A Fiery Peace in a Cold War Neil Sheehan,2010-10-05 The US Soviet arms race told through the story of a colorful and visionary American Air Force officer melding biography history world affairs and science to transport the reader back and forth from individual drama to world stage Compulsively readable and important The New York Times Book Review In this never before told story Neil Sheehan winner of the Pulitzer Prize and the National Book Award details American Air Force officer Bernard Schriever s quest to prevent the Soviet Union from acquiring nuclear superiority and describes American efforts to develop the unstoppable nuclear weapon delivery system the intercontinental ballistic missile the first weapons meant to deter an atomic holocaust rather than to be fired in anger In a sweeping narrative Sheehan brings to life a huge cast of some of the most intriguing characters of the cold war including the brilliant physicist John Von Neumann and the hawkish Air Force general Curtis LeMay 15 Minutes L. Douglas Keeney,2011-02-01 Packed with startling revelations this inside look at the secret side of the Cold War exposes just how close America came to total annihilation During the Cold War a flight crew had 15 minutes to get their nuke laden plane in the air from the moment Soviet bombers were detected 15 minutes between the earliest warning of an incoming nuclear strike and the first flash of an enemy warhead This is the chilling true story of the incredibly risky steps our military took to protect us from that scenario including Over two thousand loaded bombers that crossed American skies They sometimes crashed and at least nine times resulted in nuclear weapons being accidentally dropped A system that would use timers and rockets to launch missiles even after everyone was dead Disastrous atmospheric nuclear testing including the horrific runaway bomb that fooled scientists and put thousands of men in uniform in the center of a cloud of hot fallout A plan to use dry lake beds to rebuild and launch a fighting force in the aftermath of nuclear war Based on formerly classified documents military records press accounts interviews and over 10 years of research 15 Minutes is one of the most important works on the atom bomb ever written **On Endings** Daniel Grausam,2011 What does narrative look like when the possibility of an expansive future has been called into question This query is the driving force behind Daniel Grausam s *On Endings* which seeks to show how the core texts of American postmodernism are a response to the geopolitical dynamics of the Cold War and especially to the new potential for total nuclear conflict Postwar American fiction needs to be rethought he argues by highlighting postmodern experimentation as a mode of profound historical consciousness In Grausam s view previous studies of fiction mimetically concerned with nuclear conflict neither engage the problems that total war might pose to narration nor take seriously the paradox of a war that narrative can never actually describe Those few critical works that do take seriously such problems do not offer a broad account of American postmodernism And recent work on postmodernism has offered no comprehensive historical account of

the part played by nuclear weapons in the emergence of new forms of temporal and historical experience On Endings significantly extends the project of historicizing postmodernism while returning the nuclear to a central place in the study of the Cold War

Clinton's Foreign Policy in Russia George A. MacLean, 2017-11-30 Some of Bill Clinton's most basic foreign policy elements democratic peace the post Cold War peace dividend geopolitics and state society relations are epitomized in the US Russian Highly Enriched Uranium HEU Purchase Agreement It was one of the most remarkable initiatives of Clinton's presidency but oddly one of the most obscure that still continues under George W Bush This agreement illustrates how successfully the US and Russia could work together to reduce global nuclear fears but also how a series of decisions pitted global designs over American domestic interests Illustrating one of the most compelling decisions Clinton made as President this remarkable book elucidates the theory of democratic peace and demonstrates a new and more advanced nuclear restraint regime from reduction to elimination The story behind Clinton's decision has repercussions for our understanding of arms control foreign policy decision making and US Russian relations This is a book about the intersection of levels of analysis international security concerns and domestic political economy and as such is ideal as a supplementary text for advanced courses in security and foreign policy

Command and Control Eric Schlosser, 2014-08-26 The Oscar shortlisted documentary Command and Control directed by Robert Kenner finds its origins in Eric Schlosser's book and continues to explore the little known history of the management and safety concerns of America's nuclear arsenal A devastatingly lucid and detailed new history of nuclear weapons in the U S Fascinating Lev Grossman TIME Magazine Perilous and gripping Schlosser skillfully weaves together an engrossing account of both the science and the

politics of nuclear weapons safety San Francisco Chronicle A myth shattering exposé of America's nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America's nuclear arsenal A groundbreaking account of accidents near misses extraordinary heroism and technological breakthroughs Command and Control explores the dilemma that has existed since the dawn of the nuclear age How do you deploy weapons of mass destruction without being destroyed by them That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind While the harms of global warming increasingly dominate the news the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten Written with the vibrancy of a first rate thriller Command and Control interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years It depicts the urgent effort by American scientists policy makers and military officers to ensure that nuclear weapons can't be stolen sabotaged used without permission or detonated inadvertently Schlosser also looks at the Cold War from a new perspective offering history from the ground up telling the stories of bomber pilots missile commanders maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus Arkansas to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view Through the details of a single accident Schlosser illustrates how an unlikely event can become unavoidable how small risks can have terrible consequences and how the most brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America's nuclear age

Historical Dictionary of Arms Control and Disarmament Jeffrey Arthur Larsen, James M. Smith, 2005 Historical Dictionary of Arms Control and Disarmament provides a historical review of key themes and issues in international security and arms control focusing on efforts in the 20th century to control the spread and use of armaments and to prevent war This book summarizes the rich and proud traditions of arms control and disarmament their critical role in ensuring a non catastrophic course throughout history especially the dangerous period of the Cold War and their continuing relevance and role in the emerging post Cold War world It also seeks to reinforce a broad perspective of key terms in order to capture the scope and range of their application yesterday today and tomorrow Given this combined tradition and focus this Dictionary serves two purposes As a historical dictionary it chronicles key terms personalities events and agreements as a ready reference from which to launch a more extensive investigation But it also seeks to capture the breadth of current and future applications by presenting the vocabulary of traditional and non traditional approaches The book includes a large dictionary of more than 1

000 key terms as well as a comprehensive bibliography divided into multiple categories an extensive chronology and a timeline This book can also serve as a useful desk reference for the policy practitioner The pace and intensity of the practice of arms control often eliminates the luxury of conventional study of past or related arms control efforts The dictionary seeks to provide a relevant sampling of treaty and agreement details and of the specific terms of reference of arms control to allow productive progress in a policy work environment Researchers and students will also find the dictionary to be a useful reference tool Much of the formal literature in the field such as treaty texts and policy pronouncements is written in technical language without elaboration Also many references to agreements are posed in shorthand intended only for the policy practitioner

Documenting World Politics Rens Van Munster, Casper Sylvest, 2015-02-11 As a central component of contemporary culture films mirror and shape political debate Reflecting on this development scholars in the field of International Relations IR increasingly explore the intersection of TV series fiction film and global politics So far however virtually no systematic scholarly attention has been given to documentary film within IR This book fills this void by offering a critical companion to the subject aimed at assisting students teachers and scholars of IR in understanding and assessing the various ways in which documentary films matter in global politics The authors of this volume argue that much can be gained if we do not just think of documentaries as a window on or intervention in reality but as a political epistemology that like theories involve particular postures strategies and methodologies towards the world to which they provide access This work will be of great interest to students and scholars of international relations popular culture and world politics and media studies alike

Now Vincent Lavoie, 2003-01-01 While the crisis that took place in photojournalism during the 1960 s brought about a significant shift in the practices discourses and institutional structures of press photography it also affected the practices of artists specifically with regard to work devoted to revitalizing the depiction of events The art world attempted to revitalize the historical genre by undertaking its critical rereading in the spirit of restoring a tradition diminished by the mass media The problem may be expressed in these terms How can history be depicted bearing in mind that the media mainly photojournalism and the electronic press have claimed a monopoly of the genre unto themselves At issue is the sizeable problem of mass media omnipotence as an obligatory referential universe for historiographical artistic practices Today it seems impossible to depict the event in any way other than by accentuating or eschewing the formal attributes rhetorical artifices and ideological precepts of the mass media These approaches to addressing historical moments have been examined in this article both because they epitomize contemporary historical writing and for the most part they constitute critical responses to stereotyped depictions of events Above all they represent a paradigm shift the mass media s prerogatives for depicting historical moments has shifted towards the field of art Contemporary depictions of catastrophe crimes sensationalist news items terrorist attacks humanitarian disasters genocides common themes in many of the artistic projects represented in the 8th edition of the *Mois de la Photo* a Montreal have been especially striking in this respect For of all contemporary events

catastrophes are the most likely to be spontaneously propelled to the top of the news roster and the most susceptible to the various inflections of contemporary art photography **Bulletin of the Atomic Scientists**, 2003 exlibris Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimization In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences **Weapons of Mass Destruction [2 volumes]** Eric A. was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick The Future of Fallout, and Other Episodes in Radioactive World-Making Joseph Masco, 2020-12-18 In The Future of Fallout and Other Episodes in Radioactive World Making Joseph Masco examines the strange American intimacy with and commitment to existential danger Tracking the simultaneous production of nuclear emergency and climate disruption since 1945 he focuses on the psychosocial accommodations as well as the technological revolutions that have produced these linked planetary scale disasters Masco assesses the memory practices visual culture concepts of danger and toxic practices that in combination have generated a U S national security culture that promises ever more safety and comfort in everyday life but does so only by generating and deferring a vast range of violences into the collective future Interrogating how this existential lag i e the material and conceptual fallout of the twentieth century in the form of nuclear weapons and petrochemical capitalism informs life in the twenty first century Masco identifies key moments when other futures were still possible and seeks to activate an alternative postnational security political imaginary in support of collective life today
