## **Faces In A Cloud Subjecti:**

*Faces in a Cloud* George E. Atwood, Robert D. Stolorow, 1993 In this new edition of their now classic work George Atwood and Robert Stolorow explore the ways in which a theory of personality is influenced and colored by the subjective world of the theorist Using psychobiographical analyses of Sigmund Freud Carl Jung Wilhelm Reich and Otto Rank as illustrations the authors show how the central constructs of personality theories universalize their creators personal solutions to the nuclear crises and dilemmas of their own life histories Illuminating the subjective origins of a personality theory does not invalidate the theory according to Atwood and Stolorow but rather contributes to establishing the scope of the theory as well as its applicability to particular clinical situations The first edition of *Faces in a Cloud* published in 1979 was the seminal work out of which emerged the now influential theory of intersubjectivity a framework that calls for a radical revision of all aspects of psychoanalytic thought This revised edition incorporates significant new material into the psychobiographical analyses and has been completely updated and rewritten to reflect the development of the authors viewpoint The terminology used throughout the book to describe personal worlds of experience has been updated and refined in consonance with this contemporary theoretical perspective The final chapter summarizes key aspects of this new perspective and offers reflections on the subjective origins of intersubjectivity theory itself

**Structures of Subjectivity** George E. Atwood, Robert D. Stolorow, 2014-06-05 *Structures of Subjectivity Explorations in Psychoanalytic Phenomenology and Contextualism* is a revised and expanded second edition of a work first published in 1984 which was the first systematic presentation of the intersubjective viewpoint what George Atwood and Robert Stolorow called psychoanalytic phenomenology in psychoanalysis This edition contains new chapters tracing the further development of their thinking over the ensuing decades and explores the personal origins of their most essential ideas In this new edition Atwood and Stolorow cover the philosophical and theoretical assumptions of psychoanalysis and present a broad approach that they have designated phenomenological contextualism This approach addresses personal subjective worlds in all their richness and idiosyncrasy and focuses on their relational contexts of origin and therapeutic transformation *Structures of Subjectivity* covers the principles guiding the practice of psychoanalytic therapy from the authors viewpoints and includes numerous detailed clinical case studies The book will be essential reading for psychoanalysts practitioners of psychotherapy psychiatrists psychologists counselors and social workers It will also be of interest to scholars and students with an interest in psychoanalytic theory and practice and its philosophical premises

**Learning Technology for Education in Cloud - The Changing Face of Education** Lorna Uden, Dario Liberona, Birgit Feldmann, 2016-07-11 This book constitutes the refereed proceedings of the 5th International Workshop on Learning Technology for Education in Cloud LTEC 2016 held in Hagen Germany in July 2016 The 25 revised full papers presented were carefully reviewed and selected from 51 submissions The papers are organized in topical sections on learning technologies learning tools and environment MOOC for learning problem solving and knowledge transfer case study

**The Intersubjective Perspective** Robert D. Stolorow, George E. Atwood, Bernard Branchaft, 1994 A collection of previously published chapters and papers

**Fantasies of Flight** Daniel M. Ogilvie, 2003-12-11 *Fantasies of Flight* invigorates the field of personality psychology by challenging the contemporary academic view that individuals are best studied as carriers of traits Daniel Ogilvie exchanges a heart to heart case study approach to understanding human behavior for the current strategies of categorizing and comparing individuals according to their manifest traits Ogilvie asks and endeavors to answer questions like What were the psychological conditions that led Sir James Barrie to create a character named Peter Pan and What were the dynamics behind the Marshall Herff Applewhite's conviction that a space ship hiding behind the Hale Bopp comet would rescue him and his Heaven's Gate followers after they enacted a mass suicide pact in 1997 Answering these questions requires him to resurrect old ways to think about personality and old strategies for studying individuals one by one Early in the book Ogilvie reviews the history of why intensive case studies were discredited in psychology and describes how Sigmund Freud's psychobiographical account of Leonardo da Vinci's fascination with flight inadvertently abetted critics of psychoanalytic psychology He then performs a partial psychobiography of James Barrie and the origins of Peter Pan followed by an investigation of Carl Jung who fashioned the collective unconscious to serve as humankind's link to eternity Arguing that personality psychology needs to become less insular Ogilvie integrates information from the disciplines of developmental psychology and neuroscience into a theory regarding the latent needs that both Barrie and Jung sought to satisfy The theory including its emphasis on the onset of self and consciousness is then applied to an array of well known and obscure individuals with ascensionistic inclinations Well written and accessible but complex and scholarly this volume will restore interest in the investigation of people's inner lives

**Contexts of Being** Robert D. Stolorow, George E. Atwood, 2014-05-22 In this volume the authors complete the circle begun with *Faces in a Cloud* 1979 and continued with *Structures of Subjectivity* 1984 and *Psychoanalytic Treatment: An Intersubjective Approach* 1987 with Branchaft They now extend intersubjectivity theory to a rethinking of the foundational pillars of psychoanalytic theory since they have already demonstrated the degree to which psychological theory is influenced by the subjective world of the psychological theorist explored the various structures of subjectivity that organize the subjective world and applied the intersubjective perspective to a broad array of clinical issues Beginning with an in depth critique of the concept of the isolated individual mind Stolorow and Atwood argue that this myth has long obstructed recognition of the intersubjective foundations of psychological life The authors then proceed to a series of chapters that reframe from the standpoint of intersubjectivity theory basic assumptions of the psychoanalytic theory of mental life Concluding chapters on varieties of therapeutic alliance and varieties of therapeutic impasse further exemplify the ability of intersubjectivity theory to reorient the psychoanalytic therapist thus providing fresh strategies for understanding and addressing the most challenging clinical contingencies *Contexts of Being* is the conceptual culmination of Stolorow and Atwood's earlier studies giving them a forum to explain why the perspective of intersubjectivity

cannot be reduced to a clinical sensibility that can be grafted onto existing psychoanalytic theory. Rather the authors argue the intersubjective perspective has methodological and epistemological implications that mandate a radical revision of all aspects of psychoanalytic thought. Not only a cogent elaboration of these implications, the volume is also an important first step in effecting the sweeping revision that follows from them. *Proceedings of International Conference on Computational Intelligence, Data Science and Cloud Computing* Lopa Mandal, Joao Manuel R. S. Tavares, Valentina E. Balas, 2022-08-17. This book includes selected papers presented at International Conference on Computational Intelligence Data Science and Cloud Computing IEM ICDC 2021 organized by the Department of Information Technology Institute of Engineering and Management Kolkata India during December 22-24, 2021. It covers substantial new findings about AI and robotics, image processing and NLP, cloud computing and big data analytics, as well as in cyber security, blockchain and IoT and various allied fields. The book serves as a reference resource for researchers and practitioners in academia and industry. **The Life and Practice of Richard Price: A Gestalt Biography** The Gestalt Legacy Project, 2014-02. This is a biography of Dick Price, the co-founder of Esalen Institute and the creator of Gestalt Practice. **Progress in Self Psychology, V. 11** Arnold I. Goldberg, 2013-05-13. Volume 11 begins with a timely assessment of self psychology and intersubjectivity theory with original contributions by Carveth Tropp and Powell and a critical commentary by P. Ornstein. Clinical studies span the transferences, the complementarity of individual and group therapy, the termination phase and multiple personality disorder. A special section on dying and mourning encompasses women professionals and suicide, the self psychology of the mourning process and the self-object function of religious experience with the dying patient. The volume concludes with theoretical and applied studies of personality testing in analysis, writer's block, The Guilt of the Tragic Man, and the historical significance of self psychology. A testimony to the evolutionary growth of self psychology, The Impact of New Ideas will be warmly welcomed by readers of the Progress in Self Psychology series. *Beyond the simple contrastive analysis: Appropriate experimental approaches for unraveling the neural basis of conscious experience* Jaan Aru, Talis Bachmann, 2015-06-26. Contrasting conditions with and without conscious experience has served consciousness research well. However, research based on this simple contrast has led to controversies about the neural basis of conscious experience. One key reason for these ongoing debates seems to be that the simple contrast between conditions with and without consciousness is not specific for unraveling the neural basis of conscious experience but rather also leads to other processes that precede or follow it. Acknowledging this methodological problem implies that some of the previous research findings about the neural underpinnings of conscious experience are actually reflecting the prerequisites and consequences rather than the direct correlates of conscious perception. Thus, it is required to re-evaluate the previous results to find out which of them are telling us anything about the neural basis of consciousness. But first and foremost to overcome this methodological problem, we need new experimental paradigms that go beyond the simple contrastive analysis or find the ways how some older but well forgotten paradigms may foster a new look

at this emerging problem Accordingly this research topic is looking for empirical and theoretical contributions that 1 envision new and suitable experimental approaches to study consciousness that are free from the limitations of the simple contrastive analysis 2 provide empirical data that help to separate the neural correlates of conscious experience from the prerequisites and consequences of it 3 help to re assess previous research findings about the neural correlates of conscious perception in the light of the methodological problems with the traditional contrastive analysis We hope that the theoretical insights and experimental approaches collected within this Research Topic help us to gain a more refined understanding of the neural basis of conscious experience

Progress in Self Psychology, V. 8 Arnold I. Goldberg, 2013-05-13 New Therapeutic Visions begins with Lachmann and Beebe's developmental perspectives on representational and selfobject transferences followed by commentaries In Section II the self psychological approach is brought to bear on the clinical treatment of an adolescent girl incest survivors addictive personalities patients exhibiting codependency and a case of desomatization Section III on applied self psychology contains chapters on the theory of creativity subjectivism relativism and realism in psychoanalysis and quantum physics and self psychology The final section offers two critical review essays on major contributions to the self psychology literature by Wolf by Bacal and Newman and by Lichtenberg Stolorow's chronicle of his personal odyssey into self psychology and intersubjectivity theory rounds out volume 8 of the Progress in Self Psychology series

**The Metaphysics of Beauty** Nick Zangwill, 2018-05-31 In chapters ranging from The Beautiful the Dainty and the Dumpy to Skin deep or In the Eye of the Beholder Nick Zangwill investigates the nature of beauty as we conceive it and as it is in itself The notion of beauty is currently attracting increased interest particularly in philosophical aesthetics and in discussions of our experiences and judgments about art In The Metaphysics of Beauty Zangwill argues that it is essential to beauty that it depends on the ordinary features of things He uses this principle to defend the notion of the aesthetic to call for a version of aesthetic formalism and to reconsider the reality of beauty The Metaphysics of Beauty brings beauty to the center of intellectual consciousness in a manner informed by contemporary metaphysics and engages with beauty as an enduring object of human thought and experience

The Man Who Shocked The World Thomas Blass, 2009-02-24 The creator of the famous Obedience Experiments carried out at Yale in the 1960s and originator of the six degrees of separation concept Stanley Milgram was one of the most innovative scientists of our time In this sparkling biography the first in depth portrait of Milgram Thomas Blass captures the colorful personality and pioneering work of a social psychologist who profoundly altered the way we think about human nature Born in the Bronx in 1933 Stanley Milgram was the son of Eastern European Jews and his powerful Obedience Experiments had obvious intellectual roots in the Holocaust The experiments which confirmed that normal people would readily inflict pain on innocent victims at the behest of an authority figure generated a firestorm of public interest and outrage proving as they did that moral beliefs were far more malleable than previously thought But Milgram also explored other aspects of social psychology from information overload to television violence to the notion that

we live in a small world Although he died suddenly at the height of his career his work continues to shape the way we live and think today Blass offers a brilliant portrait of an eccentric visionary scientist who revealed the hidden workings of our very social world     **Head in the Cloud** William Poundstone,2016-07-19 The real world value of knowledge in the mobile device age More people know who Khloe Kardashian is than who Rene Descartes was Most can't find Delaware on a map correctly spell the word occurrence or name the largest ocean on the planet But how important is it to fill our heads with facts A few keystrokes can summon almost any information in seconds Why should we bother learning facts at all Bestselling author William Poundstone confronts that timely question in Head in the Cloud He shows that many areas of knowledge correlate with the quality of our lives wealth health and happiness and even with politics and behavior Combining Big Data survey techniques with eye opening anecdotes Poundstone examines what Americans know and don't know on topics ranging from quantum physics to pop culture Head in the Cloud asks why we're okay with spelling errors on menus but not on resumes why Fox News viewers don't know which party controls Congress why people who know trivia make more money than those who don't how individuals can navigate clickbait and media spin to stay informed about what really matters Hilarious humbling and wildly entertaining Head in the Cloud is a must read for anyone who doesn't know everything
