*Manufacturing Rationality* Yehouda A. Shenhav,2002 Through careful analysis of contemporary records in the engineering profession the author shows how management invented itself and carved its own domain in the face of hostility and resistance from both manufacturers and workers The book demonstrates how the new language and rhetoric of management emerged and how it confronted and replaced the language of traditional capitalism system instead of individuals jobs instead of natural rights planning instead of free initiatives      **Factory Management** K. **Encyclopedia of Production and Manufacturing Management** Paul M. Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field      Handbook of Manufacturing Industries in the World Economy John R. **The Guaranteed Annual Wage** Juliet Cochran Vradenburg,1947 Dream of a Red Factory Deborah A. Kaple,1994-01-06 Drawing on previously unknown primary sources in both Chinese and Russian Deborah A Kaple has written a powerful and absorbing account of the model of factory management and organization that the Chinese communists formulated in the 1949 1953 period She reveals that their new management techniques were adapted from Soviet propaganda during the harsh period of Stalin s post war reconstruction The idealized Stalinist management system consisted mainly of strict Communist Party control of all aspects of workers lives which is the root of such strong Party control over Chinese society today Dream of a Red Factory is a rare and revealing look at the consolidation rule in China told through the prism of the development of new socialist factories and enterprises Kaple completely counters the old myth of the Soviet monolith in China and carefully reconstructs how the Chinese communists came to rely on an idealized propagandistic version of the Soviet model instead Clean Production K.B. Misra,2012-12-06 The world has witnessed several revolutions since the dawn of industrial revolution some two centuries ago During the current century itself three revolutions in the area of communication information processing and quality have taken place and each time the standard of living of man improved beyond predictions But during the same period the world population has also phenomenally increased dwarfing the gains achieved from the development Increased level of industrial activity to meet the of humanity has caused irreversible damage to the pristine environment that the demand Earth once had Economic disparity between the haves and havenots has widened aggravating the situation further more Ozone layer depletion warming up of Earth s atmosphere and the pollution created by uncontrolled industrial activity to gain economic strength are now assuming the proportion of a catastrophe that may eventually threaten the survival of life on Earth Developed countries blame the Third World countries for the uncontrolled emissions through burning of fossil fuels and for wasting precious resources of energy by using inefficient and uneconomical technologies while the developed countries are equally responsible for avoidable over consumption and for the wastage of resources and energy and for not sharing the improved and efficient technologies with the developing countries Thus the wastage by both these set of countries continues unabated After all resources of the world are finite and are meant to be shared by all its inhabitants *Factory Physics* Wallace J. Hopp,Mark L. Spearman,2001 Publisher Description *The Iron Age* ,1901 Management's Handbook Leon Pratt Alford,1924 Backyard Revolution Péter Apor,2025-03-15 Backyard Revolution contributes in depth sociocultural histories of the popular antisemitic pogroms that shook Hungary in the spring and summer of 1946 Expanding the scope of investigation of serial mass violence toward Jewish communities beyond the cases in Poland suggests that antisemitic violence was general in postwar Central and Eastern Europe and that it spoke to central components of popular notions of society and politics P ter Apor gives new impetus to rethink the explanations of collective violence including antisemitic ones

He considers collective violence as a particular form of political participation and examines post Holocaust antisemitic violence as one of its perverse ways Drawing on previously unknown archival sources Backyard Revolution explores how collective violence produced categories and divisions in society and how these in turn attempted to shape the institutions of the state It further addresses the political participation of powerless groups and highlights components of everyday life and resistance that engendered power structures and hierarchies These important theoretical premises concerning the subaltern politics provide a new template for understanding the emergence of communist dictatorships in Central and Eastern Europe Setting the genesis of communist dictatorships at the crossroads of popular expectations toward the state anchored to the culture of the everyday and elites attempts to mobilize mass support Backyard Revolution has implications beyond regional borders and adds to the understanding of growing populist governance worldwide      **Factory Management** Paul Moody Atkins,1926      *China's Economy Looks Toward the Year 2000: Economic openness in modernizing China* ,1986      *China's Economy Looks Toward the Year 2000* ,1986
