## **Facing Toward Governments:**

The New Face of Government David E. McNabb, 2017-09-25 Change is sweeping the globe and at the government level operational changes are prompting many public administrators to develop new management styles and ways of delivering services to their citizens. In the process they are changing the face of government. The New Face of Government: How Public Managers are Forging a New Approach to Governance explores how national leaders are changing the art and practice of government and how public managers are shaping and guiding government's response to the transformation. Includes a Field Tested Survey for Diagnosing Institutional Disequilibrium. Focusing on change at the federal, state and local levels, this book addresses policy dimensions such as Strategic and knowledge management, Enterprise architecture, Information and communications technology, Organizational performance assessment, Technological and organizational improvement. It evaluates how these areas enable agencies from the public and private sectors to become more cost effective, performance oriented learning organizations. Not all the ambiguities in policy making and administration have been resolved. However, there is much hope for the future of government and governance. The successes and failures included in The New Face of Government: How Public Managers are Forging a New Approach to Governance illustrate this promise and provide guideposts for public managers who find themselves faced with similar problems and new challenges. About the Author: David E. McNabb teaches a variety of public and private administration and management courses both in the U.S. and abroad, including college and university programs in Latvia, Bulgaria, Germany, the United Kingdom, Italy, France, and Belgium. He is the author of nearly 80 peer reviewed conference papers and articles. This is his seventh book. The Changing Face of Government Information Suhasini L. Shuy, 1998-07-01 Plunging into the verbal quagmire of official language used by bureaucrats in both government and business distinguished linguist Roger W Shuy develops new techniques based on linguistic principles to

improve their communication with the public Shuy presents nine case studies that reveal representative problems with bureaucratic language He characterizes the traits of bureaucratic language candidly though somewhat sympathetically and he describes how linguists can provide bureaucrats with both the tools for communicating more clearly and also the authority to implement these changes Drawing on documents cited in class action lawsuits brought against the Social Security Administration and Medicare Shuy offers a detailed linguistic analysis of these agencies problems with written and oral communication and he outlines a training program he developed for government writers to solve them Moving on to the private sector Shuy analyzes examples of the ways that businesses such as car dealerships real estate and insurance companies and commercial manufacturers sometimes fail to communicate effectively Although typically bureaucracies change their use of language only when a lawsuit threatens Shuy argues that clarity in communication is a cost effective strategy for preventing or at least reducing litigation Bureaucratic Language in Government and Business explains why bureaucratic language can be so hard to understand and what can be done about it *Government support towards the additional living costs of working-age disabled people* Great Britain: Parliament: House of Commons: Work and Pensions Committee,2012-02-19 The Government s Welfare Reform Bill includes measures to introduce a new benefit in 2013 the Personal Independence Payment PIP will replace Disability Living Allowance DLA for working age claimants to help meet the additional living costs of disabled people A new eligibility assessment process will also be brought in But this report finds that the Government should not introduce Personal Independence Payment PIP assessments nationally until it has satisfied itself in the planned initial roll out of the new assessment in a limited geographical area that the assessment is empathetic and accurate The report highlights a number of areas of concern The current draft criteria on which the assessment will be based are still too reliant on a medical model of disability and may fail to take sufficient account of the impact of social practical and environmental factors such as housing and access to public transport on disabled people s ability to participate in society and the additional costs they therefore incur The Committee believes that the Government should listen to the views of disabled people and their representative organisations and conduct a further trial before the criteria are adopted and the new assessment is introduced Once the initial assessments for PIP have been completed in the first geographical area the Government should look again at the value of face to face assessments for PIP claims where claimants conditions are severe and unlikely to change It is also important that DWP gets the contracting process with the private suppliers right
