## **Facing Reality Philosophical Adventures By A Brain Scientist:**

**Facing Reality** J. C. Eccles, 2013-05-07 The titling of this book Facing Reality came to me unbidden presumably from my subconscious But when it came it seemed to be right because that essentially is what I am trying to do in this book Facing is to be understood in the sense of looking at in a steadfast and unflinching manner It thus contrasts with Confronting which has the sense of looking at with hostility and defiance As I face life with its joys and its sorrows its successes and its failures its peace and its turmoil my attitude is one of serene acceptance and gratitude and not one of angry and arrogant confrontation and rejection The other component of the title Reality is the ultimate reality for each of us as conscious beings our birth our self hood in its long stream of becoming throughout our life our death and apparent annihilation This is the Reality that we each of us must face if we are to live and adventure as free and responsible beings and not as mere playthings of chance and circumstance going through a mean ingless farce from birth to death with the search ever for distraction and self forgetfulness As a brain scientist I have specialist knowledge of that wonderful part of the body that is alone concerned in the whole life long interplay between the conscious self and the external world including other selves

**Facing Reality** John C. Eccles, 1973      **Facing reality** John C. Eccles, 1970      **The Jaynes Legacy** Lawrence Wile, 2018-01-03 Julian Jaynes 1976 book The Origins of Consciousness in the Breakdown of the Bicameral Mind continues to arouse an unsettling ambivalence Richard Dawkins called it either complete rubbish or a work of consummate genius nothing in between The present book suggests that the bicameral mind is a phantasm the dating of the origin of consciousness contradicts archeological and literary evidence and the theory contributes nothing toward explaining why some physical states are conscious while others are not because the nonconscious bicameral brain is neurophysiologically equivalent to the conscious brain However the author pays tribute to Jaynes s work as a work of consummate genius because it compels us to re evaluate the significance of humankind s earliest traditions and texts that might shine light on the very suspicious totem of evolutionary mythology that consciousness has evolved continuously and gradually from worms to man The present book suggests that the evolution of the relationship between consciousness mass energy and spacetime radically changed nearly 6 000 years ago during the epigenetic evolutionary degeneration of a little known threadlike structure originating from the center of the central nervous system called Reissner s fiber The earliest Egyptian Hebrew Indian and Chinese traditions buried beneath the dust of fallen Babel and thousands of years of distortions and disguisings describe this process during the origin of religion and mystical traditions      **Human Paleopsychology** K. Bailey, 2013-08-21 First Published in 1986 In this book the author seeks to demonstrate his believe that any credible view must grapple not only with human distinctiveness e g learning capacity language rationality and culture but the dark sides of senseless violence and social disorder as well Any such grappling with the dark side must necessarily confront our animal natures as well as our distinctly human natures

**Creation and Evolution** Friedrich S. Rothschild, 2018-05-04 The issues surrounding Darwin s theory of evolution as a

function of the survival of the fittest have hardly abated since they were initially promulgated about 150 ago The reason is clear behind the theory of evolution is a doctrine of structure of organisms that can be explained only by fitting the adaptation to the external world The older doctrines of creation have been at odds with evolutionism from the outset sometimes utilizing straight theological arguments and at other times employing sophisticated scientific arguments Into the breach steps Friedrich S Rothschild a trained neurologist psychologist and physician On the basis of his researches in comparative embryology Rothschild argues that the central nervous system of animals as well as humans conveys meaning just like language and not just a system aimed at adaptation to the external environment His theory of biosemiotics introduces the concept of inner adaptation This adaptation to the principal forces assign meaning to life In monotheistic religions this force is called God The issue of adaptation is therefore both external and internal related to growth of the person no less than the environment This book is intended for those who are interested in life and its varied meanings to students of sociobiology and medicine as well as those concerned with humanities Threshold Alexander

Batthyány,2023-09-12 Terminal lucidity is a relatively common but poorly understood phenomenon Near the end of life many people including those who have suffered brain injuries or strokes or have been silenced by mental illness or deep dementia experience what seems a miraculous return They regain their clarity and energy are able to talk with families and caregivers recall their lives and often appear to be aware of their nearing death In this remarkable book cognitive scientist and Director of the Viktor Frankl Institute Dr Alexander Batthy ny offers the first major account of terminal lucidity utilizing hundreds of case studies and his research in the related field of near death studies to explore the mind the body the nature of consciousness and what the living can learn from those who are crossing the border from life to death Astonishing authoritative and deeply moving Threshold opens a doorway into one of life s and death s most provocative mysteries

Substantiality and Causality Mirosław Szatkowski,Marek Rosiak,2014-12-11 The content of the volume is divided as follows after presenting two rival approaches to substantiality and causality a traditional ontological view vs a transcendental one Rosiak there follow two sections the first presents studies of substance as showing some causal aspects Buchheim Kein nen Kovac Piwowarczyk whereas the other contains investigations of causality showing in a way its reference to the category of substance Kobiela Meixner Mitscherling Wro ski The last short section contains two studies of extension Leszczy ski and Skowron which can be regarded as a conceptual background of both substantiality and causality The book gives a very colourful picture of the discussions connected with substantiality and causality which may be of potential interest for the readers Hyperreality Johanna Blomqvist,2024-04-09 How should we approach life and its challenges Are they real What do we really know about reality Could modern physics help us to understand What kind of worldview does it really shape for us What is the connection between reality and consciousness Do we live in a simulation In this book Johanna Blomqvist Ph D is diving into the question of reality a topic which has been of interest to her since childhood The desire to understand the

world reality and the purpose of everything has also led her to the frontiers of science and to topics physicists do not often approach Her first book *From Quantum Physics to Energy Healing A Physicist's Journey to Mind and Healing* was published on Amazon in 2018 *Hyperreality* is a book about the nature of our reality and the hypotheses we have made about it through the centuries Johanna Blomqvist describes many cases and research experiments that will puzzle your mind Our reality seems to be something other than what the current prevailing materialistic worldview suggests From Chapter 2 Are we only machines There are many phenomena that we encounter almost daily but which do not fit into the current materialistic worldview Such phenomena are often classified as anomalies or parapsychological when it is impossible to explain them with prevailing theories Such phenomena include premonitions intuition telepathy premonition dreams and synchronicity Science seeks to find objective truth but is such a goal even possible After all all objective information is based on subjective observation Robert Jahn and Brenda Dunne founders of the PEAR Princeton Engineering Anomalies Research laboratory which has studied the effect of the mind on matter for decades say Mind without matter leaves us with a world of ephemeral abstraction matter without mind eliminates the essence of life itself It seems that the transition to the so called post materialistic era is essential We don't have any alternatives if we want to continue our life as humanity on Earth into the future We have to change our thinking It is time to understand our effect on physical reality and move to a new era beyond materialism You exist dive into hyperreality in which you are a significant participant *Hyperreality* book has been written to everyone seeking for answers about the nature of our reality purpose of everything consciousness and the connection between science and spirituality It may help you to understand phenomena that you earlier have only omitted This book is the answer that Johanna Blomqvist herself wanted to find as a teen when she was contemplating the question of reality why we are here and how should one live About the Author Johanna Blomqvist Ph D is a physicist entrepreneur and internationally published author In her work she combines a wide variety of fields and methods in a unique way often discussing topics from the cutting edge and unconventional areas of science Blomqvist is also a sought after lecturer educator and energy healer Since childhood she has been interested in understanding our reality consciousness and our role in this universe Johanna's first book *From Quantum Physics to Energy Healing A Physicist's Journey to Mind and Healing* was published on May 2018 She has written also *Hyperreality Beyond the Horizon where Physics Meets Consciousness* 2021 and *The Mystery of Water A Physicist's Dive into Our Deepest Essence* Fall 2024 Johanna lives in Helsinki Finland

**Central Processing of Visual Information A: Integrative Functions and Comparative Data** H. Autrum, P. O. Bishop, V. Braitenberg, K. L. Chow, R. L. De Valois, R. B. Freeman, W. A. van de Grind, O.-J. Grüsser, U. Grüsser-Cornehls, R. Jung, W. R. Levick, H.-U. Lunkenheimer, D. M. MacKay, M. Snyder, J. Stone, N. J. Strausfeld, I. Thomas, 2012-12-06 The present volume covers the physiology of the visual system beyond the optic nerve It is a continuation of the two preceding parts on the photochemistry and the physiology of the eye and forms a bridge from them to the fourth part on visual psychophysics These

fields have all developed as independent specialties and need integrating with each other The processing of visual information in the brain cannot be understood without some knowledge of the preceding mechanisms in the photoreceptor organs There are two fundamental reasons ontogenetic and functional why this is so 1 the retina of the vertebrate eye has developed from a specialized part of the brain 2 in processing their data the eyes follow physiological principles similar to the visual brain centres Peripheral and central functions should also be discussed in context with their final synthesis in subjective experience i e visual perception Microphysiology and ultramicroscopy have brought new insights into the neuronal basis of vision These investigations began in the periphery HARTLINE S pioneering experiments on single visual elements of Limulus in 1932 started a successful period of neuronal recordings which ascended from the retina to the highest centres in the visual brain In the last two decades modern electron microscopic techniques and photochemical investigations of single photoreceptors further contributed to vision research **Mysterious Minds** Stanley Krippner, Harris L.

Friedman, 2009-11-12 An introduction to the scientific study of psychics and mediums those who are frauds those who are psychotic and those whose claims seem to defy easy dismissal Welcome to the world of Mysterious Minds The Neurobiology of Psychics Mediums and Other Extraordinary People Here experts in the emerging field of neurobiological study make the case that while many claims of psychic ability are easily proven false there may well be claimants who can obtain information in ways not easily explained by mainstream science and there might be scientific tools and approaches available to confirm those experiences Written by an expert team of distinguished investigators from a half dozen countries around the world Mysterious Minds introduces readers to the current state of research into parapsychological experiences emphasizing the neurobiological data obtained by those who claim to be psychics or mediums It offers specific examples of paranormal claims of extraordinary people claims scrutinized through the use of high tech brain imaging clinical neurological examinations and psychotropic drugs The book concludes by proposing a series of models based on fundamental neurobiology psychology and quantum physics that could help us unravel these mental mysteries Science and the Near-Death Experience Chris

Carter, 2010-08-23 The scientific evidence for life after death Explains why near death experiences NDEs offer evidence of an afterlife and discredits the psychological and physiological explanations for them Challenges materialist arguments against consciousness surviving death Examines ancient and modern accounts of NDEs from around the world including China India and many from tribal societies such as the Native American and the Maori Predating all organized religion the belief in an afterlife is fundamental to the human experience and dates back at least to the Neanderthals By the mid 19th century however spurred by the progress of science many people began to question the existence of an afterlife and the doctrine of materialism which believes that consciousness is a creation of the brain began to spread Now using scientific evidence Chris Carter challenges materialist arguments against consciousness surviving death and shows how near death experiences NDEs may truly provide a glimpse of an awaiting afterlife Using evidence from scientific studies quantum mechanics and

consciousness research Carter reveals how consciousness does not depend on the brain and may in fact survive the death of our bodies Examining ancient and modern accounts of NDEs from around the world including China India and tribal societies such as the Native American and the Maori he explains how NDEs provide evidence of consciousness surviving the death of our bodies He looks at the many psychological and physiological explanations for NDEs raised by skeptics such as stress birth memories or oxygen starvation and clearly shows why each of them fails to truly explain the NDE Exploring the similarities between NDEs and visions experienced during actual death and the intersection of physics and consciousness Carter uncovers the truth about mind matter and life after death

There Is Life After Death Tom Harpur, 2011-02-19 What happens when we die Will we simply dissolve into nothingness or will we survive death in some other form Issues of death and dying have consumed humanity from time immemorial In our modern western culture we have tended out of fear to deny and push death away And yet a healthy consideration of this issue can help us embrace and understand what happens to us when we die There is Life After Death is Tom Harpur s classic examination of death and dying Now fully revised and updated here is a new edition of a book that weighs the scientific religious and anecdotal evidence of survival of death and what happens after we die The likelihood of death being a portal to other forms of existence is argued persuasively Tom Harpur looks at the witness of near death experiences and examines the idea of reincarnation as well as the claims of channelers and spirit mediums Most importantly the author looks at how the great world religions from Christianity Judaism and Islam to Hinduism Buddhism and Native Spirituality among others deal with life after death This book is a powerful summary of what we know and believe about death There is Life After Death is both illuminating and comforting in its message and conclusions and goes a long way in putting to rest one of the last great taboos of our culture

**Education and Society in Comparative Context** Eija Kimonen, 2015-12-17 What was the interrelationship between education and society during the twentieth century in the United States and India What is the essence of the historical development of educational policies and social systems in these two countries What philosophical views and developmental courses underlie their outdoor oriented education What are their aims of outdoor oriented education What procedures are connected with their outdoor oriented education These questions are examined in this unique volume This book is divided into three parts The first part creates a context for the comparison of the issues concerning education and society The central point of departure used here regards education as being closely related to the totality of culture and human activity The dialectic process between education and society is realized differently in accordance with the value objectives that provide the background for different societies This comparative educational study uses a historico hermeneutical approach The second part analyzes the social systems and educational policies of the United States and India following their developmental trends and patterns The nature of the relationship between education and society for each country is further brought into focus when it is interpreted from the perspective of the philosophical views pedagogical aims and procedures of twentieth century outdoor oriented education The case studies provide an interesting insight into how changes in educational policy have been reflected in the every day pedagogical procedures used in schools in the United States and India The third part is an analysis and comparison of the phenomena previously presented that are related to education and society through the lenses suggested by sociological theories It compares the dimensions of the interrelationship between education and society from the standpoint of outdoor oriented education in the two countries

during the twentieth century This thought provoking volume is intended for anybody interested in the interplay between education and society in all its complexity It offers a fascinating journey into the past and present of the issues that have defined the development of education and society in the United States and India *The End of Suffering* Russell Targ,J. J. Hurtak,2006-02-27 This spiritual inquiry into the nature of truth draws on Buddhism and quantum physics to liberate us from limited understandings of ourselves and others The hopeful teaching of this book is that while everybody suffers most of this suffering is unnecessary it can be overcome The belief that things must be either true or untrue leads us to think in terms of polarities good or evil right or wrong This friend or foe approach may seem to make life easier but in *The End of Suffering* Russell Targ and J J Hurtak assert that this worldview only increases our experience of suffering In an effort to overcome the polarity of opposites and the accompanying suffering Targ and Hurtak combine the wisdom of the East with the findings of quantum physics uncovering a middle ground that shows opposing sides are really the same Buddha taught us to live a helpful and compassionate life and to surrender our ego to the peace of spaciousness The middle path of Buddhism also shows that things may be neither true nor not true or both true and untrue *The End of Suffering* puts the perceived opposites of Buddhism and physics together showing step by step how we can learn to surrender the story of who we think we are and experience an end to our suffering The Nature of Doctrine in T.F. Torrance's Theology Elmer M. Colyer,2001-11-09 Thomas F Torrance is considered by many to be the most important English speaking theologian of the last fifty years Torrance has written extensively over six hundred items on nearly every theme in theology especially theological method and the nature of theology Yet little secondary literature about his theology has been published to date The significance of this book by Elmer M Colyer is that it discusses a theme the nature of doctrine that takes readers into the heart of Torrance s critical realist epistemology theological method and understanding of the nature and purpose of theology Colyer also contributes significantly to the ongoing conversation concerning the nature of doctrine since Torrance s understanding of doctrine moves considerably beyond the work of George Lindbeck *The Nature of Doctrine* and Alister McGrath *The Genesis of Doctrine* in this area Chemical Transmission of Nerve Impulses Z. M. Bacq,2013-10-22 *Chemical Transmission of Nerve Impulses A Historical Sketch* is a translation of the French edition *Les Transmissions chimiques de l'influx nerveux* published by Gauthier Villars in Paris Organized into 12 chapters this book begins with a discussion on the definition and importance of the phenomenon of chemical transmission with chapters specifically devoted to both cholinergic and adrenergic ones This text then elucidates the general organization of the nervous system in vertebrates The opposition to the theory of chemical transmission and the state of comparative physiology with regard to chemical transmission are also explained
