Little Blue Of Ufos:

UFOs Robert Powell, 2024-04-02 Robert Powell a founding Board member of the Scientific Coalition for UAP Studies has studied the UFO subject for 17 years His work is encapsulated in *UFOs A Scientist Explains What We Know And Don't Know* which provides a scientific rationale for the reality of non terrestrial craft that are intelligently controlled Powell begins his book by familiarizing the reader with the history of UFOs and he identifies the more enigmatic and interesting UFO sightings He examines the characteristics of these sightings that argue against a prosaic explanation extreme acceleration electromagnetic interference bending light no obvious propulsion mechanisms and a lack of interaction with the atmosphere Powell discusses the recent events that have caused our government to change the term from UFO to UAP Included is information never before released indicating the government possesses not just two videos but five videos from 2015 of UFOs operating in the vicinity of the USS Roosevelt nuclear aircraft carrier Powell's later chapters in the book discuss the extraterrestrial hypothesis considering the thousands of exoplanets that have been discovered in the last twenty years Powell challenges the reader to consider all the implications that must be considered if intelligent life discovers us first He looks at how we as individuals and as a society react to UFOs He documents actions taken by our military that include instances when we have fired on UFOs Powell argues that it is time for a change in the study of UFOs The phenomenon has been with us for 75 years and we have learned very little as the decades have passed The author makes the case for what needs to be done going forward The solution he proposes will require a paradigm shift

UFOs, the Absurd, and the Limit of Anthropological Knowledge Diana Espírito Santo,2024-09-20 This book offers an ethnographic and conceptual analysis of contemporary UFO phenomena focusing specifically on Chilean ufology and the ufological absurd nonsensical instances for their experiencers in which there is no conceptual way out It asks how anthropology can come to terms with what is not said what is not known what is in the dark or even with what both is and is not The work draws on three years of participant observation with empirical ufologists amateur sky watchers and contactees of varying kinds in Chile The chapters mobilize three main bodies of literature to elucidate the ufological absurd negative theology anthropology of play and deceit and the physics of dark matter They explore notions of parallax paradox and trickster anthropology The author takes UFO phenomena specifically the absurd aspects as a heuristic with which to posit a conversation between domains a conversation which highlights darknesses finiteness and the limits of representation and media in anthropology one that could perhaps signal the route to a new language Consideration is given to how not knowing can be a space of extreme productiveness for the discipline The argument put forward is that only by doing an anthropology that looks outside of itself for conceptual inspiration can we come to terms with the non representable the un conceptualizable the fully paradoxical This innovative book will be of particular interest to scholars of anthropological theory and religion

The Super Natural Whitley Strieber, Jeffrey J. Kripal, 2017-09-26 Two of today's maverick authors on anomalous experience present a perception altering and intellectually thrilling analysis of why the paranormal is real but radically different from what is conventionally understood Whitley Strieber *Communion* and Jeffrey J Kripal J Newton Rayzor professor of religion at Rice University team up on this unprecedented and intellectually vibrant new framing of inexplicable events and experiences Rather than merely document the anomalous these authors one the man who popularized alien

abduction and the other a renowned scholar and renegade advocate for including the paranormal in religious studies The New York Times deliver a fast paced and exhilarating study of why the supernatural is neither fantasy nor fiction but a vital and authentic aspect of life Their suggestion That all kinds of impossible things from extra dimensional beings to bilocation to bumps in the night are not impossible at all rather they are a part of our natural world But this natural world is immeasurably more weird more wonderful and probably more populated than we have so far imagined with our current categories and cultures which are what really make these things seem impossible The Super Natural considers that the natural world is actually a super natural world and all we have to do to see this is to change the lenses through which we are looking at it and the languages through which we are presently limiting it In short The extraordinary exists if we know how to look at and think about it
