The Economist *Economic Facts and Fallacies* exposes some of the most popular fallacies about economic issues and does so in a lively manner and without requiring any prior knowledge of economics by the reader. These include many beliefs widely disseminated in the media and by politicians such as mistaken ideas about urban problems, income differences, male/female economic differences, as well as economics fallacies about academia, about race, and about Third World countries. One of the themes of *Economic Facts and Fallacies* is that fallacies are not simply crazy ideas but in fact have a certain plausibility that gives them their staying power and makes careful examination of their flaws both necessary and important, as well as sometimes humorous. Excerpt from *Economic and Fiscal Facts and Fallacies*: The primary object in publishing this work is to present in a more connected form the views which I have advanced from time to time in various books, pamphlets, speeches, and letters to the public, journals on economic and fiscal questions during a period extending over more than a quarter of a century. Another object is to expose the manner in which the followers of the Manchester School of economics have misused and misapplied the valuable truths of political economy to protest against the elevation of their fiscal tenets to a species of religion, the doctrines of which are not even to be questioned and to dispute their extravagant claims to infallibility indicated by such expressions as Free Trade, the International Law of the Almighty, Cobden.
