it first hand and those diverse cultures guided and informed his journeys Here John Cramsie offers original perspectives on Camden s multicultural Britain through the study of British travellers and their narratives We meet characters such as the Tudor traveller John Leland who intended to tell the peoples of England and Wales about themselves chronicle how they came to settle the towns villages valleys and mountaintops they called home record the marks they left in the landscape and celebrate the noble histories and cultures they created Dozens eventually hundreds of Britons shared the same passion to meet their island neighbours and relate their experiences The individuals studied in this book include actual as well as armchair travellers and those who blurred the boundaries between them Their letters diaries journals and histories range from the epic poignant and matter of fact to the exotic preposterous and hateful the sources include actual and imaginative narratives and those which combined both elements Travellers painted Britain with in Leland s words native colours that were rich vibrant and above all complex Their remarkable journeys are the story of how Britons over two centuries met interacted and attempted or not to understand one another Written with an eye to debates about immigration and ethnicity in today s Britain the book emphasizes the long history of making and remaking the island s cultural mosaic The encounter with Britain s native colours has been a burden of history and opportunity for millennia not simply for our own times JOHN CRAMSIE is Associate Professor Department of History Union College NY [Science in the Archives](#) Lorraine Daston, 2017-04-04 Science in the Archives reveals affinities and continuities among the sciences of the archives across many disciplines and centuries in order to present a better picture of essential archival practices and thereby the meaning of science For in both the natural and human sciences archives of the most diverse forms make cumulative collective knowledge possible Yet in contrast to laboratories observatories or the field archives have yet to be studied across the board as central sites of science The volume covers episodes in the history of astronomy geology genetics classical philology climatology history medicine and ancient natural philosophy as well as fundamental practices such as collecting retrieval strategies and data mining The time frame spans doxology in Greco Roman antiquity to NSA surveillance techniques and the quantified self movement Each chapter explores the practices politics economics and open ended potential of the sciences of the archives making this the first book devoted to the role of archives in the natural and human sciences [Resisting History](#) David N. Myers, 2021-02-09 Nineteenth century European thought especially in Germany was increasingly dominated by a new historicist impulse to situate every event person or text in its particular context At odds with the transcendent claims of philosophy and more significantly theology historicism came to be attacked by its critics for reducing human experience to a series of disconnected moments each of which was the product of decidedly mundane rather than sacred origins By the late nineteenth century and into the Weimar period historicism was seen by many as a grinding force that corroded social values and was emblematic of modern society s gravest ills Resisting History examines the backlash against historicism focusing on four major Jewish thinkers David Myers situates these thinkers in proximity to leading Protestant thinkers of the time but

argues that German Jews and Christians shared a complex cultural and discursive world best understood in terms of exchange and adaptation rather than influence After examining the growing dominance of the new historicist thinking in the nineteenth century the book analyzes the critical responses of Hermann Cohen Franz Rosenzweig Leo Strauss and Isaac Breuer For this fascinating and diverse quartet of thinkers historicism posed a stark challenge to the ongoing vitality of Judaism in the modern world And yet as they set out to dilute or eliminate its destructive tendencies these thinkers often made recourse to the very tools and methods of historicism In doing so they demonstrated the utter inescapability of historicism in modern culture whether approached from a Christian or Jewish perspective

### **History's Peru** Mark

Thurner,2011-02-13 Mark Thurner here offers a brilliant account of Peruvian historiography one that makes a pioneering contribution not only to Latin American studies but also to the history of historical thought at large He traces the contributions of key historians of Peru from the colonial period through the present and teases out the theoretical underpinnings of their approaches He demonstrates how Peruvian historical thought critiques both European history and Anglophone postcolonial theory And his deeply informed readings of Peru s most influential historians from Inca Garcilaso de la Vega to Jorge Basadre are among the most subtle and powerful available in English

[The Descent of Ideas](#) Donald R. Kelley,2017-09-29 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

### **Interpreting**

**Cultures** J. Hart,2016-09-23 This book focuses on how we perceive know and interpret culture across disciplinary

boundaries The study combines theoretical and critical contexts for close readings in culture through discussions of literature philosophy history psychology and visual arts by and about men and women in Europe the Americas and beyond *Plots of Epiphany* John B. Weaver, 2013-02-06 Past scholarship on the prison escapes in the Acts of the Apostles has tended to focus on lexical similarities to Euripides Bacchae going so far as to argue for direct literary dependence Moving beyond such explanations the present study argues that miraculous prison escape was a central event in a traditional and culturally significant story about the introduction and foundation of cults a story discernable in the Bacchae and other ancient texts When the mythic quality and cultural diffusion of the prison escape narratives are taken into account the resemblance of Lukan and Dionysian narrative episodes is seen to depend less on specific literary borrowing and more on shared familiarity with cultural discourses involving the legitimating portrayal of new cults in the ancient world

**Transforming History** Brian Moloughney, Peter Zarrow, 2012-02-03 Transforming History examines the profound transformation of historical thought and practice of writing history from the late Qing through the midtwentieth century. The authors devote extensive analysis to the common set of intellectual and political forces that shaped the study of history from the ideas of evolution, positivism, nationalism, historicism, and Marxism to political processes such as revolution, imperialism, and modernization. Also discussed are the impact and problems associated with the nation-state as the subject of history, the linear model of historical time, and the spatial system of nation-states. The result is a convincing study that illustrates how history has transformed into a modern academic discipline in China.

**Macaulay and the Enlightenment** Nathaniel Wolloch, 2022 A new intellectual biography of Thomas Babington Macaulay showing how nineteenth century British liberal culture retained and transformed the ideas of the Enlightenment in a rapidly changing world. Macaulay and the Enlightenment sheds new light on both familiar and unfamiliar aspects of the life and ideas of this most famous of nineteenth century British historians. Thomas Babington Macaulay (1800-1859) was a prominent representative of mainstream British liberalism in the first half of the nineteenth century. He was also a Member of Parliament and government minister and famously spent several years as a member of the governing council in India where he promoted legal and educational reforms. One of the book's key contributions is the investigation of Enlightenment influences on the more well-known aspects of Macaulay's thought: history, politics, social and economic issues, religion, revolution, and colonialism. The book also offers new revelations about Macaulay's attitude towards women and provides insight into his views on art, nature, and animals. In this study, Macaulay emerges as a more subversive at times even radical figure than previously assumed. The book thus emphasizes the transformation of Enlightenment ideas into early nineteenth century liberalism. Publisher description.

**Crossing the Border: On the Quadruple-Evidence Method** Li Yang, Shuxian Ye, 2024-04-04 This book is the first monograph of its kind in the academic world which comprehensively expounds the new methodology of humanities. The quadruple evidence method is one which integrates quadruple evidences to open up new horizon for interpretation of ancient culture in the three dimensional manner. The first layer of evidence refers to documents passed down from the past, the second layer of evidence refers to local written materials, the third layer of evidence includes oral legends of anthropology and folklore and etiquette in the living folk customs, the fourth layer of evidence refers to those ancient objects and images either unearthed in archaeological excavations or handed down from the past. The book consists of theoretical explorations and their applications in individual cases. While the first part studies the academic evolution theory and methodological value of the quadruple evidence method, the second part in using the method in different cases explores different historical and cultural phenomena in the history of China attempting to extend the frontier of the origin of civilization from the approach of mythological study.

Dangerous Tales Carrie A. Cifers, 2025-04-18 The biblical narrative of Israel's only daughter Dinah is steeped in deception and violence vengeance and destruction and a silence that has posed interpretive problems for readers for more than two millennia Carrie A Cifers takes up the retellings of Genesis 34 in Josephus's Jewish Antiquities the book of Jubilees and Joseph and Aseneth to explore how later authors tried to clarify the assumedly implicit ethical message of Dinah's story Through narrative ethics and socionarratology Cifers demonstrates that biblical stories are a space of encounter where texts make claims on readers and where readers have an ethical responsibility as witnesses to the text Dangerous Tales is a call for contemporary readers to engage biblical narratives in ways that mitigate interpretive violence and maximize each text's ethical potential
