Mount Kenya Kazuharu Mizuno, Yuya Otani, 2022-03-18 This book describes the challenges for the natural environments and local communities in the future Among the high mountains of Africa only Kilimanjaro Mount Kenya and the Rwenzori Mountains are still capped with glaciers The retreating rate of these glaciers has accelerated and they are expected to disappear in the near future In the area around Mount Kenya the precipitation is generally low such that rainfall cannot stably supply water for farmlands and daily life It has been revealed that the glacial meltwater has produced springs at the foot of the mountain It is therefore important to characterize the condition of water sources near Mount Kenya for use by local people This book discusses the relationships between the actual state of the climate and glacier shrinkage around Mount Kenya the surrounding vegetation soil and water environments and the lives of the foothill region inhabitants confronting the glacier shrinkage This book is valuable in the contemporary age when the assurance of a sustainable relationship between nature and mankind is critical **Between Rites and Rights**, 2007-08-24 The study shows in

Nasong'o, Godwin R. Murunga, 2013-07-18 The path

towards democracy in Kenya has been long and often tortuous. Though it has been trumpeted as a goal for decades, democratic government has never been fully realised, largely as a result of the authoritarian excesses of the Kenyatta, Moi, and Kibaki regimes. This uniquely comprehensive study of Kenya's political trajectory shows how the struggle for democracy has been waged in civil society through opposition parties and amongst traditionally marginalised groups like women and the young. It also considers the remaining impediments to democratisation in the form of a powerful police force and damaging structural adjustment policies. Thus, the authors argue, democratisation in Kenya is a laborious and non-linear process. Kenya's recent electoral successes, the book concludes, have empowered them and reinvigorated the prospects for democracy, heralding a more autonomous and peaceful twenty-first century. Facing Mt. Indigenous Languages and Indigenous Knowledge in East Africa Esther Mukewa Lianza, Catherine Mwihi Ndungu, 2024-09-11. In *Indigenous Languages and Indigenous Knowledge in East Africa*. Swahili, Kikuyu, and Kamba. Esther Mukewa Lianza and Catherine Mwihi Ndungu argue that African languages and indigenous knowledge forms are the tools which have made African communities such as Swahili, Kikuyu, and Kamba thrive for generations. Using interviews and research data, this book investigates the following questions: what is the nature and role of multilingualism in East Africa? what role do herbs and indigenous foods play in Swahili, Kamba, and Kikuyu communities? how are the communities governed indigenously? and what is the connection between indigenous languages and knowledge? The findings presented within this study have demonstrated that multilingualism is a great resource in East Africa, as many have prided themselves on their multilingual abilities within their education, careers, and cultures. Although these languages have been identified as carriers of indigenous governance, judiciary, and herbal medicine that have survived for generations, Lianza and Ndungu advocate for policies and education systems to recenter these indigenous languages and their accompanying indigenous knowledge forms and practices once the older generations have passed on. **The Missionary Movement in Colonial Kenya** James
