Facts Are Facts:

A Logic of Facts, Or, Every-day Reasoning George Jacob Holyoake, 1866 Facing Facts Neale, 2001-11 Facing Facts is a powerful original examination of attempts to dislodge a cornerstone of modern philosophy the idea that our thoughts and utterances are representations of slices of reality Representations that are accurate are usually said to be true to correspond to the facts this is the foundation of correspondence theories of truth A number of prominent philosophers have tried to undermine the idea that propositions facts and correspondence can play any useful role in philosophy and formal arguments have been advanced to demonstrate that under seemingly uncontroversial conditions such entities collapse into an undifferentiated unity The demise of individual facts is meant to herald the dawn of a new era in philosophy in which debates about scepticism realism subjectivity representational and computational theories of mind possible worlds and divergent conceptual schemes that represent reality in different ways to different persons periods or cultures evaporate through lack of subject matter By carefully untangling a host of intersecting metaphysical epistemological semantic and logical issues and providing rich and original analyses of key aspects of the work of Frege Russell G del and Davidson Stephen Neale demonstrates that arguments for the collapse of facts are considerably more complex and interesting than either friend or foe ever imagined A number of deep semantic facts emerge along with a powerful proof while it is technically possible to avoid the collapse of facts rescue the idea of representations of reality and thereby face anew the problems raised by the sceptic or the relativist doing so requires making some tough semantic decisions about predicates and descriptions It is simply impossible Neale shows to invoke representations facts states or propositions without making hard choices choices that may send many philosophers scurrying back to the drawing board Facing Facts will be crucial to future work in metaphysics the philosophy of language and mind and logic and will have profound implications far beyond **Fact**

Causalism Carolina Sartorio,2023 Carolina Sartorio argues for a naturalistic conception of agency and free agency that unifies them under the thesis that actions free actions are behaviors that have the right kinds of causes or explanations The result is a compelling view of practical agency taking in key

metaphysical notions such as causation grounding absences and powers A Treatise on Trial by Jury, Including Questions of Law and Fact John Proffatt, 2024-03-13 Reprint of the original first published in 1880 **The Technique of Controversy** Boris Basil Bogoslovsky, 1928 **Facts, Values and Objectivity in Economics** José Castro Caldas, Vítor Neves, 2012-03-22

Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions **The Book of Truth and Facts** Fritz Von Frantzius, 2015-07-06 Excerpt from The Book of Truth and Facts Facts Which Every American Should Know My main object in publishing this book is to warn the American people against the dangers menacing this country and jeopardizing the existence of the United States of America as a free and independent country My criticisms may sometimes appear severe but I trust they will be accepted in the spirit in which they are offered Few people have courage enough to come out in the open and tell the truth as their positions in life do not permit them to do so History shows that many men who came forward with the truth had to suffer martyrdom I am ready to state my convictions frankly in the interest of the great cause and to tell what others either would not say or are debarred from saying May this book pass from one American to another and thus contribute to strengthen the ideals of this country About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Concept of Justice and Equality** Eliane Saadé, 2015-09-25 Unless considered on a practical level where a precise distribution of social goods is chosen John Rawls s and Gerald Cohen s approaches to social justice cannot be complementary Their disagreement about justice and its principles calls for a choice which opts either for the Rawlsian theory or for the Cohenian one What is the more plausible approach to social justice This work compares both approaches and aims to defend Cohen s position in the light of two considerations It answers the philosophical question about the analysis of the idea of justice which puts the virtue of justice in its philosophical context It however presents a method everyone can apply in order to arrive at the fundamental principles of justice by employing the power of reason An analysis of the concept of justice based on the power of reason should seek to

uncover the ultimate nature of justice which is independent of facts and of other virtues Once exposed the understanding of justice arrived at should inform social institutions and determine people s daily decisions A just society is therefore a society where just persons and just institutions exhibit the virtue of justice
