Zelazo,2013-01-15 Research in developmental psychology which examines the history origins and causes of behavior and age
related changes in behavior seeks to construct a complex multi level characterization of behavior as it unfolds in time across
a range of time scales from the milliseconds of reaction time to the days and weeks of childhood the decades of the human
lifespan and even beyond to multiple generations Behavior in this view is embedded within what is essentially a dynamic
system of relations extending deep within individuals Thorough and engaging this handbook explores the impact of this
research on what is now known about psychological development from birth to biological maturity and it highlights the
extent to which the most cutting edge developmental science reflects a new kind of intellectual synthesis one that reveals
how cultural social cognitive neural and molecular processes work together to yield human behavior and changes in human
behavior With insightful contributions from more than 50 of the world s leading developmental scientists these two volumes
will serve as an influential and informed text for students and as an authoritative desk reference for years to come
