explores the life and works of Auguste Comte from 1852 to 1857 and the impact of his positivist philosophy and Religion of Humanity

**Free Will and the Human Sciences in Britain, 1870-1910** Roger Smith, 2015-07-28 From the late nineteenth century onwards religion gave way to science as the dominant force in society This led to a questioning of the principle of free will if the workings of the human mind could be reduced to purely physiological explanations then what place was there for human agency and self improvement Smith takes an in depth look at the problem of free will through the prism of different disciplines Physiology psychology philosophy evolutionary theory ethics history and sociology all played a part in the debates

that took place His subtly nuanced navigation through these arguments has much to contribute to our understanding of Victorian and Edwardian science and culture as well as having relevance to current debates on the role of genes in determining behaviour
