Faith And Knowledge A Critical Inquiry

Wolfgang Guggemos

Faith And Knowledge A Critical Inquiry:

Faith and Knowledge Paul Giurlanda, 1987 In an analysis of Christian faith the author surveys scriptural traditional and contemporary values as well as modern philosophy Reviews the thoughts of Stephen Toulmin Hubert Dreyfus Michael Polanyi and Alasdair MacIntyre showing that humans know reality only against the horizon of shared goals language and practice of community Goes on to survey the New Testament the major figures of the tradition Augustine Anselm Aquinas Luther Kant Schleiermacher and Vatican I and contemporary writers such as David Tracy and Stanley Hauerwas Concludes that Christian faith is what grounds that community of interpretation known as the church A helpful educational analysis for students and scholars of theology and philosophy The Religious Education of Adults Leon McKenzie, R. Michael Harton, 2002

Increasingly adults do not see the church as a credible provider of quality religious education This revision by R Michael Harton of the classic work by Leon McKenzie addresses the foundational issues of what constitutes such an education for adults and how ministers and teachers can determine and understand the needs of learners It also offers ways to involve learners in the planning and execution of their own religious education A must read for ministers and seminarians who care about the religious education of adults Leon McKenzie is a retired professor of adult education at Indiana University where he also served as Director of Human Resource Development for Indiana University Hospital He received his Ed D in adult education from IU and has authored several books including *Adult Education and the Burden of the Future* and *Adult Education and World View Construction* He lives in Indianapolis R Michael Harton has authored several articles on local church adult education and contributed to *A Church's Ministry to Adults* and *Handbook on Adult Religious Education* A former congregational educator and seminary professor he now serves the Virginia Baptist Resource Center in Richmond Virginia and teaches adjunctively at the Baptist Theological Seminary at Richmond He received his Ed D in adult education and instructional systems technology from Indiana University **Global Perspectives on Catholic Religious Education**

Siggelkow, Brandon K. Watson, 2022-12-19 This volume is a collection of 33 essays sermons and contemporaneous addresses
by Paul L. Lehmann a highly influential theological voice of the twentieth century Lehmann was a close friend of Dietrich
Bonhoeffer a student and friend of Reinhold Niebuhr and a longtime colleague of James Cone One of the first American
readers of Karl Barth Lehmann's work also influenced early liberation theologies throughout the world The works included
here span the years 1938-1998 and are organized around the following themes the direction of theology today I the
revolutionary dimension of the gospel II the future of theology in a post-Christian world III and Dietrich Bonhoeffer a
theological friendship IV The works contained in this volume were written to address a particular context yet remain
surprisingly relevant for today *Scepticism, Relativism, and Religious Knowledge* Michael G. Harvey, 2014-09-25

Scepticism, Relativism, and Religious Knowledge shows where responses to scepticism and relativism by Karl Barth and
Reformed epistemology have led to impasses and reconstructs their insights in a robust response that does not depend on
making excessive claims about our epistemic capacities This response is based on a nuanced conception of the relationship
between trust, doubt, faith and reason and a Kierkegaardian perspective on religious knowledge that stresses the role of the
will and the intellectual and theological virtues This book will appeal to those with an interest in the deep and often difficult
questions of religion and philosophy particularly regarding matters of truth, doubt and belief *Literature, Belief and
Knowledge in Early Modern England* Subha Mukherji, Tim Stuart-Buttle, 2018-05-17 The primary aim of *Knowing Faith* is to
uncover the intervention of literary texts and approaches in a wider conversation about religious knowledge why we need it
how to get there where to stop and how to recognise it once it has been attained Its relative freedom from specialised
disciplinary investments allows a literary lens to bring into focus the relatively elusive strands of thinking about belief,
knowledge and salvation probing the particulars of affect implicit in the generalities of doctrine The essays in this volume
collectively probe the dynamic between literary form, religious faith and the process, psychology and ethics of knowing in
early modern England Addressing both the poetics of theological texts and literary treatments of theological matter they
stretch from the Reformation to the early Enlightenment and cover a variety of themes ranging across religious hermeneutics,
rhetoric and controversy the role of the senses and the entanglement of justice, ethics and practical theology The book should
appeal to scholars of early modern literature and culture theologians and historians of religion and general readers with a
broad interest in Renaissance cultures of knowing **Early Buddhist Theory of Knowledge** K. N. Jayatilleke, 2013-10-16

The author of this volume an accomplished philologist, historian and philosopher analyzes the relevant earlier and later texts

and traces the epistemological foundations of Pali canonical thought from the Vedic period onwards Originally published in 1963 it sheds new light on later developments and elucidates from the Indian point of view some of the basic problems of the conflict between metaphysics and logical and linguistic analysis **Philosophy, Science, Education and Culture** Robert Nola, Gürol Irzik, 2006-02-22 Currents such as epistemological and social constructivism postmodernism and certain forms of multiculturalism that had become fashionable within science education circles in the last decades lost sight of critical inquiry as the core aim of education In this book we develop an account of education that places critical inquiry at the core of education in general and science education in particular Since science constitutes the paradigm example of critical inquiry we explain the nature of science paying particular attention to scientific methodology and scientific modeling and at the same time showing their relevance in the science classroom We defend a universalist rationalist and objectivist account of science against epistemological and social constructivist views postmodernist approaches and epistemic multiculturalist accounts

Reimagining Utopias Iveta Silova, Noah W. Sobe, Alla Korzh, Serhiy Kovalchuk, 2017-07-13 *Reimagining Utopias* explores the shifting social imaginaries of post socialist transformations to understand what happens when the new and old utopias of post socialism confront the new and old utopias of social science This peer reviewed volume addresses the theoretical methodological and ethical dilemmas encountered by researchers in the social sciences as they plan and conduct education research in post socialist settings as well as disseminate their research findings Through an interdisciplinary inquiry that spans the fields of education political science sociology anthropology and history the book explores three broad questions How can we re imagine research to articulate new theoretical insights about post socialist education transformations in the context of globalization How can we re imagine methods to pursue alternative ways of producing knowledge And how can we navigate various ethical dilemmas in light of academic expectations and fieldwork realities Drawing on case studies conceptual and theoretical essays autoethnographic accounts as well as synthetic introductory and conclusion chapters by the editors this book advances an important conversation about these complicated questions in geopolitical settings ranging from post socialist Africa to Eastern Europe and Central Asia The contributors not only expose the limits of Western conceptual frameworks and research methods for understanding post socialist transformations but also engage creatively in addressing the persisting problems of knowledge hierarchies created by abstract universals epistemic difference and geographical distance inherent in comparative and international education research This book challenges the readers to question the existing education narratives and rethink taken for granted beliefs theoretical paradigms and methodological frameworks in order to reimagine the world in more complex and pluriversal ways **God and History** Laurence W. Wood, 2005 This book argues for an integrative dialectic of faith and history It is a fresh examination of the problem of faith and history Instead of being a mere liability it is argued here that the strength of the Christian faith is its historicity Although modern thought was not always friendly to Christian faith because of its deeply embedded dualism it raised the critical

intellectual issues that Christian theology needed to address Advancing a more critical understanding of the nature of history than modern thought was generally able to achieve because of its dualistic thinking this work argues for an integrative dialectic of historical probability and the certainty of faith This book gives a comprehensive and fascinating account of the development of the idea of history in correspondence to changing conceptions of the divine reality from its origin in Ancient Israel and in Greece all the way to the contemporary discussion It focuses on the rise of critical historical investigation in modern times and on the struggle of modern theology to come to terms with it It is an important contribution to this discussion The split between fact and meaning is persuasively identified as a main obstacle and it is shown to be overcome in the reconstruction of history in the light of the eschatological future Also very helpful is the final chapter on time space time and eternity with its emphasis on Boethius and with its critical remarks on nontrinitarian theistic notions of a personal God Wolfhart Pannenberg University of Munich Report of the Proceedings Church congress,1890 **The Least of These** Anthony E. Cook,2014-06-11 First published in 1997 Examining race law and religion in today s America The Least of These highlights the power of these principles to both divide and unite and promotes a new form of liberalism that incorporates the spiritual values long neglected by earlier progressive liberals Relaunching the fundamental tenet of progressive liberalism that a justly ordered society must protect the interests and promote opportunities for the least advantaged of its population Anthony Cook argues for a revival of the progressive vision of American politics While the affirmative action debates smolder around the country Cook contends that the spiritual foundation of this liberal tenet must be unearthed and elaborated to fit our times before we can attempt to tackle the issues that the civil rights era has left unanswered As the twentieth century closes The Least of These provides a greater understanding of the roots of our ongoing socio political struggles and serves as an invaluable profile of progressive liberal politics from World War II to the present The Routledge Dictionary of Judaism Alan Avery-Peck,Jacob Neusner,2004-02-24 With over 600 wide ranging and informative entries this dictionary provides the reader with an invaluable reference aid to all areas of Judaism *The Journal of Philosophy* ,1923 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 **The Enigma of Reality** Pasquale De Marco,2025-04-24 Embark on an intellectual odyssey through the enigmatic world of David Hume a pioneering philosopher whose ideas continue to challenge and inspire thinkers to this day In this comprehensive exploration of Hume s philosophical legacy we delve into the depths of his skepticism his critique of causation his theory of the mind and his ethical and religious views Hume s skepticism a cornerstone of his philosophical framework shakes the foundations of our understanding of knowledge and reality He argues that all our knowledge is derived from experience and that we can never attain certainty about anything beyond our immediate perceptions This radical skepticism opens up new avenues of inquiry into the nature of reality and the limits of human understanding Furthermore Hume s critique of causation a central concept in scientific and philosophical thought is a tour de force of logical analysis He meticulously dissects the concept of cause and

effect demonstrating that we can never observe a necessary connection between two events This critique undermines the traditional understanding of causality and raises profound questions about the limits of scientific explanation Hume's theory of the mind a pioneering exploration of human psychology delves into the intricate workings of the human psyche He posits that the mind is a bundle of perceptions constantly in flux and that there is no enduring self or soul This radical view of the mind challenges traditional notions of personal identity and raises questions about the nature of consciousness and free will Finally Hume's ethical and religious views while often controversial offer a unique perspective on morality and the existence of God He argues that moral judgments are based on sentiment and emotion rather than reason and that there is no rational basis for belief in God These provocative ideas challenge conventional moral and religious beliefs and invite us to reconsider the foundations of our values and beliefs Through a comprehensive analysis of Hume's writings this book unravels the complexities of his thought and illuminates the profound impact of his ideas on the development of modern philosophy It is an essential guide for anyone seeking to understand the intellectual landscape of the 18th century and the enduring legacy of one of its most influential thinkers If you like this book write a review on google books **Knowledge** Nico Stehr,Reiner Grundmann,2005 The increasing investment in scientific knowledge in its production distribution and reproduction is acquiring greater social significance Everything that is regarded as knowledge in society has become a legitimate subject matter for academic investigations from various disciplines and for practitioners **The Death and Resurrection of Jesus** Donald J. Goergen,2003-09-04 Reading as Belief J. Bettridge,2009-10-26 Reading as Belief advances the provocative idea that the disruptive techniques of recent innovative poetry require readers to become believers occupying the same philosophical ground as the religious faithful Pairing the poets Charles Bernstein and Bruce Andrews with John Calvin and Jonathan Edwards and drawing on the work of diverse thinkers such as Wendy Brown Ludwig Wittgenstein Walter Benjamin Stanley Cavell William James and Gilles Deleuze this book demonstrates how belief faith and language attuned critical inquiry share an epistemology one concerned with making meaning in the absence of certainty Bettridge argues that recognizing such common ground helps overcome the cultural and philosophical impasse following the collapse of modernity's central narratives about language and liberal subjectivity
