Fultz, 2012-11-22 Toni Morrison features a collection of ten new essays by noted Morrison scholars including recipients of the Toni Morrison Society Book Award Focusing upon Morrison's most recently published novels *Paradise* *Love* *A Mercy* the contributors to this volume revisit issues that continue to engage Morrison and are part of the currency of contemporary American literary and cultural history These selections examine Morrison's ongoing romance with African Americans as they continue to battle the demons of race gender class and poverty to name a few Together these essays offer comprehensive and nuanced discussions of Morrison's latest novels and provide new directions for Morrison scholarship in the 21st century This volume provides students of literature cultural studies and history with an overview of Morrison's examination of African American progress and leadership at key moments in American history and culture from the Colonial Period to the present Through their thematic interconnectedness the essays reveal Morrison at her most brilliant in her ability to reach into the past to comment on contemporary issues **The Science of the Dogon** Laird Scranton, 2006-09-22 A look at the close resemblance between

the creation and structure of matter in both Dogon mythology and modern science Reveals striking similarities between Dogon symbols and those used in both the Egyptian and Hebrew religions Demonstrates the parallels between Dogon mythical narratives and scientific concepts from atomic theory to quantum theory and string theory The Dogon people of Mali West Africa are famous for their unique art and advanced cosmology The Dogon s creation story describes how the one true god Amma created all the matter of the universe Interestingly the myths that depict his creative efforts bear a striking resemblance to the modern scientific definitions of matter beginning with the atom and continuing all the way to the vibrating threads of string theory Furthermore many of the Dogon words symbols and rituals used to describe the structure of matter are quite similar to those found in the myths of ancient Egypt and in the daily rituals of Judaism For example the modern scientific depiction of the informed universe as a black hole is identical to Amma s Egg of the Dogon and the Egyptian Benben Stone The Science of the Dogon offers a case by case comparison of Dogon descriptions and drawings to corresponding scientific definitions and diagrams from authors like Stephen Hawking and Brian Greene then extends this analysis to the counterparts of these symbols in both the ancient Egyptian and Hebrew religions What is ultimately revealed is the scientific basis for the language of the Egyptian hieroglyphs which was deliberately encoded to prevent the knowledge of these concepts from falling into the hands of all but the highest members of the Egyptian priesthood The Science of the Dogon also offers compelling new interpretations for many of the most familiar Egyptian symbols such as the pyramid and the scarab and presents new explanations for the origins of religiously charged words such as Jehovah and Satan
